LEVERAGING READINESS SUPPORT FOR AMBITIOUS PROGRAMMING AND INVESTMENT

December 9, 2019

13:15-14:45

GCF+GEF Pavilion

UNFCCC COP25

In March of 2019, the GCF Board approved a new strategic direction for the Readiness and Preparatory Support Programme over the next three years. The Secretariat has begun to operationalize the strategy and recently issued new guidance to inform countries as they develop and submit new proposals for readiness support.

This event will provide an opportunity for National Designated Authorities (NDAs), delivery partners, and other relevant stakeholders to learn how the Readiness Programme has changed in substantive focus and operational modalities, as well as how it will support countries during GCF-1, the first formal replenishment period of the GCF.

The programme will feature case studies from a panel of NDAs and delivery partners on their approach to accessing readiness resources in line with the new Readiness Programme strategy. The case studies and discussion will present how readiness funding for capacity building and technical assistance can drive NDC development and implementation, strengthen investment pipelines, and create the enabling policy and planning environments for sustained climate action.

Speakers and Panelists

Mr. Paula Pouvalu Ma'u	Chief Executive Officer, Ministry of Meteorology, Energy, Information, Disaster Management, Environment, Climate Change and Communications, Kingdom of Tonga	@MICTonga
Ms. Andrea Rodriguez	Manager, Climate Action Program, Fundación Avina	@arodriguezosuna @FundacionAVINA
