CLARIFICATION NO. 3

REQUEST FOR PROPOSAL - PORTFOLIO MANAGEMENT SOLUTION FOR THE GREEN CLIMATE FUND

The GCF is hereby communicating to all potential Proposers answers to the requests for clarifications received.

Clarification requested	GCF Response
<p>Would you be able to clarify what it is you are looking for in your response to the Technical Proposal? It states in part b (Proposed Methodology, Approach and Implementation Plan) of your Technical Response that you are looking for us to:</p> <p>“demonstrate the Proposer’s response to the Terms of Reference/scope of services by identifying the specific components proposed, how the requirements shall be addressed, as specified, point by point; providing a detailed description of the essential performance characteristics proposed; identifying the works/portions of the work that will be subcontracted; and demonstrating how the proposed methodology meets or exceeds the specifications, while ensuring appropriateness of the approach to the local conditions and the rest of the project operating environment.”</p> <p>Does this mean you would like us to have a response to everything in Annex I for this part?</p>	<p>The response should cover how the requirements would be covered in terms of delivery, the response should be detailed enough to explain if this would be through configuration, customization, coding or if some of the requirements won’t be met at all. The response needs to cover how this would be done from a project management prospective and any works or portions that need to be subcontracted. The response needs to cover all requirements in Annex1 point by point, but general enough to specify if a functionality is covering the requirements by configuration, or whether a customization would need to be developed, or if a unique requirement won’t be available.</p>
