Republic of Korea

Dear Executive Director Glemarec:

We forward for your evaluation and consideration the Funding Proposal on "Multi-Hazard Impact-Based Forecasting and Early Warning System for the Philippines" for Green Climate Fund (GCF) financing under the Simplified Approval Process (SAP). For this project, the Philippine Atmospheric Geophysical and Astronomical Services Administration (PAGASA) shall act as the lead Executing Entity with LANDBANK as the Direct Access Entity for the Philippines.

The aim of this project is to increase resilience and reduce vulnerability of communities, livelihoods and properties facing hydrometeorological hazards and risks through the development and implementation of impact-based forecasting and warning systems that are sector- and location-specific. We believe that through this project, identified vulnerable local communities, and the Philippines as a whole, will stand to benefit from the more practical impact-based weather forecasting, especially with the occurrence of more intense extreme weather events in our present times.

We look forward to your favorable evaluation of our proposal for endorsement for consideration for approval by the GCF Board.

Thank you.

Sincerely,

CECILIA C. BORROMEEO
President and CEO
