

STAKEHOLDER CONSULTATIONS REPORT

**Summary of consultations made for the Feasibility Study and
Proposal Development**

**“Strengthening the resilience of smallholder agriculture to climate change-induced water insecurity in the
Central Highlands and South-Central Coast regions of Vietnam” Project**

The project responds to an initial written request from Ministry of Agriculture and Rural Development (MARD) to UNDP to work with ADB to develop stronger coordinated support to build the resilience of farmers in areas covered by the WEIDAP project. The Concept Note was shared with MARD and ADB to ensure complementarity of the two projects at the onset. MPI as NDA for GCF proposal, was also routinely briefed on the progress of the proposal development. Multi-stakeholder consultations with senior government stakeholders at central and local level, key multi-lateral and UN partners, particularly the Asian Development Bank, civil society organizations and vulnerable groups of poor/near poor, ethnic and women-headed households have been conducted during the feasibility study and proposal development.

Key consultation meetings for the FS/Proposal development include:

-) Scoping mission to Central Highland region: August 2017 and to South Central Coastal region: September 2017
-) Consultation meeting with MARD departments and ADB on 19 October 2017
-) 14 consultations with NGOs and international donors, two with private sector entities, 15 with DARDs, districts and communes, and 10 with farmer groups in Dak Lak, Dak Nong, Binh Thuan, Ninh Thuan, and Khanh Hoa, to collect information on vulnerability to climate change; priorities and needs; current projects and programs on climate change adaptation; poverty reduction; ethnic minorities' support; sustainable agriculture development; and gaps and recommendations.
-) Field consultation mission to Dak Lak, Dak Nong and Ninh Thuan for feedback on the Concept Note and to collect further information on gender equality, ethnic minority engagement, irrigation technologies and access to information (16-20 January 2018)
-) Field consultation mission on Economic and Social & Environmental Safeguards with participation of BRH experts to collect further information on ethnic issues and engagement, traditional political/leadership structures, land ownership, etc. The mission took place in Ninh Thuan from 3-4 April 2018 as part of BRH mission to Viet Nam to meet/consult with different stakeholders (MPI, MARD, ADB, CERDA – GCF observer organisation)
-) Final consultation mission to the five target provinces to consult with local authorities and households on proposed CRA packages and pond O&M plan (3-10 May 2018).
-) Final technical meeting with CPO and five DARD representatives to update/consult final project design, clarify co-financing requirements and next steps
-) Validation workshop in September 2018 with participation of all stakeholders (relevant ministries, five DARDs, CSOs, research institutes, development partners, ADB, UN agencies)

Overview of consultations carried out during the feasibility study and proposal development

Total number of irrigation schemes visited as part of pre-feasibility and feasibility irrigation sub assessment, in combination with WEIDAP missions	50
Total number of farming communities met – on rain-fed and irrigated land - as part of the pre-feasibility and feasibility study.	35
Total number of consultations that involved community representatives (individuals and groups) during pre-feasibility and feasibility studies and sub assessments	80
Total number of resource persons and key stakeholders interviewed during pre-feasibility and feasibility studies and sub assessments	150

Engagement of ethnic minority groups during the design phase

From the concept development stage, there was recognition by the Government of Viet Nam that the primary target group of this project should be the most vulnerable populations and that ethnic minority groups account for a disproportionate share of poor households in the country.

	Whole country	Khanh Hoa	Ninh Thuan	Binh Thuan	Dak Lak	Dak Nong
Rate of poor household as whole	9.88	9.87	14.93	5.81	19.37	19.26
Rate of poor household among ethnic minority	23.1 (*)	68.6	38.8	19.54	37.17	40.75
Rate of near poor household as whole	5.22	6.69	8.82	3.95	8.28	6.15
Rate of near poor household among ethnic minority	13.6 (*)	9.8	14.95	8.66	10.91	8.6

Source: MOLISA and provincial DOLISA, 2016

(*) Social- Economic Survey of Ethnic minority in Vietnam conducted by CEMA and GSO, 2015

The table above shows that in the five provinces targeted in this project, 20-69% of ethnic minorities belong to the poor category and another 9-15% to the near poor category. The likelihood of ethnic minorities being either a poor or near-poor household is systematically higher than for non-EM groups.

During consultations as part of the design of this project, views of ethnic minorities were incorporated by inviting representatives of these groups, representatives from Committees of Ethnic Minorities and NGOs that are supporting issues related to ethnic minorities, as described below.

1) Consultations with farming communities

Annex A to this document shows that representatives from ethnic minority groups (highlighted in yellow) who have participated in consultations with farming communities that took place throughout the course of 2018. As the attendance sheets indicate, some consultations were dedicated to ethnic minorities. Two Focus Group Discussions with women's farmer groups, totaling 25 ethnic minority women, also took place in September 2018 (See meeting summary in Annex B).

2) Engagement of representatives of Committees of Ethnic Minorities

CEM is the government body that has presence at the central and provincial levels, and they have been invited to all key sub-national and national consultations. Annex C presents attendance sheets of government consultations that took place in 2018 with participation by the representatives of CEM (highlighted in yellow).

3) Engagement of NGOs

Three NGOs that are active in supporting ethnic minorities have been engaged in national consultations. They participated in two national consultations including the national validation workshop in September 2019. The profiles of these NGOs are included in Annex D.

Consultations with key government stakeholders and relevant actors			
Date and location	Event	Objective	Participants
30 May 2017	Meeting ICD	To clarify UNDP GCF Idea Note scope, that is complementary and not overlapping with other projects like UN REDD+	Mr Chu Van Chuong, ICD Jenty Kirsch-Wood, UNDP Pham Thi Lien Phuong, UNDP
27 July 2017	First meeting with CPO on the idea note	To explore the scope and key project designs under ADB project, synergies and complementarity with GCF project	Mr Vu Ngoc Chau, CPO Nguyen Duc Mien, CPO Jenty Kirsch-Wood, UNDP Dao Xuan Lai, UNDP Pham Thi Lien Phuong
Aug-Sep 2017	Scoping consultation mission to Central Highland (9-14 Aug) and to South Central Coastal provinces (10-19 Sep)	To collect information and data to develop a concept note and pre-feasibility study for a GCF funded project proposal To consult with local authorities at different levels on their expectations and needs as well as get initial feedback on the proposed project activities.	CPO, UNDP, FS and Concept Note consultants. Srilata Kamilla, UNDP Regional Technical Advisor participated in the mission to Central Highlands region
19 October 2017	Consultation meeting with relevant MARD	To consult with MARD Departments on technical aspects for the Concept	Representatives from MARD: - International Cooperation Department

	departments and ADB on the Concept Note	Note, to ensure that it is in line with Vietnam's priorities and GCF requirements. UNDP had a brief introduction of the GCF concept note. Stakeholders discuss technical designs, provided inputs for developing into a final draft of CN. ADB welcomed and fully supported the project as the two projects have strong links.	<ul style="list-style-type: none"> - CPO - Agro Processing Department - Planning Department - National Center for Agricultural Extension services - IPSARD <p>UNDP (Dao Xuan Lai, Jenty Kirsch-Wood, Pham Thi Lien Phuong) ADB Concept note/FS consultant</p>
6 February 2018	GCF Stakeholder Consultation Workshop, Green One UN House	To consult with all stakeholders of the Concept Note. The CN, the theory of change and the pre-feasibility study were presented by Proposal Development and FS Consultant to participants. It was emphasized that the proposal development was an iterative process and the project would go deeper into the analysis with the feasibility study. The time plan for submission was presented.	<p>Chaired by Mr Chu Van Chuong (Deputy Director General of ICD/MARD) and Ms Caitlin Wiesen (UNDP Country Director)</p> <p>Participants include:</p> <ul style="list-style-type: none"> - MARD representatives (CPO, ICD) - ADB (Sanath – Senior Natural Resources Economist) - Women's Union, Farmers' Union, Red Cross - WB, IFAD - Embassies - NGOs (Action Aid, SNV) - Women's Union, Red Cross - Private sector: Agri Media
3-6 April 2018	Field consultation mission to Ninh Thuan province to collect information for Economic and Social & Environmental Safeguards Analyses as part of the expert mission to Viet Nam to meet and consult with key stakeholders at central and provincial level	<p>To collect further information on ethnic issues and engagement, traditional political/ leadership structures, land ownership, etc., at the field level (especially local authorities and people)</p> <p>To consult with key stakeholders in greater detail on the proposal</p> <p>To work with the technical team on key details of the technical sub-assessments, FS and Proposal</p>	<p>CPO (Vu Ngoc Chau – Director of WEIDAP project, Pham Minh Yen, Tran Van Hang)</p> <p>UNDP BRH experts (Srilata Kamila, Phillip Michael Harington, Babatunde Olukawayode Abidoye), Nick Remple – Proposal Development consultant,</p> <p>Consultation meetings with representatives of MPI, MARD, ADB, CERDA – local NGO/GCF observer organisation</p> <p>Technical team (Miguel Coulier – FS, Dam Viet Bac – Agriculture, Nguyen Van Manh – Water, Duong Van</p>

			Kham/Nguyen Huu Quyen - Climate Information and Le Van Son – Gender)
3-10 May 2018	Final consultation mission to five target provinces	The final CN and project scope were presented to provincial stakeholders for feedback and further information was collected and the feasibility explored of proposed CRA packages, Climate Innovation Platforms, voucher system, private sector engagement, credit options, shared ponds, O&M)	CPO (Nguyen Duc Mien – staff) UNDP (Pham Thi Lien Phuong) Technical team (Agriculture, Irrigation, Gender)
8 June 2018	Meeting between UNDP and CPO	<p>To update the progress of GCF proposal formulation. WEIDAP Director informed that the pre-FS of WEIDAP project was approved on 18 May 2018. This is the right timing as we are going to prepare for this grant project.</p> <p>Regarding implementation arrangements, these are critical to accelerate and maintain project delivery. Both sides agree on next steps and indicative timelines (Co-F letter, LOA) and agree to communicate more regularly towards finalisation of the proposal package.</p>	<p>CPO:</p> <ul style="list-style-type: none"> - Mr Nguyen Hong Phuong (new WEIDAP Director), - Mr Vu Ngoc Chau (old WEIDAP Director) - Mr Nguyen Duc Mien - Ms Pham Minh Yen - Mr Nhat (interpreter) <p>UNDP</p> <ul style="list-style-type: none"> - Akiko Fujii, Deputy Country Director - Dao Xuan Lai - Jenty Kirsch-Wood - Pham Thi Lien Phuong

12 July 2018	Meeting with FAO	Sharing of GCF concept note and some ideas for their possible engagement (CRA FFS capacity building)	Nguyen Song Ha – FAO Programme Assistant Jenty Kirsch-Wood Pham Thi Lien Phuong

UNDP regional technical advisor mission to Viet Nam

Date and location	Event	Objective	Participants
9-14 August 2017	UNDP Regional Technical Advisor Mission to Viet Nam, Central Highland region for sc	The mission focused on providing support and guidance to finalize the development of the concept note and pre-feasibility study. To consult with local authorities of different levels on their expectations and needs as well as get initial feedback on the proposed project activities.	Srilata Kammila, <i>Adaptation Advisor, UNDP Regional Service Centre, CPO, UNDP CO, FS and CN consultants</i>

Submission of Concept Note and Pre-feasibility study for the GCF

21 December 2017	Submission of Concept note and pre-feasibility study for the Green Climate Fund		UNDP
------------------	---	--	------

Development of Proposal and Feasibility study

July 2017- January 2018	Employment of team of consultants for the development of the sub assessments for the feasibility study and start of consultations processes with relevant stakeholders. Documented in each sub assessment report.	Irrigation sub assessment, agriculture sub assessment, gender sub assessment, climate information sub assessment	UNDP and technical team
-------------------------	---	--	-------------------------

Proposal development mission to Viet Nam

16-20 January 2018	Field consultation mission to Dak Lak, Dak Nong and Ninh Thuan for getting feedback on the Concept Note	To get provincial feedback on the Concept Note draft and to collect further information on gender equality, ethnic minority engagement, climate resilient agriculture, irrigation technologies and access to information Meeting DARD staffs, and all relevant Departments at provincial level, and consult with local authority and households at selected communes of 6 districts of 3 provinces	Consultants (Nick Remple - Proposal development, Miguel Coulier - FS, Dam Viet Bac - Agriculture, Le Van Son - Gender) CPO staff (Mr Vu Ngoc Chau – Director of ADB WEIDAP project; Tran Viet Anh - staff) UNDP (Dao Xuan Lai, Jenty Kirsch-Wood, Pham Thi Lien Phuong)

Overview of consultations per feasibility sub assessment

a. Consultative interviews and correspondence with key stakeholders for FS development:

Date and location	Meeting and Objective	Participants
5 September 2017, ICRAF office	Agro-climate advisories, agroforestry	UNDP FS/CN consultant and Elisabeth Simelton, climate scientist, ICRAF
6 September 2017, IDE office	Water efficiency technology	FS/CN consultant and Nguyen Van Quang, Director of IDE
8 September 2017, SNV	Value chain, EM	UNDP FS/CN consultant and Tran Tu Anh, Climate change specialist, SNV
21 August 2017, FAO	Drought risk index, voucher system for CSA, Forecast-based Financing	UNDP FS/CN consultant and Operations Coordinator, Roberta Tranquilli FAO
23 August 2017, BTC	Water program in Ninh Thuan	UNDP FS/CN consultant and Water program in Ninh Thuan
24 August 2017, IDH	On-going coffee and pepper cultivation initiatives Central Highlands	UNDP FS/CN consultant and Vietnam Coffee Coordinating Board (General Director IPSARD)
25 August 2017, Oxfam	Ninh Thuan and Dak Nong livelihood programming	UNDP FS/CN consultant and Vu Minh Hai and CC-DRR team, Oxfam
28 August 2017, IFAD	Value chain, EM, credit	UNDP FS/CN consultant and Sauli Hurri and Nguyen Quang, IFAD

28 August 2017, Agrimedia	Climate information – met stations, SMS service	UNDP FS/CN consultant and Agrimedia Director
29 August 2017, ICCO	Climate information, SMS	UNDP FS/CN consultant and ICCO
30 August 2017, VNSAT	Water efficiency technology, credit support, Central Highlands	UNDP FS/CN consultant, GCF Project Coordinator and CPO MARD VNSAT program, Mr Son
30 August 2017, CARE	Climate information, VSLA, gender and EM programming	UNDP FS/CN consultant and Luu Thi Thu Giang, climate change specialist, CARE
31 August 2017, Mimosatek (on skype)	Conversation of costing and design of sesame interventions	UNDP FS/CN consultant and Lan Anh Le, Mimosatek
21 August 2017	Small grants program, water harvesting model in S-Central Coast, experience with credit programs	FS/CN consultant and GEF SGP Portfolio manager Nguyen Thi Thu Huyen

b. Consultations for agriculture sub assessment

-) DaK Nong, Dak Lak, Binh Thuan: 31 January 2017 - 5 February 2018
-) Ninh Thuan, Khanh Hoa: 6-9.3.2018

Dak Lak province

Annex B – Summary of Focus Group Discussions with women from ethnic minority groups

Farmers' group, Thuan Bac district, 15th September 10am
15 women farmers, Raglai ethnic minority

- Most landless, with some owning little land (0.2 to 0.33ha), in upland areas, very unproductive. House in lowlands, but farms in the upland (1-2/2-3 hours walking distance)
- Farm depending on rain. In addition, dig their own wells, and have very small ponds (takes 3 to 4 days to dig)
- Mang cau, maize most affected by drought (dried up); cashew most affected by rainfall variability (1 season recovery period). Laborers also affected as lost jobs
 - o Maize only grown in rainy season, land left fallow in dry season
 - o Maize: 4,000 VND / kg; 50kg per season harvest
 - o Cashew: 20-30,000 VND / kg; max 50 kg per season ('if lucky'); 2 kg per tree – 3 to 4 times harvested per season, 5 to 6 kg per harvest – 2/13/20 trees per household
 - Cashew village collectors
 - o Grass for livestock can only be grown in wet season, but not drought-resilient
- Weather information: need for their planting, but currently limited information, only received through television. Have no mobile phone
 - o Weather forecast is not accurate
 - o High need
- Training received: only a few farmers, others but only once per year
- Laborers work on cashew farms: one cashew company provided support to do on-farm peeling of cashew, work available the entire year: 5,000 VND per kilo peeled; 3 kilo peeled per day
- Husbands work as farm labor: coffee picking in Da Lat; 3.5million VND per month
- Crop shifting options: don't know what options are available, don't know the suitable options. Traditionally focused on cashew
 - o Idea: banana, but need for money to buy fertilizer and access water
 - o If water is available, then they could shift to other crops
- Loans: no loans
- Farmer groups:
 - o Women's Union and Farmers Union: provide loans, but farmers are afraid to borrow, because of repayment challenges
 - o 1 farmer has a 30million VND loan, for cow raising. But prices went down, so afraid to lose money compared to the investment.
 - o Attend training classes, from extension dept., farmers union – on livestock raising: can apply, practical
 - o Interest groups: not aware of other groups, or aware of potential benefits
- Good practice in the commune, by other farmers: main income is labor work (farm and non-farm). Middle income farmers have more land, more cows etc. (or inherited). Better-off farmers live mostly near the stream or reservoir, if they don't, they also struggle. They also dig ponds, but more lowland. Dam very far!
- Lack drinking water too, but less challenging, as most of them are connected to the lowland pipe system.
- Near the house: pigs. Livestock doesn't require land.
- Chickens and pigs grown for sale

- No land for home gardens, but only little and not enough for household demand
- Aspirations: invest in black pigs. Sells for 300,000VND per pig. Investment is 500,000 for a male pig. Easy to manage diseases. Also know how to deal with agricultural waste
 - o Farmers have tried pigs, but in some households they died because of weather change (rain-dry; drought 2016), not because of a pig disease
 - o Local traders buy pigs
 - o Price information through contacting neighboring communes
- Not aware of Oxfam support
- Needs: land in lowland, trainings, seeds – develop livestock. Want to keep maize, but change to drought-resilient maize. For cashew, they want to do more intensive (currently not use fertilizer or pesticide), to increase yield
 - o Have no idea if resilient variety exists

Farmers' group, Bac Ai district, 16th September 10am
10 Ethnic Minority women farmers, Raglai ethnic minority

- Land size: 0.5, 0.8, 0.5, 0.5, 0.7
- Household mostly have small land plot of rice lowland, and the rest upland crops: maize, beans etc.
- In addition, also livestock, 2 to 3 goats and/or 2 to 3 cows
- Water sources lowland are a stream, upland rain-fed
- In dry season, 7 to 8 months, there is no water lowland, so most of the land used for rice is left fallow. Farmers still try to rotate the rice field with maize and beans, but often fails
- Laboring is also an income source, particularly during dry season: wood and cow dung collection, or coffee collecting in Lam Dong
- The commune authorities have supported the digging of 'ponds in the stream': when the water levels in the stream reduce, the water is 'stored' in these temporary ponds for a few months – these are shared by households
- Other shared ponds exist too, but often for one household, and lasts only one month
- Farmers haven't tried much other crops as they are not aware of different options (besides maize, beans and the 'bo bo tree')
- Rice is cultivated half for own consumption, and half sold for paying back the agricultural input costs (farmers have through informal in-kind loans with traders)
- Farmers also have household tanks, but only 30 liters size. Larger tanks are too expensive (such as 300, 500, 1,000 liter)
- During the drought, households were supported with 15kg of rice per person. 2 households also received technical training. However, majority of households didn't receive anything in addition to the rice.
- There is a training organized by the Farmer's Union and the extension services once per year, but not everyone participates
- Important drought coping mechanisms is labor
- For weather and climate information, some farmers rely on their own experience, others get it through television, and some get advice from the local authorities
- Many households have VBSP loans, average 15-20 million VND – with most of them able to repay
- For them to shift crops, they first want to see another farm trying it successfully

- Market prices are set by informal traders: small traders, collectors, input suppliers
- Some households have received support through the IFAD project, through the formation of a 'goat group', but with limited reach (ten households) and mixed success (overall project experience: some benefit, some don't)
- There are no other groups in the community, including no Women's Union groups

Trung tâm Nghiên cứu & Phát triển Vùng cao *Centre of Research & Development in Upland Area*

CERDA is a Vietnamese non-governmental and not for profit organization which was founded in 2004. It operates under Permit Number A-123 that was granted by the Ministry of Science and Technology, under the management of Vietnam's Union of Science and Technology Associations (VUSTA).

The organization's operation focuses on the applied research and the implementation of development projects in the upland areas and islands; Prioritize work directly with vulnerable groups, especially ethnic minority communities, women, local governments and policy advocacy work at all level from local to international level; Maintain and develop the partnerships and network with domestic and international organizations in implementation of projects and researches, and policy advocacy.

Since the establishment, CERDA' operation continuously has been funding by the international organizations and donors

MISSION

To accompany with the vulnerable groups, especially ethnic minority communities, women in the upland area and islands and support them to achieve self-reliance, exercise their full rights and legitimate interests, improvement of quality of life, sustainable management of natural resources, and to contribute to climate change mitigation and adaptation, Sustainable Development Goals (SDGS

VALUES

All members of Centre believe in and pursue dedication, perseverance, striving for a democratic, civilized, prosperous and equitable society. All actions of Centre are selected and developed on a basis of morality, values of dignity, integrity, trust and respect, governed by creative passion and overcoming success.

WORKING AREAS

- Enhance ethnic minorities and local communities towards self-reliance and self-determination by strengthening community institution through establishment of legal entities and networks, enhancing participatory governance as well as building capacity;
- Strengthen ethnic minorities and local communities to be able to:
 - Access land and forest use rights;
 - Proactively participate and contribute to climate change mitigation and adaptation, priorities given to REDD+;

- Effectively protect natural forest and to conserve biodiversity and ecosystem with high cost effectiveness through inter-community association, landscape and customary law approach;
- Promote livelihood resilience, organic-oriented – non chemical commodity production and access to market;
- Approach to and advocate policy;
- Conserve and develop indigenous knowledge and traditional practices;
- Promote gender equality;
- Policy advocacy.

DONORS

CERDA has been funded continuously by the international organizations and donors since its establishment. The donors are follows:

- Inter-Church Organization for Development Cooperation (ICCO);
- Rockefeller Foundation;
- Ford Foundation;
- Manos Unidas;
- Norwegian Agency for Development Cooperation (Norad);
- Christensen Fund;
- Tamalpais Trust Fund;
- Indigenous Peoples’ International Centre for Policy Research and Education (Tebtebba);
- EU REDD+ Facility – European Forest Institute;
- Forest Carbon Partnership Facility – World Bank

MEMBERSHIP, PARTNERSHIP:

CERDA develops and maintains the partnership with a number of national and international organizations and members of the networks, as follows:

- Indigenous People’s Global Network on Climate Change and Self Determination (ELATIA);
- REDD+ Vietnam’s Network – Ministry of Agriculture and Rural Development;
- Ethnic Minorities Working Group (EMWG).

PROJECTS

The projects that CERDA is the project holder have been completed and is underway, in partnership with the local government and women union, legal community entities and national and international network as follows:

1. “Poverty reduction and Advancement of Ethnic Minority Women in Lang Son province”

- Duration:* 2004-2005;
Donor: ICCO (Netherlands)
Project site: Lang Son province
2. “Introduction of the Appropriate Agricultural Extension Model at Village Level in the Rural Upland Areas and Sharing of Experiences in the Mekong Region”
Duration: 2005-2007;
Donor: Rockefeller Foundation
Project sites: Lao Cai and Lang Son province
 3. “Supporting a Traditional Herbal Networking for Tay, Dzao and Nung ethnic minority groups in Lang Son province, Vietnam”
Duration: 2006-2007
Donor: ICCO (Netherlands)
 4. “Raise awareness and increase participation of local people for sustainable development among ethnic minorities in Lang Son province through development of research & development organizations and community based organizations”
Duration: 2006-2008
Donor: ICCO (Netherlands)
Project site: Lang Son province
 5. “Enhance active participation of grassroots people towards the long-term sustainability and wellbeing of ethnic minorities in Lang Son and Lao Cai province”
Duration: 2008-2011,
Donor: ICCO (Netherlands).
Project sites: Lang Son and Lao Cai province
 6. “Livelihood sustainability among ethnic minority in Lao Cai province”
Duration: 2010-2012
Donor: Ford Foundation
Project sites: Lao Cai province
 7. “Pilot model of capacity building for ethnic minority community’s readiness for Program of Reducing Emission from Forest Degradation and Deforestation (REDD) in Vo Nhai district, Thai Nguyen province,
Duration: 2010-2013
Donor: The Norwegian Agency for Development Cooperation (Norad)
Project sites: Thai Nguyen province
 8. “Vietnamese non-governmental organization for ethnic minority communities in Northern mountainous areas” - Co-implement with SRD and CSDM
Duration: 2010-2013
Donor: Manos Unidas
Project site: Thai Nguyen province
 9. “Pilot models of implementation of Reducing Emission from Deforestation and Forest Degradation (REDD+) at grassroots level in North of Vietnam”,
Duration: 2013-2015

- Donor:* The Norwegian Agency for Development Cooperation (Norad)
Project site: Thai Nguyen province
10. “Ethnic minorities and local communities contribute to develop Provincial REDD+ Action Plan (PRAP) in Thai Nguyen province ”
Duration: 2014-2015
Donor: Christensen Fund
Project site: Thai Nguyen province
11. “Indigenous communities better access to forest tenure for long term and legal income sustainability”
Duration: 2014-2015
Donor: Christensen Fund
Project site: Thanh Hoa province
12. " Strengthening tenure among upland communities in Vietnam to reduce illegal logging and conversion of natural forest”,
Duration: 2015-2016
Donor: European Forest Institute – EU REDD+ Facility;
Project site: Thai Nguyen province
13. “Empowering ethnic minority women for REDD+, climate change and sustainable development in Vietnam”,
Duration: 2017,
Donor: Forest Carbon Partnership Facility - World Bank
Project site: Thanh Hoa province
14. “Capacity building for the ethnic communities to be ready to actively participate in REDD+ area as an independent stakeholder through their legal entities”
Duration: 2017-2018
Donor: Forest Carbon Partnership Facility - World Bank
Project site: Thanh Hoa and Thai Nguyen province
15. “Promotion of the long-term strategy for the nature based livelihood resilience and the sustainable income generation basing on the traditional –non-chemical agriculture production”
Duration: 2017
Donor: Tamalpais Trust Fund
Project site: Thanh Hoa and Thai Nguyen province

INTERNATIONAL ACTIVITIES

- CERDA is an observer organization of Green Climate Fund (GCF) – United Nation Framework Conference on Climate Change (UNFCCC)
- Participate in a number of international events on Climate Change, Sustainable Livelihoods; Forest and Biodiversity Conservation, Indigenous Peoples' Rights, and presentations at a number of international workshops/conferences.

- Participate in events organized by the United Nations Framework Convention on Climate Change (UNFCCC), through the International Indigenous People Forum on Climate Change (IIPFCC), including the mid-term conferences and the Conference of Parties from 2010 to 2012, including: COP15, COP 16, COP 17, COP18, COP19, COP20, COP21, COP 22, COP 23;
- Participation and presentation on "*Pilot model of Community led REDD+ and Biodiversity conservation initiative for sustainable management of forest natural resources and sustainable livelihoods of ethnic minority communities*" in the CBD COP 12 Conference on the site event of "*Restoring Ecosystems and Biodiversity: Challenges and Opportunities in the Context of REDD+,*" 13/10/2014, Pyeongchang, South Korea.

RESEARCHES

- “The role of communities in the forest and natural resources management basing on local knowledge and customary laws to deal with climate change and implement the REDD +”. This study was done in Vietnam is a part of study “Ensure the effective participation and equal benefit sharing for ethnic minority community in REDD+ programs and policy” was implemented in Nicaragua, Peru, Kenya, Cameroon, Vietnam, Indonesia, Philippines and Nepal. Coordinator: Tebtebba Foundation (Philippine); 2010
- “Indigenous women’s role in managing community’s forest based on customary law and traditional knowledge”, 2011. In cooperation with Tebtebba Foundation.
- “National study on the Green Climate Fund in Vietnam” – 2016, In cooperation with Centre for Sustainable Development in Mountainous Areas (CSDM) and Rural Development and Poverty Reduction Fund (RDPR), Tebtebba Foundation;
- “The context of REDD+ in Vietnam” in cooperation with Centre of International Forestry Research (Cifor), Central Institute for Economic Management (CIEM)
- Publication on “Climate change and REDD+”, 2010, in cooperation with CSDM and “Training manual on REDD+”, 2017, in cooperation with RECOFTC and CSDM.
- “The Interplay of Ethnic Peoples’ Customary Tenure System and REDD+ Implementation in Vietnam”, 2018, in cooperation with Tebtebba (going to complete);

PROFILE

Centre for Sustainable Development in Mountainous Areas – CSDM

Lương Thị Trường, Director (IP)

Tel: (84)24.33528555

Mobile: (84)913038782

<http://www.csdm.vn/>

CSDM is a non-government development organization and registered under an umbrella of the Vietnam Unions for Science and Technology Associations (VUSTA). Although CSDM has only been registered in 2000, it has been actively involved with communities since 1998 using a different legal entity. CSDM has been actively involved with Ethnic Minority communities in mountainous areas since its establishment.

CSDM's vision is to ensure all disadvantaged people and EM (Ethnic minority) groups able to realize their rights, enjoy the best quality of life, preserve rich cultural heritage and transmit to future generations.

CSDM composed of 10 competent people with outstanding track record in working the disadvantaged people and in EM community development in Vietnam. Majority of its members are coming from EM groups of Thai, Nung, Tay and Muong. Mrs. Luong Thi Truong, the Director is an EM person herself belongs to Thai ethnic group. Their experiences and knowledge in the grounds is admirable for they are working closely in ethnic minority communities. CSDM has a central management board composed of Program Coordinators and individuals who carry out the management role of the organization. CSDM has its financial regulation and a financial manual including all necessary forms and guidelines for financial processes. CSDM uses MISA software, which is recognized by the Vietnamese Government for all accounting systems. The financial system of CSDM complies with the Vietnamese financial system, which is monitored by its umbrella body known as Vietnam Union of Science and Technology Association. CSDM has its constitution and anti-corruption regulation for the prevention, detection and handling of persons who commit corrupt acts and which stipulates the responsibilities of the organization and of individuals in corruption prevention and combat. CSDM has its policy on EM women in order to promote role and rights of EM women and their engagement in development process.

For many years, CSDM has been working on main program components, including EM and Grassroots Democracy; EM Community Capacity Building; EM women; Advocacy at local, national and international levels; Forest, biodiversity and resources management; Climate change and REDD; Preservation and promotion of Indigenous Knowledge and Defending Environment and Human Right Defenders. CSDM focuses on improving knowledge and skills for local organizations and EM peoples, conducting case studies and researches on EM issues, advocating for EM rights on forest land tenure and natural

resources, language education, EM traditional culture, organizing and participating to relevant forums, dialogues and exchange programs.

CSDM is only the indigenous organization formed and led by an ethnic minority leader and with indigenous staffs who are actively advocating for the rights of EM group at national, regional and international levels. CSDM has been working on climate change and REDD+ issues since 2009. They have thereby developed their expertise and competence in capacity building and advocacy for the rights of EM in REDD+. CSDM is actively working on REDD+, not only at the local and provincial levels, but also at the national, regional and international levels through engaging in UN-REDD and FCPF Vietnam, GCF, UN-FCCC and others. CSDM has committed and dedicated staffs who have deep understanding of REDD+ including the National Action Plan of the government, highly skilled in community work and can speak the indigenous languages of the most of target communities, which is an asset in developing the trust and cooperation of these communities. CSDM is also actively engaging with local governments in their REDD+ and forest protection activities.

CSDM has gained from its work resulted in the election of the Executive Director of the CSDM to represent ethnic minorities in the Programme Executive Board of the UN-REDD Programme in Vietnam. CSDM is also part of the sub-national working groups on Benefit Distribution System, local implementation and governance and safeguards of the National REDD+ network. During Vietnam UN-REDD process, the Executive Director of CSDM, in collaboration with the UN-REDD Programme, has set up an EM network in the six pilot provinces of the second phase of the UN-REDD Programme. Through this, CSDM has developed good working relations with the local and provincial government authorities and has strengthened its relationship with the UN-REDD Programme in Vietnam. CSDM has earned from ethnic minorities and its competence and long-term experience with REDD+ project implementation in Vietnam.

Since year 2000, CSDM has implemented a series of projects related to promoting grassroots democracy and good governance; conducting forums, dialogues and community consultation on new laws, revised Constitution, Land Law 2013, Forestry Law 2017, National REDD Action Plan and national socio-economic development programs; policy advocacy for EM's rights on traditional culture/languages, land and forest tenure, Free-Prior-Informed Consensus and collective rights in REDD. We have sustained good cooperation with the local community, INGOs, NGOs and people's networks for advocacy for EM rights at local, national and international levels.

CSDM has implemented series of projects related to Climate change, community forestry management and REDD funded by NORAD, DANIDA, MISEREOR and the SDC. The overall goal of the projects is to promote approaches in national REDD strategies that take both long-term forest conservation and the rights and concerns of indigenous peoples into account. It uses a three-pronged approach, combining awareness raising and capacity building on REDD for indigenous communities and leaders with advocacy and lobbying for a rights-based, equitable and pro-poor approach in national REDD strategies and for the recognition of community-based forest conservation and REDD+, and the development of concrete replicable models for community-based REDD partnership which are used to inform and inspire the development of national REDD+ strategies. The projects also aim to involve ethnic minority community

in national processes in order to ensure that their rights are not encroached upon and that their traditional knowledge and community-based forest management practices are recognized as a critical contribution to the reduction of deforestation and forest degradation and the conservation of biodiversity rich natural forest. Through the projects CSDM consistently promotes fully and effectively participation of ethnic minority community in the preparation for and the eventual implementation of REDD+, in particular in the development and implementation of safeguard mechanisms, and that they have further refined and strengthened their own community-based approach to REDD+, and that this approach is recognized and actively supported by governments and key multilateral agencies involved in REDD+.

At the country level, very good relations have been established between CSDM with the UN-REDD Programme in Vietnam, CSDM directly involved in developing, implementing and/or evaluating pilot initiatives of free, prior and informed consent (FPIC), Participatory Governance Assessment in Lam Dong, member in the UN-REDD's sub-technical working group on REDD+ Governance and Social and Environment Safeguard processes by UN-REDD in Vietnam.

At regional and international levels CSDM together with project partners in Thailand, Nepal, Myanmar, Lao, Indonesia and Cambodia played a critical role in the UNFCCC advocacy work, which lead to the inclusion of safeguards in the REDD+ agreement. Partnerships with the UN-REDD Programme, the FCPF and the FIP were established at global, regional and national levels, and with key government agencies at national and local levels. Project partners are acting as indigenous observer for Asia in the FCPF Participant Committee, as indigenous representative in the UN-REDD Policy Board, and as indigenous representatives in the World Bank's Forest Investment Programme.

Community Local Self-Governance is one of the expertise and specialties of CSDM works complimented with EM Rights advocacy and capacity building. Indigenous Knowledge promotion and preservation is always integrated with other program. EM rights in the context of Climate Change and REDD is one of CSDM focus not only nationally but also internationally. Establishment of Local Community Network Associations makes CSDM more effective in service delivery directly to EM communities. These successes and achievements make CSDM totally different with other development organizations in the country.

Since 2007 CSDM has been voluntarily backstopped Vietnam Indigenous Knowledge network – VTIK which has about 2,000 members in 15 mountainous provinces of Vietnam.

About VTIK

The Vietnam Indigenous Knowledge Network – VTIK was formally established on 15th July, 2007, and its coordinating council is The Centre for Sustainable Development in Mountainous Areas (CSDM). VTIK members are compose of 11 EM groups namely Thai, Mong, Dao, Tay, Nung, Muong, Khang, Kh'mu, K'ho, Tho and Lu from 15 provinces in northern and northcentral of Vietnam namely; Son La, Yen Bai, Lai Chau, Lang Son, Dien Bien, Hoa Binh, Nghe An, Thanh Hoa, Lao Cai, Phu Tho, Quang Ninh, Thai Nguyen,

Tuyen Quang, Binh Thuan and Bac Giang. It has more than 2,000 members divided into 73 groups across 15 mountainous provinces.

The network's philosophy is Indigenous Knowledge should be protected in living context/environment and must serve for improvement of ethnic minority living standard. They agreed that Indigenous Knowledge must be used in harmony with appropriate modern technique for development of agriculture, forestry and income diversification and promoting non-farm employment for ethnic minority peoples.

The shared vision of the network is to conserve, revitalize and promote Indigenous Knowledge for prosperous future of their peoples as distinct ethnic groups.

Their activities at localities focus on conservation and promotion of indigenous knowledge and use it for agriculture and forestry development, natural resources management, environment and response to the impact of climate change.

Financial situation of VTIK

So far CSDM and networks have no fund for running the networks. CSDM staff has voluntarily co-ordinate the network. Network members at localities participate in local activities and found there modest fund for their works.

Main Achievements

After more than 8 years VTIK fulfilled its annual goals and objectives despite of its limitations and resources. With the unwavering support of CSDM and the committed, dedicated spirit of volunteerism among its officers and members, VTIK has gained most important achievement which is successfully advocated Vietnamese government, Ministry of Training and Education, to recognize and include teaching Thai language in primary school by issuing the circular No 46/2014/TT-BGDĐT, 12 /2014. And People Committee of Thanh Hoa province issued decision No 877/QĐ-UBND dated 17/3/2015 approving the Dao text book and using this text book for teaching Dao ethnic language.

VTIK members have involved in different activities to conserve indigenous knowledge at local, provincial and national levels and have gained remarkable achievements.

- Eight Vietnamese Thai script have been unified as unique Vietnamese Thai script for all Thai sub-groups in the whole Vietnam. The Thai script file has been put in computer and used for drafting teaching material, preserving ancient works in Thai language, writing newsletter, literature development and so forth. Each province has compiled teaching material on Vietnamese Thai script and its local Thai dialects and teaching it for communities in 7 provinces where the Thai living.
- With different advocacy methodologies and approaches, the network has been able to integrate the Vietnamese Thai language teaching programme in community learning centres and teaching the language for officers, border defense forces and the police. Two provinces Dien Bien and Son La have issued decision on Vietnamese Thai language teaching programme in secondary

schools. In 2014, Ministry of Education and Vocational Training issued decision to allow teaching Thai language in secondary school. In 2015 Thanh Hoa Provincial Peoples Committee issued decision on adapting The Dao teaching book and policy on teaching the Dao language in the province.

- Since 2012 the newly established Dao network has been able to set up Dao language teaching programs for Dao communities in Bac Giang, Thanh Hoa, Hoa Binh and Yen Bai
- Since 2013 the newly established Mong network members have carried out activities such as revitalization of “Thuc Suc” festival and other Mong games in Nghe An province; teaching Mong language in Dien Bien.
- In 2011 an Traditional Ethnic Minority Culture Association has been set up in Lang Son and the Tay and Nung network members have focused their activities on revitalization of folk songs and music at communities.
- The network was able to research, retrieve and collect books and some epics of ancient Thai language such as “xong chu xon sao”, “khon lu nang ua” and translated it into Vietnamese. Suitable content can be selected from it to be used as references in teaching programme and can be used as reference for natural resources conservation.
- The network has been a prime mover in the revitalization of cultural festivals, folk songs and dance in 15 provinces so it can be transmitted and preserved for next generations. It helps maintain and develop traditional remedies
- The network members are active consultants to local government and they participate in many local works on conservation and revitalization of ethnic minority culture at their locality: Dien Bien, Son la, Thanh Hoa, Yen Bai, Nghe An and Hoa Binh.
- VTIK members in localities made great contributions to conservation, preservation and maximizing the indigenous knowledge in forest conservation, climate change and REDD+.
- EM and especially EM women in CSDM target areas have demonstrated important role in climate change livelihood resilience development. In Thanh Hoa province, EM women had piloted an Indigenous product value chain to adapt to climate change and adapted to context of REDD implementation.
- VTIK members in provinces initiated and participated in activities of sacred forest protection, dissemination of knowledge on climate change, REDD+ and natural resources management.
- In 2019, a network of Vietnam Ethnic Minority Women has been set up and become member of Network of Indigenous Women in Asia - NIWA.
- In 2019, VTIK became a member of Indigenous Knowledge and People in Asia – IKPA.
- Activities conducted by the VTIK network have been drawing attentions as well as financial support from authorities at different levels (e.g. teaching the language for officers, restoring traditional festivals).

Name of the bank: **Vietnam Maritime Commercial Stock Bank – Hanoi branch**

Bank address: No 71, Hai Ba Trung street, Hanoi, Vietnam

SWIFT code: MCOBVNVX002

1.5. Legal status

The Centre for Sustainable Rural Development (SRD) was established and registered as a member organisation of the Vietnam Union of Science and Technology (VUSTA) with an operating permit from the Ministry of Science and Technology (MOST) dated March 30 2006. SRD is a Vietnamese non-profit, non-governmental organisation that is dedicated to working with disadvantaged communities, assisting them to improve their quality of life and manage their resources sustainably. Inheriting twenty-eight years of experience from the International Cooperation for Development and Solidarity (CIDSE) in Vietnam, SRD has been continuously progressing and has successfully implemented three Strategic Plans.

SRD currently has two operational offices – the head in Hanoi and Hue-based office – and maintains an extensive network of consultants and collaborators, locally and overseas. We also chair a number of Vietnamese and International NGO networks, such as; VNGO&CC, VNGO & FLEGT, CCWG, APRN, PAN AP. SRD provides support community-based organizations to achieve the best possible results for our projects.

1. OUR CORE COMPETENCIES AND HUMAN RESOURCE

Transforming from an international NGO (CIDSE) with 28 years' experience working in Vietnam, SRD has established a solid foundation as a professional development agency. Our operations are facilitated by a well-established system of financial management, human resource management and clear procedures. SRD has a strong background in delivering sustainable livelihood and climate change projects, implementing over 64 projects and 20 studies and minor projects with a total of funded budget 11 million USD across 42 provinces over the last 13 years. SRD has developed strong contract management capabilities, ensuring the timely implementation of large-scale projects, and a high level of transparency and accountability.

SRD staff are highly experienced, with a depth of expertise in the fields of agriculture, climate change, forest governance, economics, sociology, psychology, gender, environment, communications, and public health. All of SRD's staff possess a strong commitment to development work, are strongly sensitive to issues related to poverty, are familiar with community-based approaches and experienced in implementing projects related to climate change.

3. OUR EXPERIENCE

Since 2006, the number and location of SRD's projects have continued to expand. Our key areas of expertise are Sustainable Agriculture, Climate Change, Forest Law Governance, Trade and Enforcement (FLEGT) and Research and Advocacy. All of our projects have a strong capacity building focus, and integrate cross cutting issues including climate change and gender equity.

3.1. Sustainable Agriculture and Livelihood

Sustainable Agriculture and Livelihoods is an integral component of SRD's work in poor and vulnerable communities. Our Sustainable Agriculture and Livelihoods projects focus on raising income of rural population, especially for women and ethnic minorities, through the development of climate sensitive livelihood models and capacity building for community-based organizations.

SRD strives to implement Climate Smart Agriculture (CSA) and sustainable agroforestry systems in order to help people mitigate emissions and adapt to the impacts of climate change. We also encourage the participation and enhance the decision-making capabilities of rural people in local socio-economic development activities in their communities.

3.2. Climate change and disaster risk reduction

SRD initiated the establishment and operation of the Network of the Vietnamese NGOs and Climate Change (VNGO-CC) in 2008. As the Chair of the Network, SRD has connected many NGOs/ CSOs addressing climate change issues in Vietnam in order to enhance their communication, performance, and effectiveness, and to influence and contribute to the national policies responding to climate change in Vietnam. In its operating areas. Communities, especially the vulnerable households, have benefited from SRD-supported solutions and models such as Climate Smart Agriculture (CSA) and climate adaptive livelihoods, such as community-based disaster risk reduction.

In 2019, SRD represented the VNGO-CC Network and the Climate Change Working Group (CCWG) to sign a Memorandum of Understanding with the Department of Climate Change, which aims to coordinate and share information responding to climate change in the 2019-2023 period

3.3. Forest Law Enforcement, Governance and Trade (FLEGT)

The Voluntary Partnership Agreement on FLEGT marked the start of the commitment between Vietnam and the European Union to work together on addressing illegal logging and trade. This is conducted through the establishment and operation of the Vietnamese Legality Timber Assurance System (VNTLAS).

As the Chair of VNGO-FLEGT Network (since 2012) and a representative of CSOs in the UN-REDD Program Steering Committee in Vietnam, SRD has coordinated and implemented many activities to improve the capacity of CSOs to be able to actively participate in VPA/ FLEGT negotiation and implementation processes. Many activities have been implemented, such as; consultation with forest dependent communities; developing an impact monitoring framework affecting forest planting households, timber processing enterprises; forest governance monitoring forums; commenting on legal documents and programs on forestry (Forestry Law, VNTLAS Decree, Circular on traceability of forest products, National Program on REDD+, etc).

SRD, along with the VNGO - FLEGT network, has assured the continued support for small and micro sized timber processing enterprises to comply with VNTLAS regulations as well as to minimize the possibly negative effects of this agreement.

3.4. Communication, Research and Advocacy

SRD has been in partnership with government agencies, organizations and national networks to conduct research in the field relating to Climate Change adaptation and mitigation, forest governance, REDD+ and FLEGT, Climate Smart Agriculture (CSA).

The research is used to identify gaps in current policies, and to orient the development of the new policies. For instance, citing research for considerations in drafting National Adaptation Plan (NAP) 2021-2030 period, vision 2050; commenting on the draft decree regulating Vietnam Timber Legality Assurance System (VNTLAS). Additionally, SRD joined the research on "Nationally Determined Contributions (NDCs) and the Forestry Sector: Opinions and Recommendations of CSOs". The research evaluates the commitment of the forestry sector to contribute to NDC.

In addition to community-level research and advocacy, SRD conducts communication activities which, through the demonstration of positive impacts, aim to raise awareness and change behaviour among the people and local authorities regarding forest protection, FLEGT, REDD+, disaster risk reduction, climate change adaptation and Climate Smart Agriculture.

3.5. Other cross cutting themes

Gender: SRD is striving to become a gender-responsive organization across our internal organization, our community-level programs and our advocacy coalition towards gender equality. Our gender mainstreaming activities are aiming at ensuring that all women and men among SRD's staff and projects' targeted groups have equal opportunities to access to all resources, in order to develop their capacity and obtain equal benefits.

Child Protection: SRD's commitments to child protection are reflected in organization's operation and implementation of every single project. The organization has developed a robust child protection policy and mainstreamed into all SRD's activities and continually raise awareness and built capacity for staff on child protection issues.

People with Disabilities (PwDs): PwDs are often the most vulnerable group in society, facing difficulties in terms of economic development, social inclusion and job opportunities. SRD implements projects that support people with disabilities, focusing on building their own organizations, improving livelihoods, strengthening resilience as well as social inclusion, participating in making plans for disaster risk prevention and climate change adaptation. Simultaneously, SRD assures all the supporting programs include advocating and promoting the rights of PwDs, while providing access and promoting positive impacts to PwDs.

4. OUR VISION AND MISSION

Vision

Vulnerable communities have control over resources and ownership of their lives in a sustainable healthy environment and good governance society

Mission

SRD works with a range of stakeholders to achieve real change at both a policy and operational level.

The Plan of five-year strategy of SRD for the period 2018-2022 to be focused on:

- Organisational strengthening
- Diversification of revenue streams
- Impact and promotion of social entrepreneurship
- Lead and collaborate on environmental and social issues in Vietnam

Values

Ownership - Each individual should have ownership of their development; SRD respects personal self-determination as well as organisational autonomy.

Accountability/transparency - In each and every activity SRD ensures that a collaborative, professional and effective working environment is maintained. SRD is accountable and transparent to its partners, beneficiaries and donors.

Sharing and learning - Sharing and learning are prerequisites to development, SRD commits to enabling an open environment for sharing and learning, both within organisation and with stakeholders.

Results/impacts - Results are the ultimate indicators of an action's success. All actions and activities done by SRD and its staff aim to provide positive impacts to the life of disadvantaged communities.

Participation - Participation is the foundation for ensuring rights and sharing and responsibilities. SRD commits to facilitating meaningful participation of disadvantaged people in the decision-making process.

5. OUR ORGANIZATIONAL STRUCTURE

The original organizational structure was created at first with two units: Program, and Finance & Administration. This was reviewed in 2018 and adjusted to be in line with the 2018-2022 Strategic Plan, when three units were formed under programs including Sustainable Agriculture and Livelihoods Program, Forestry Program and Service Program. The Finance and Administration unit remained as one. Recently, SRD has continued to maintain the policy of employing experienced staff and currently has a total of 18 staff members, with senior staff possessing extensive experience working with VNGOs, INGOs and other internationally funded programs.

In the adjusted structure, leaders are committed to promoting staff ownership and providing suitable conditions for staff to develop and maximize their strengths. SRD believes that respecting staff ownership and creativeness will ensure the staff to attain the best performance, will help to promote staff commitment, contributing to staff retention and sustainable development of the organization.

Also, SRD recognizes great contributions from SRD's Board of Trustees for the organization development, especially into the new strategy planning process. The Board of Trustees comprise of six members, who have in depth professional and political expertise. All members of the Board of Trustees have many years of experiences working with international agencies and government institutions. More importantly, all the Board of Trustees members are committed to the development of the organization. With the depth of their knowledge in finance, gender, communications, climate change and organizational development, Board of Trustees are considered a valuable resource of SRD, contributing to its successful over the past year and development into future.

Along with local staff, SRD's international volunteers have had significant contributions towards SRD's development. In total, there have been more than 35 international volunteers from Australia, Canada, Sri Lanka, and the Philippines. These volunteers contributed significantly to SRD works on REDD/DRR, Communications, Human Resources, Advocacy, Sustainable Agriculture and Value Chains.

6. WHAT SETS US APART

SRD has a key coordination and networking role in climate change, disaster risk reduction, sustainable agricultural livelihood and VPA-FLEGT in Vietnam. SRD is an active member of different national, regional and international networks working on climate change and FLEGT issues, including its role as a founding member and chair of the VNGO&CC network; a broad climate change network with more than 130 VNGO members and VNGO&FLEGT.

Formalized mechanisms have been established between the Climate Change Working Group (CCWG) and VNGO&CC network (chaired by SRD) and the Department Climate Change under MONRE via the MoU. This has strengthened SRD's voice in the policy making process and facilitated policy implementation on climate change related programs at various levels.

SRD has gained a very strong reputation with the Vietnam Union of Science and Technology Agencies (VUSTA), which is the authorized body for providing policy feedback to the Central Government. This is a crucial strength for advocacy purposes. Also, SRD has been recognized and awarded with merit certificate by the Government of Vietnam and other regional networks such as ASEAN leadership award on rural development and poverty eradication.

SRD's program activities have a wide geographic coverage, ranging from the northern mountainous provinces to the central coastal regions and including regular engagement with climate change networks in the Mekong Delta region, with sustainable agriculture in the North and with FLEGT one also in Northern part and central highland.

7. WEBSITE

The SRD website provides a clear insight into our vision and values, and more importantly of our work and our countless stories of success. The website is a powerful tool in conveying who we are as an organisation and what we do for the vulnerable communities of Vietnam.
