FUNDING PROPOSAL TO THE GREEN CLIMATE FUND

**-IRES-CUBA-
INCREASED CLIMATE RESILIENCE OF RURAL HOUSEHOLDS
AND COMMUNITIES THROUGH THE REHABILITATION OF
PRODUCTIVE AGROFORESTRY LANDSCAPES IN SELECTED
LOCALITIES OF THE REPUBLIC OF CUBA**

ANNEX 16 Maps

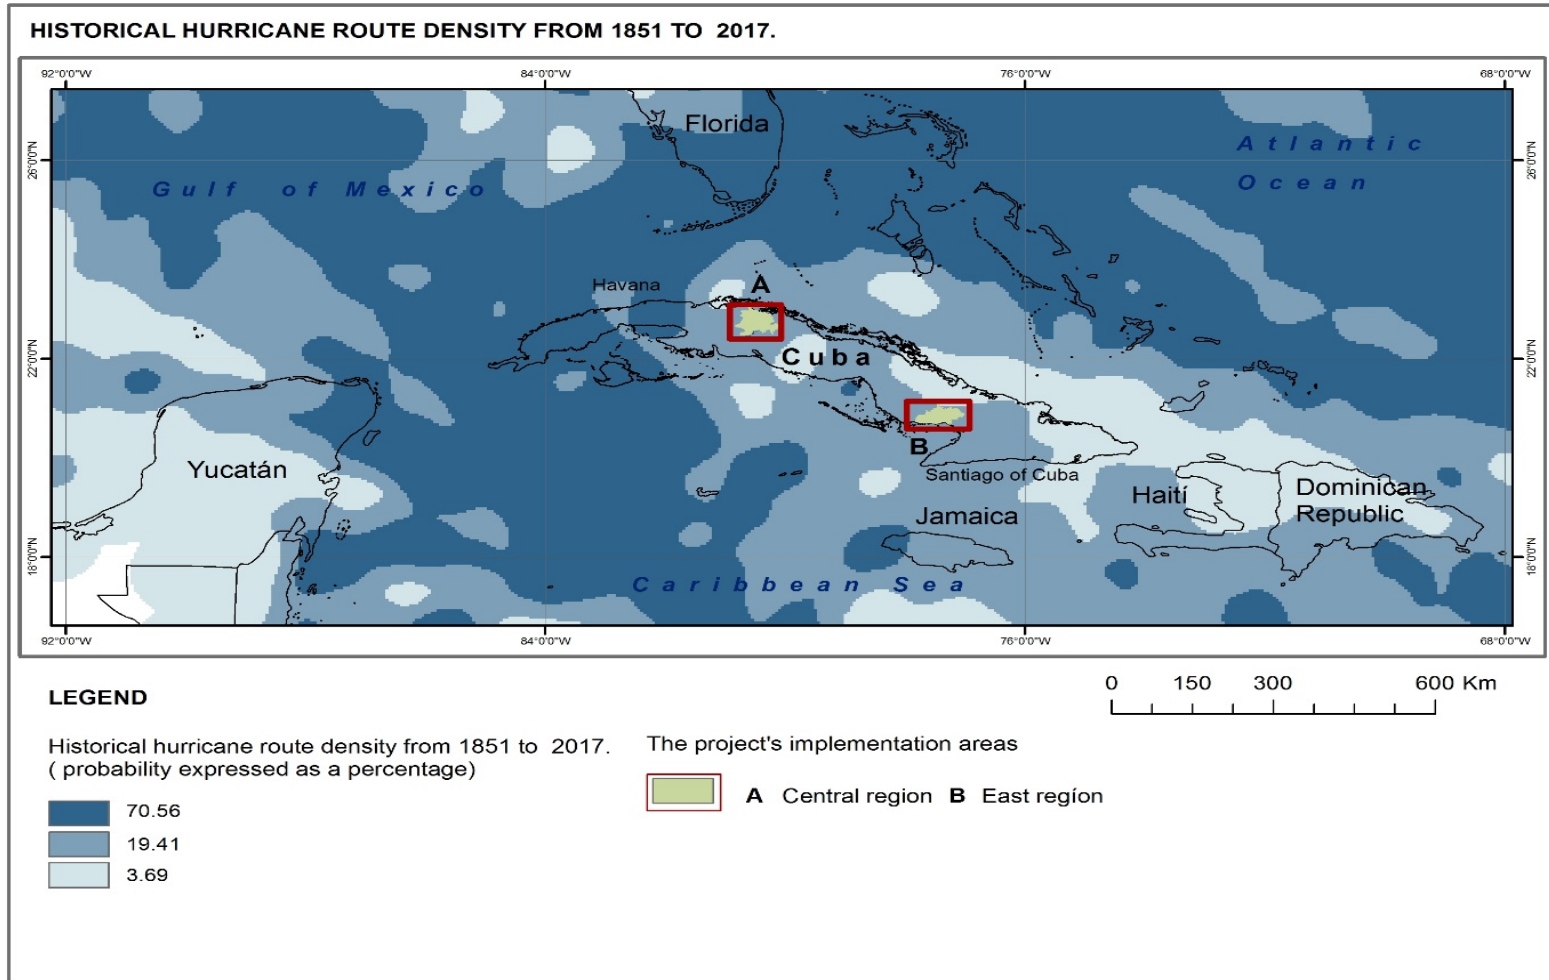

November 2019
Republic of Cuba

Contents

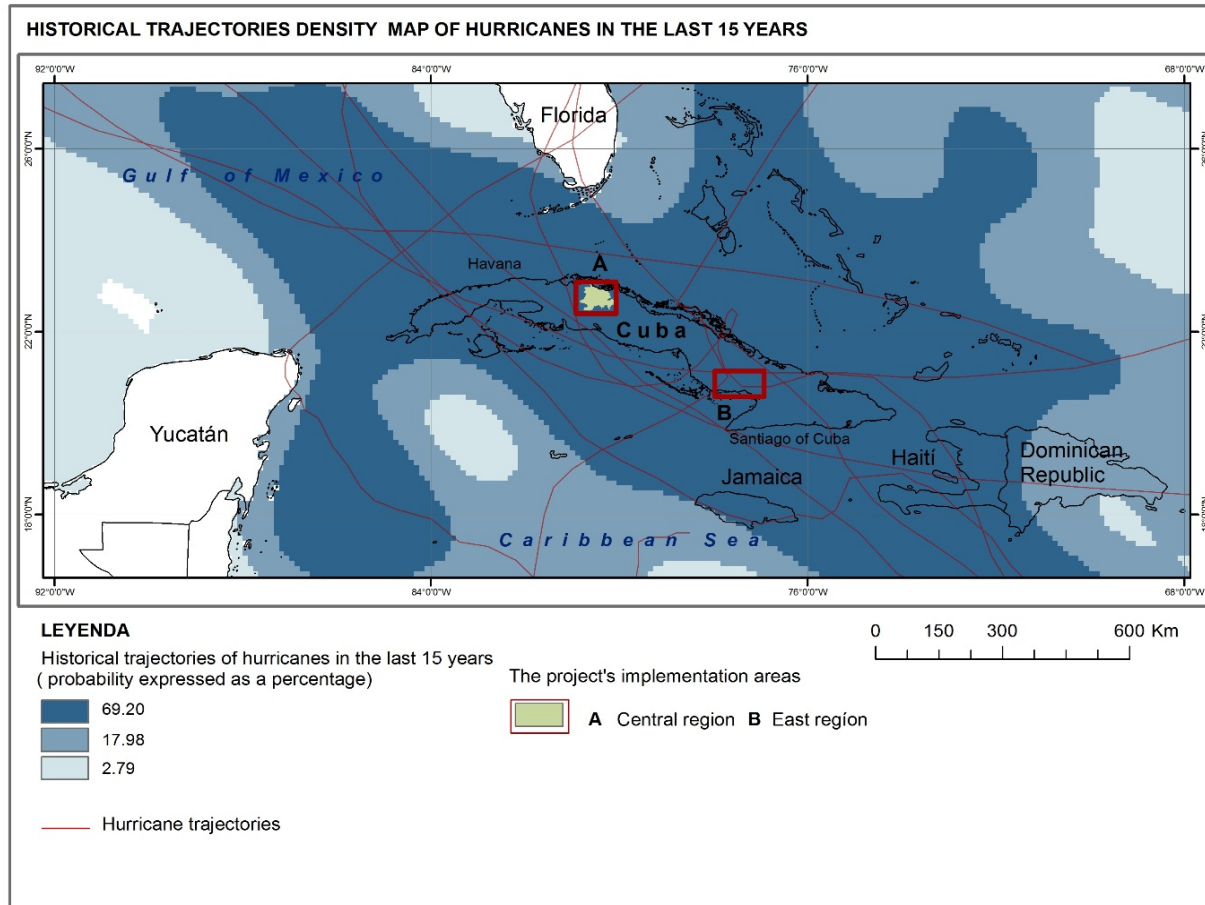

Map 1. Historical hurricane route density from 1851 to 2017	3
Map 2. Historical trajectories density map of hurricanes in the last 15 years	4
Map 3. Project Intervention Areas.....	5
Map 4. Topography in the Projects Implementation Areas.....	6
Map 5. Location of the Population Benefited by the actions of the Project	7
Map 6. Activities associated with the project (modules)	8
Map 7. Activities associated with the project (modules)	9
Map 8. Water Resources that will be used by the modules of the project (central region)	10
Map 9. Proposed water use of reservoirs (central region).....	11
Map 10. Water sources that will be used by the modules of the project (east region).....	12
Map 11. Proposed water use of reservoirs (east region)	13
Map 12. Cultivated area index by inhabitants in 2015 and urban and rural population over 60 years	Error! Bookmark not defined.
Map 13. Cultivated area index by inhabitants in 2015 and urban and rural population over 60 years (male and female)	Error! Bookmark not defined. 5
Map 14. Area covered by Marabú bushes in 2015 and population dynamics by place of residence in 2012-2015 in the AIP.....	16
Map 15. Area covered by Marabú between 2015 and 2019 and rate of migration balance of the population by localities 2012-2015.....	Error! Bookmark not defined.
Map 16. Marabú bush density and population variation by localities 2002-2015	Error! Bookmark not defined.
Map 17. Variation in the surface occupied by Marabú bushes in the AIP and migratory situation of the localities.....	19
Map 18. Expansion of the area occupied by Marabú bushes on lands declared idle or with natural pastures between 2012 and 2019	20
Map 19. Drought and its influence on the expansion of Marabú and the variation in the quantity of population in human settlements	21

Map 20. Situation of the water supply to the population residing in the localities of the AIP 22

Map 1. Historical hurricane route density from 1851 to 2017

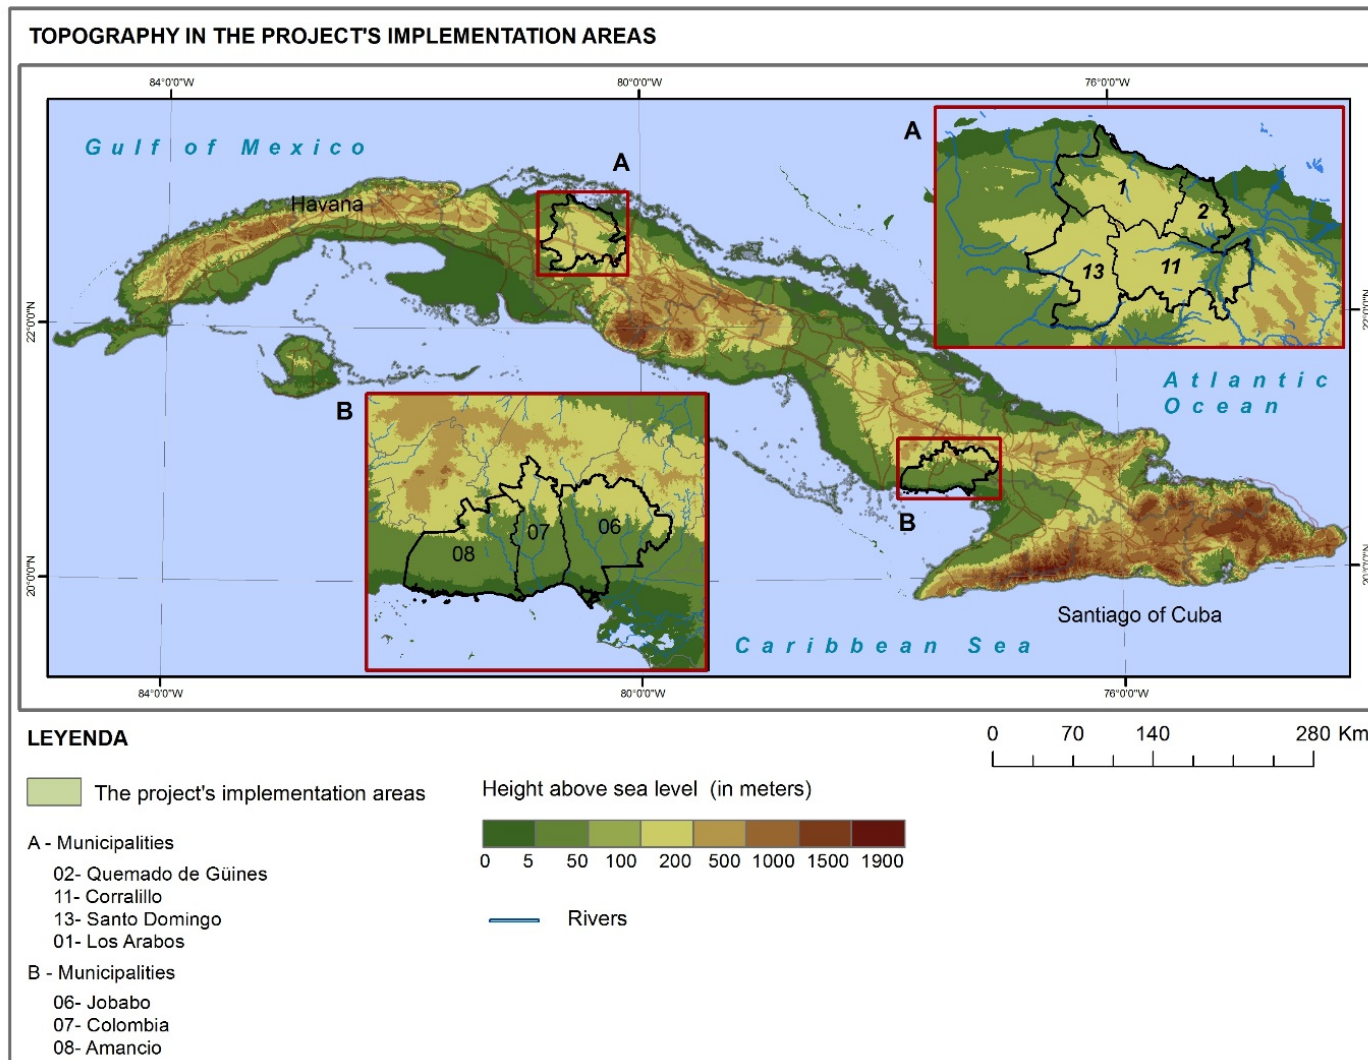

Map 2. Historical trajectories density map of hurricanes in the last 15 years

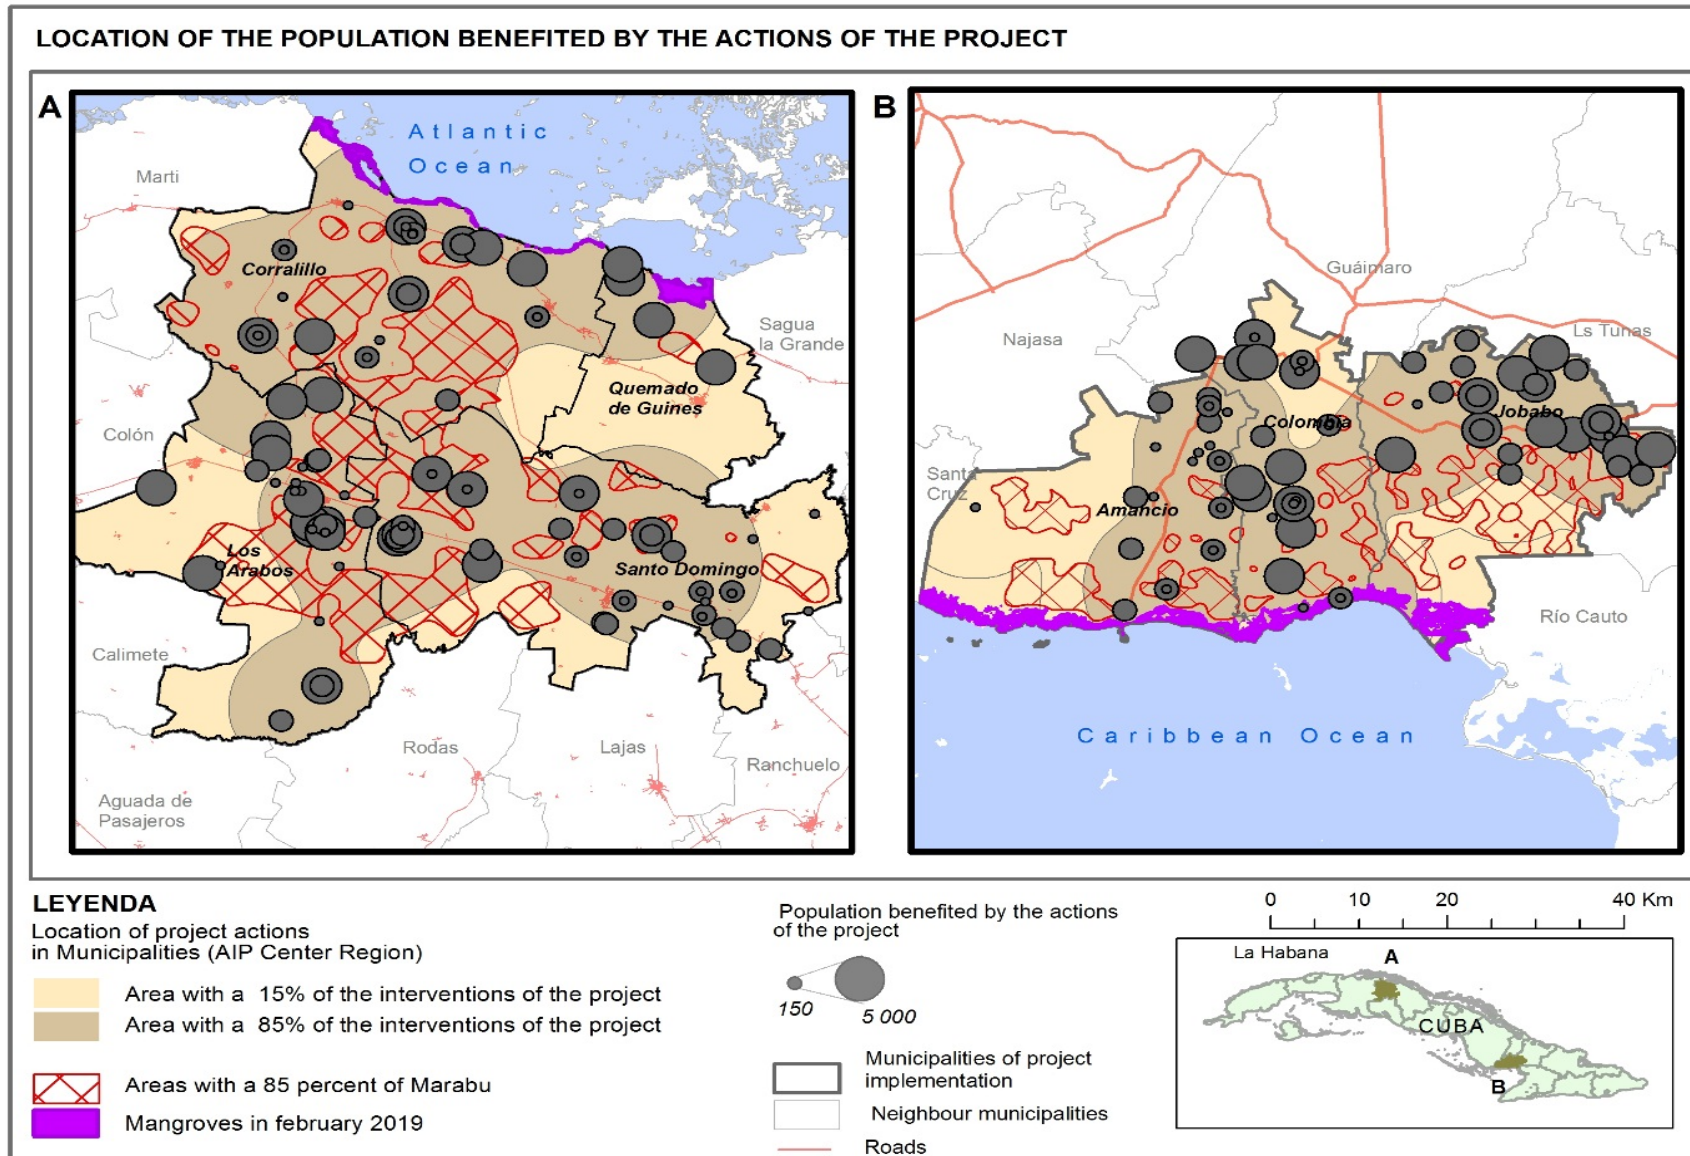

Map 3. Project Intervention Areas

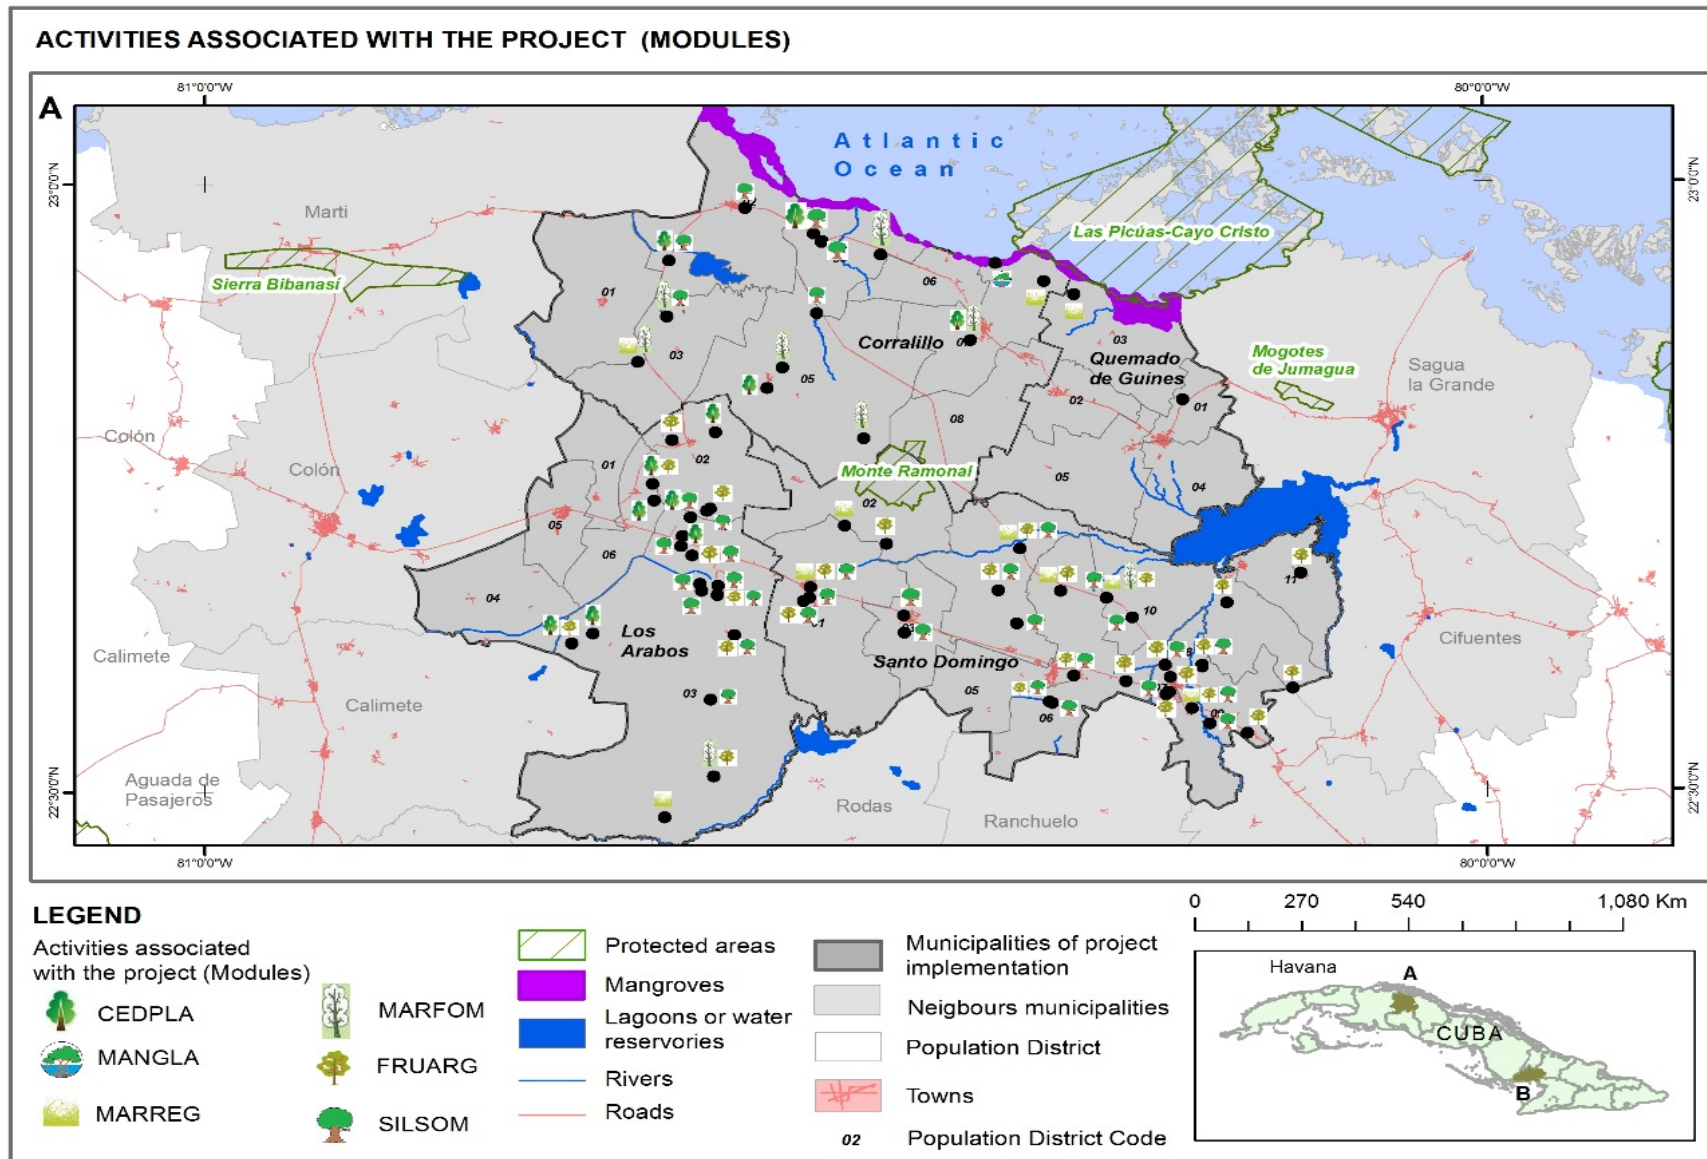

Map 4. Topography in the Projects Implementation Areas

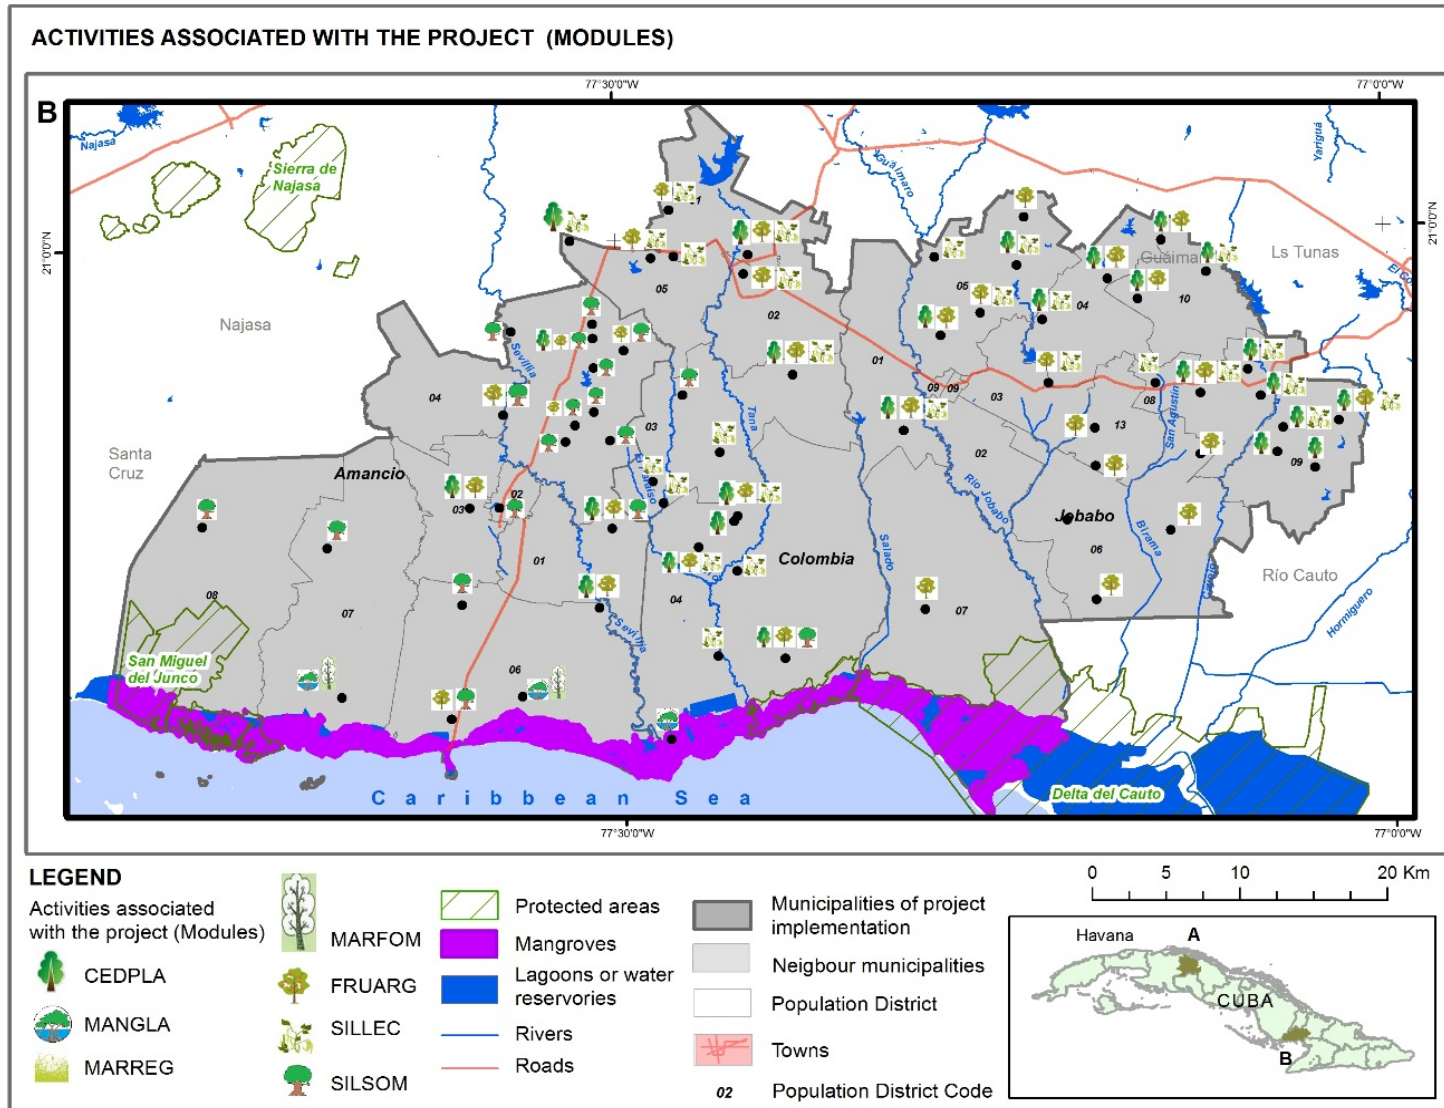

Map 5. Location of the Population Benefited by the actions of the Project

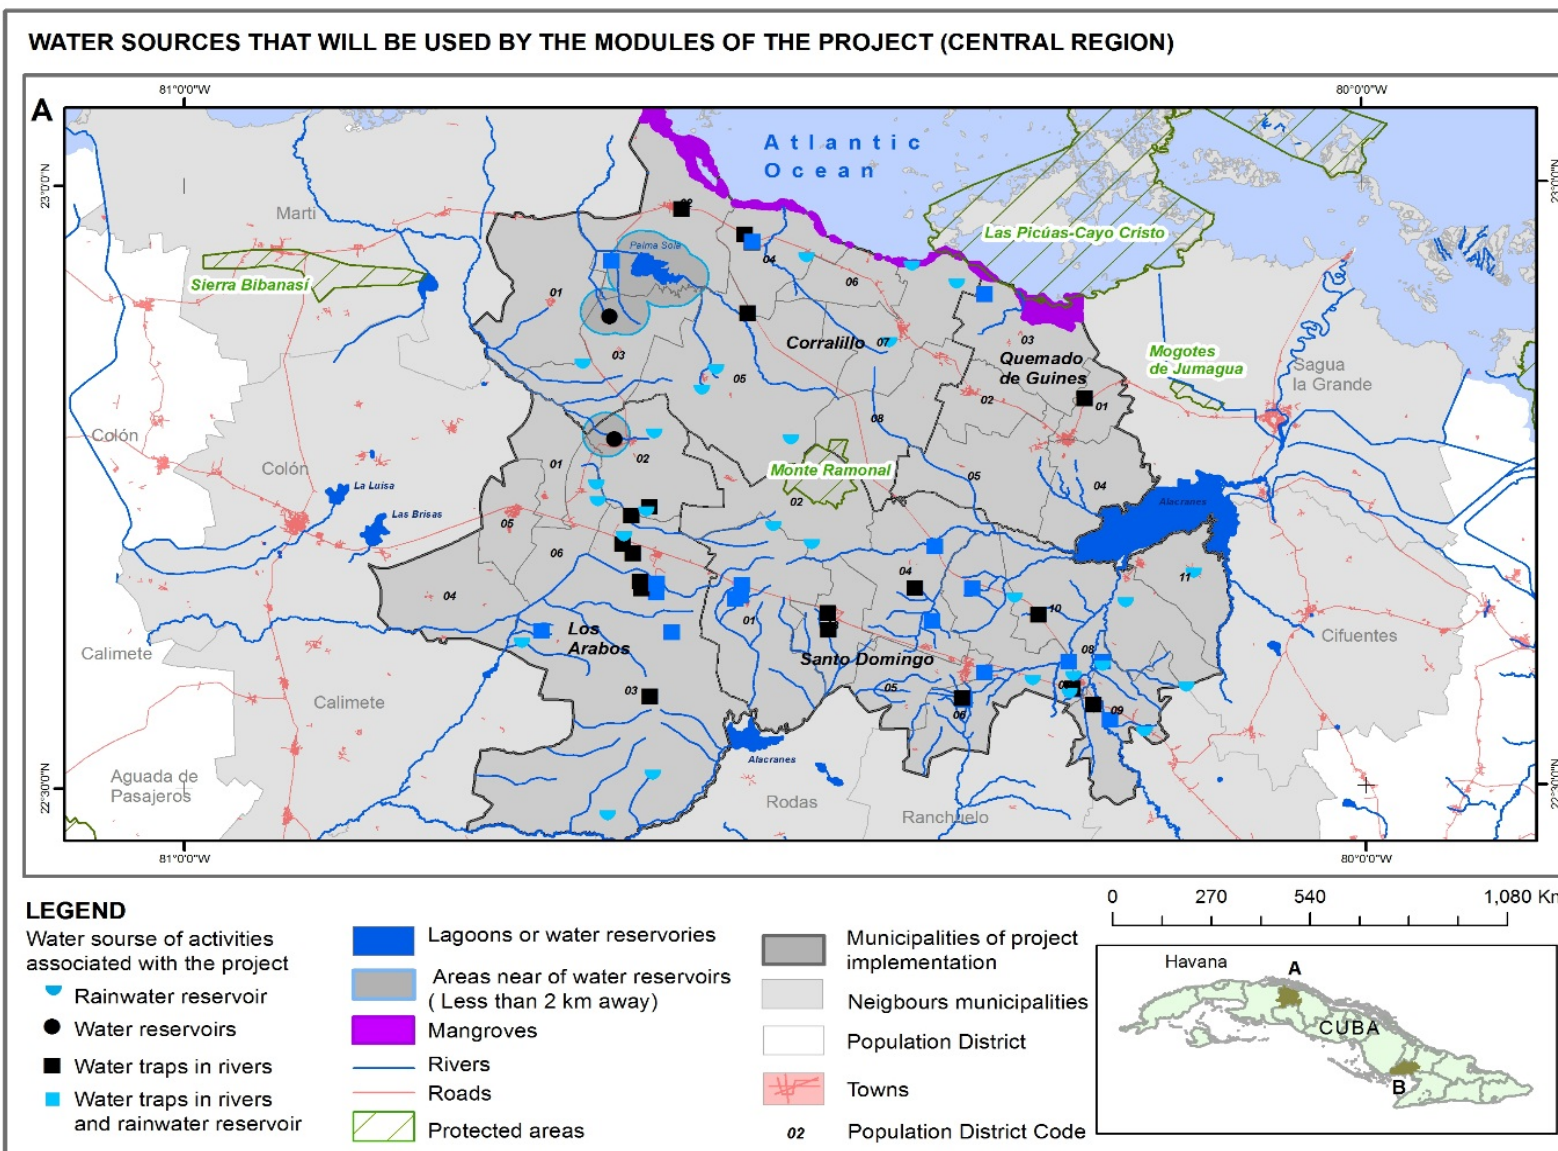

Map 6. Activities associated with the project (modules)

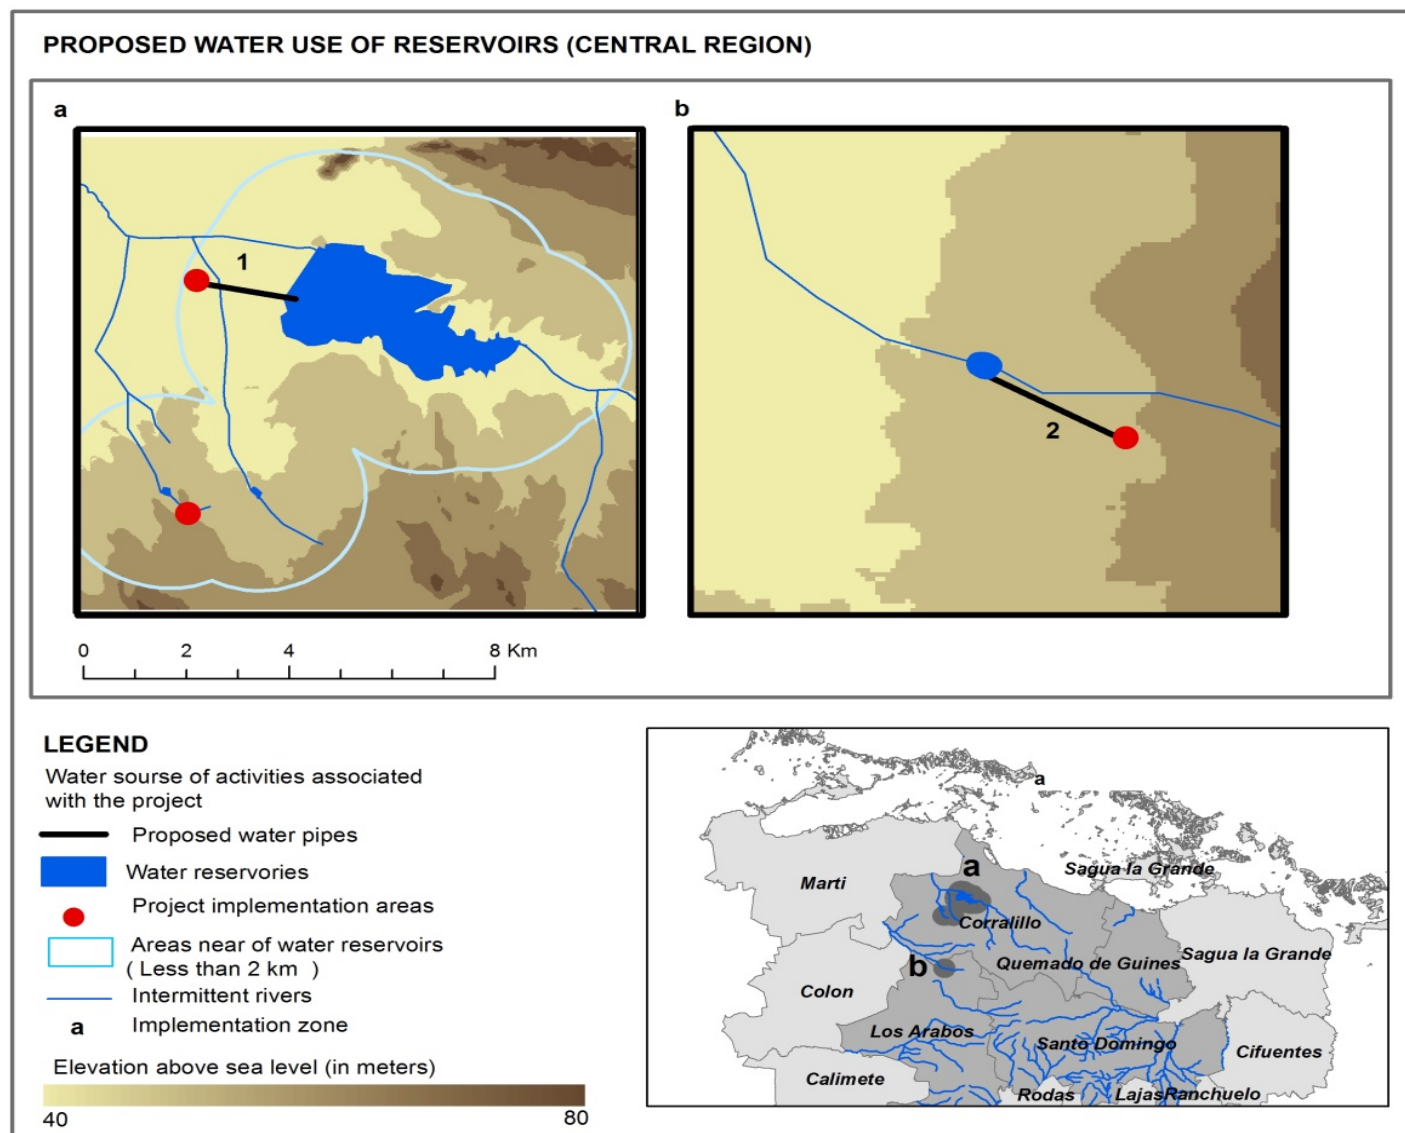

Map 7. Activities associated with the project (modules)

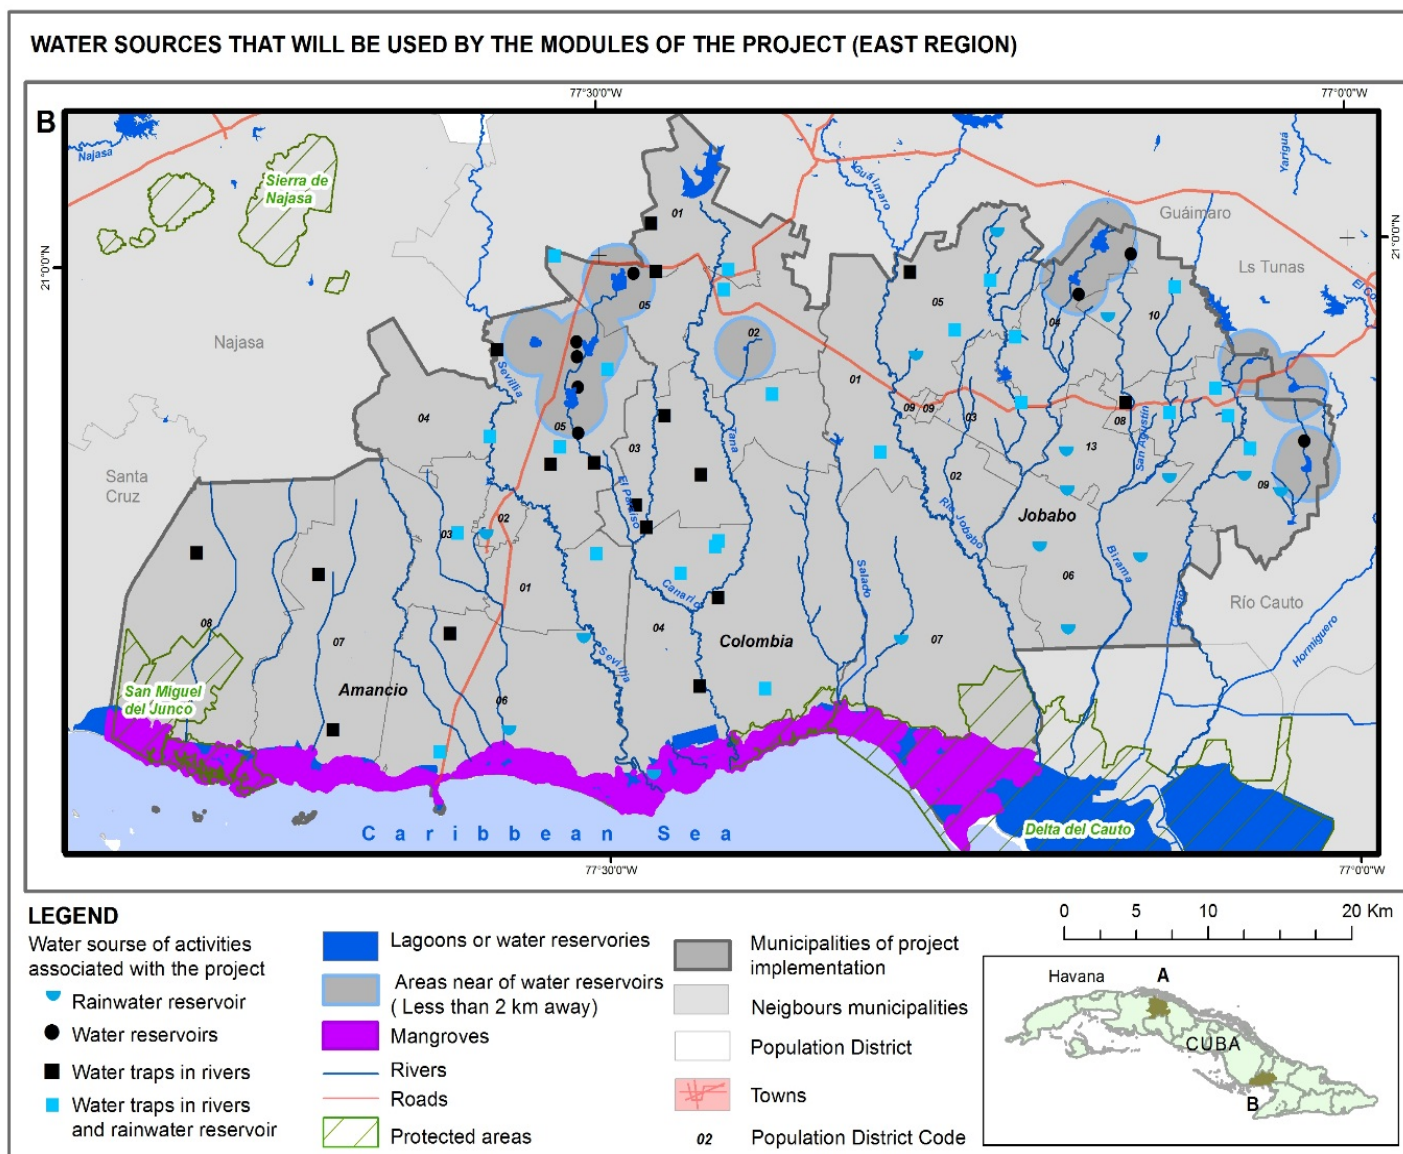

Map 8. Water Resources that will be used by the modules of the project (central region)

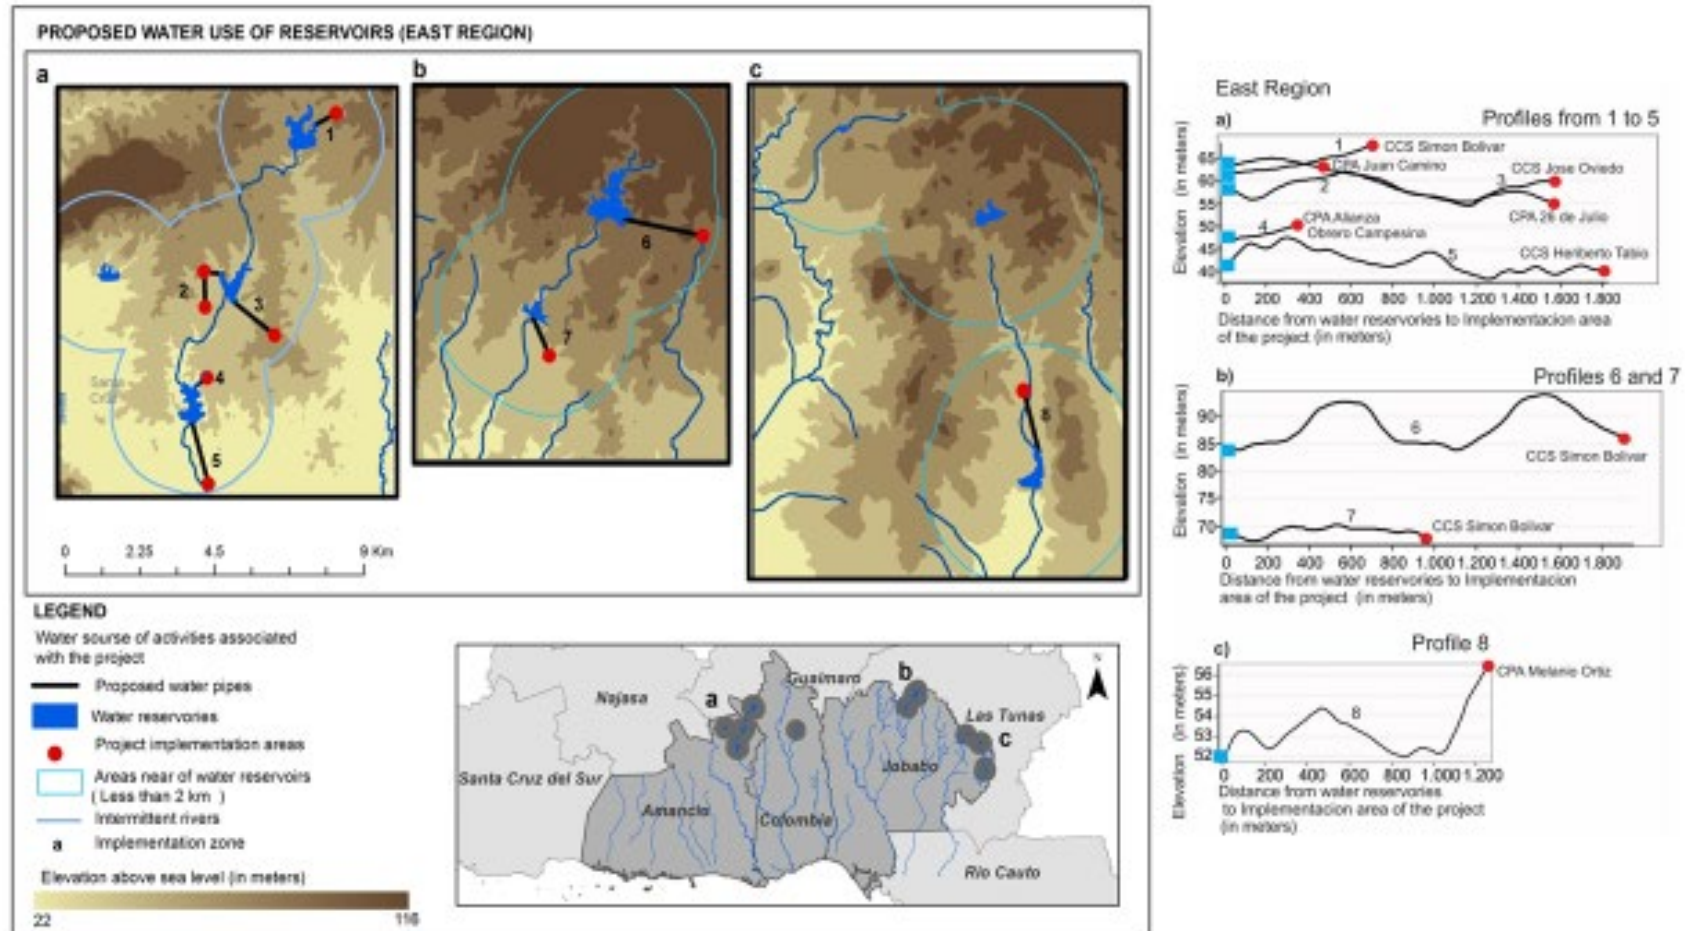

Map 9. Proposed water use of reservoirs (central region)

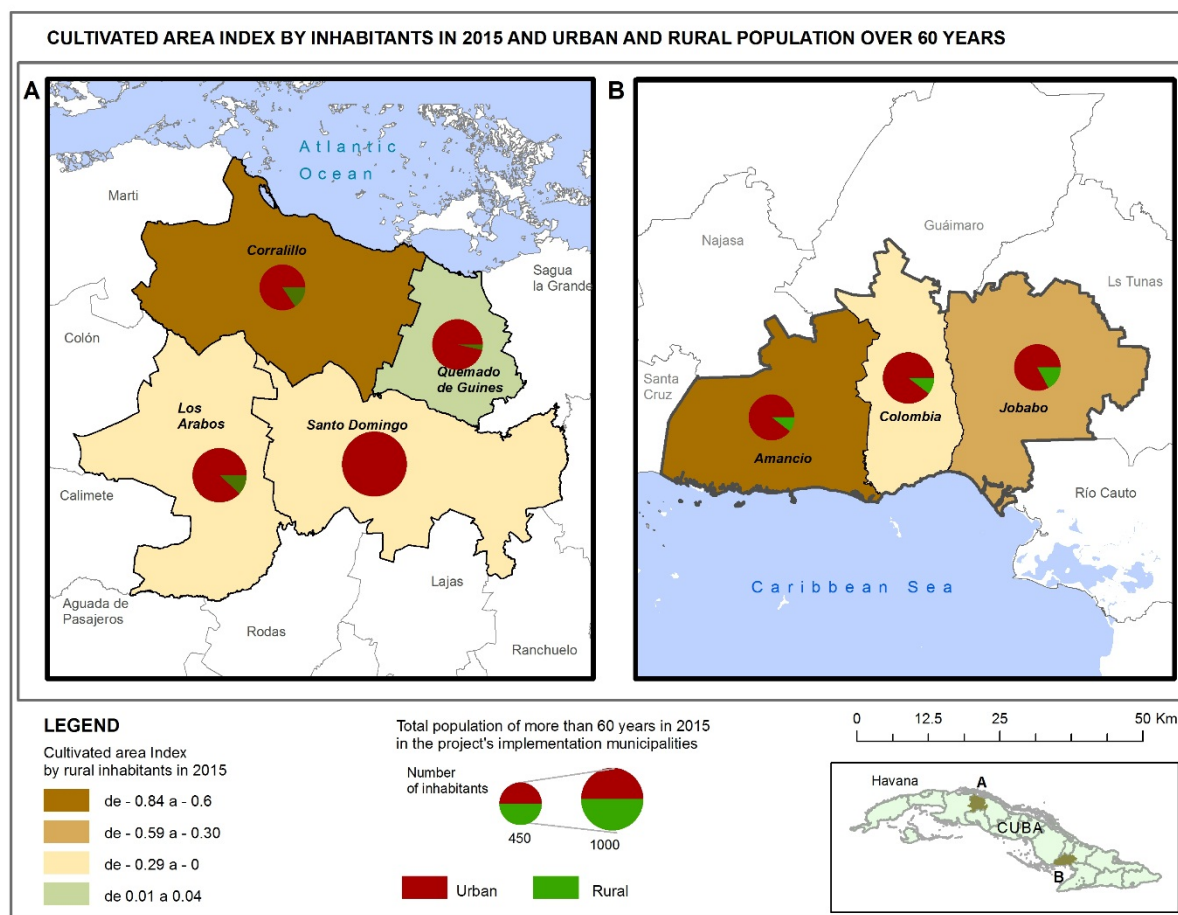

Map 10. Water sources that will be used by the modules of the project (east region)

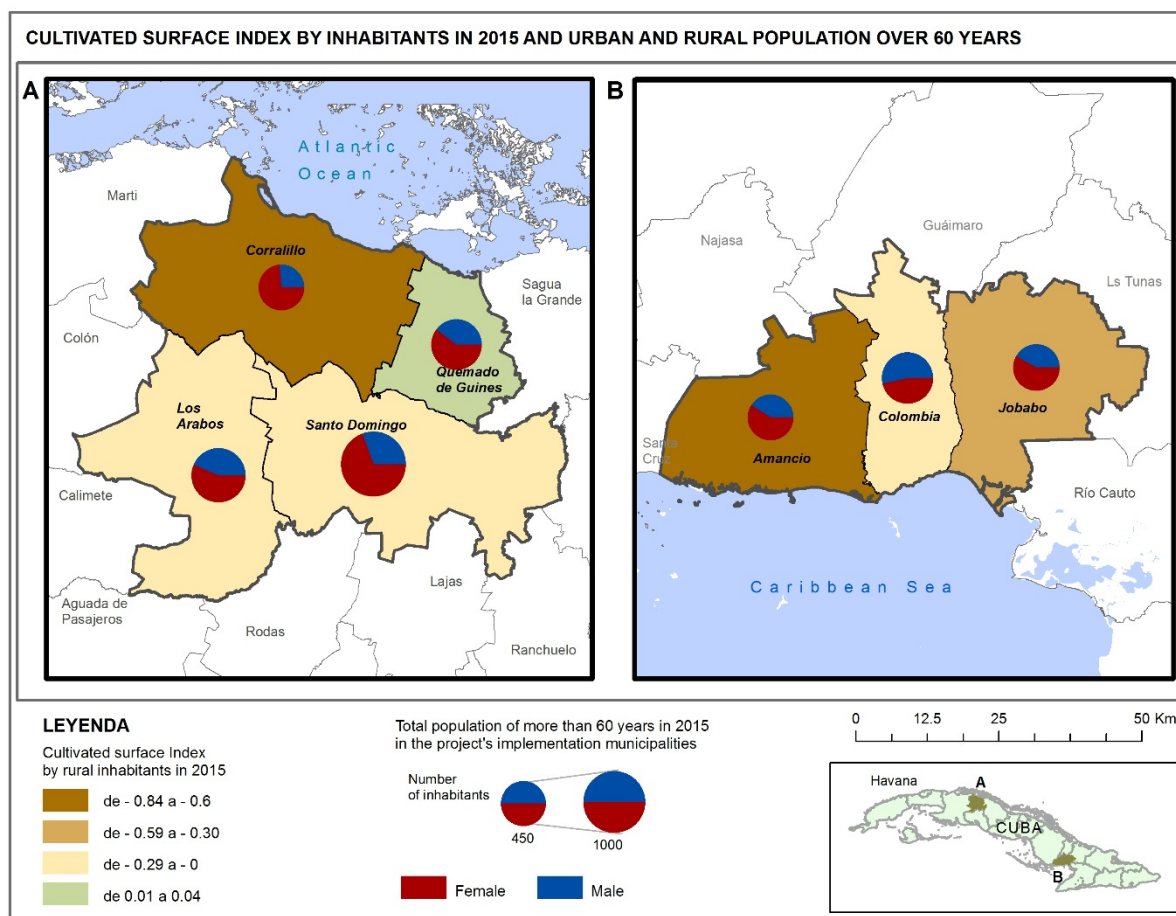

Map 11. Proposed water use of reservoirs (east region)

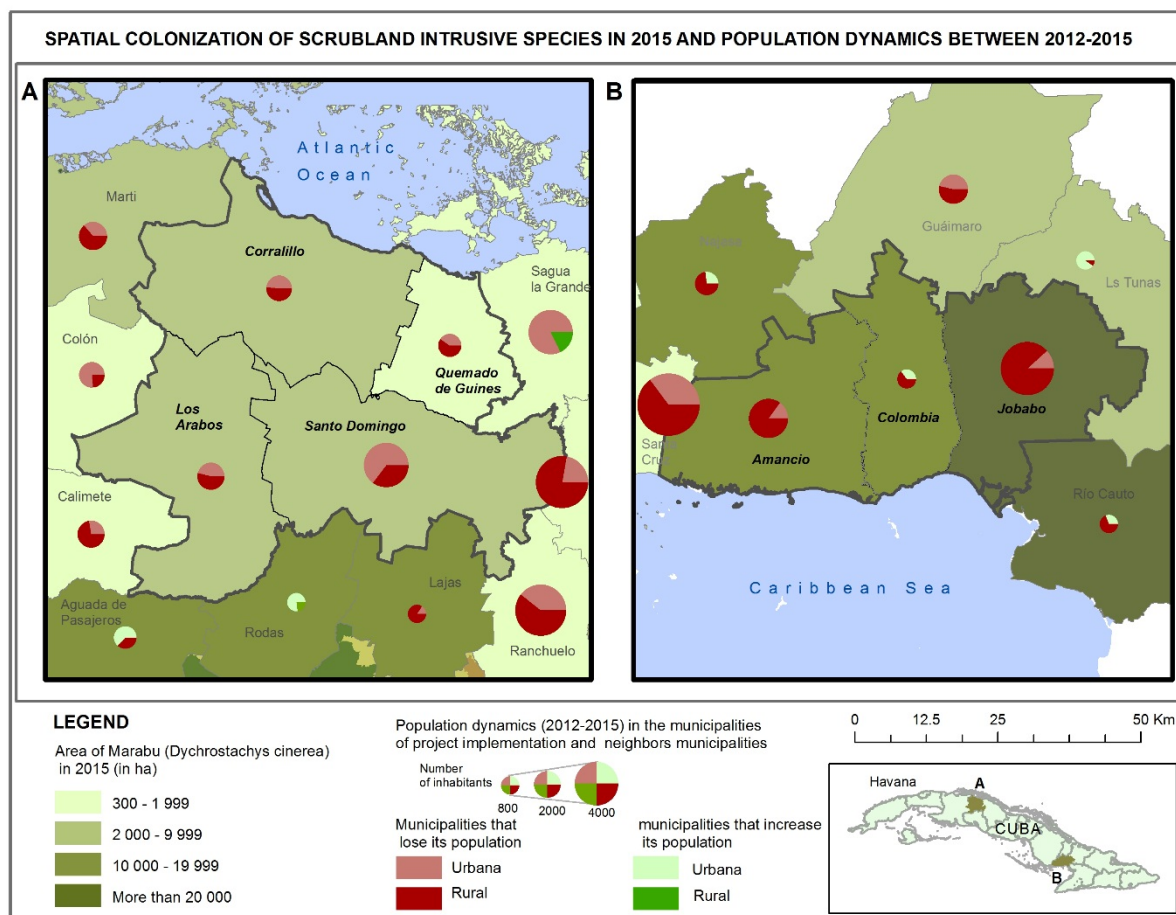

Map 12. Cultivated area index by inhabitants in 2015 and urban and rural population over 60 years

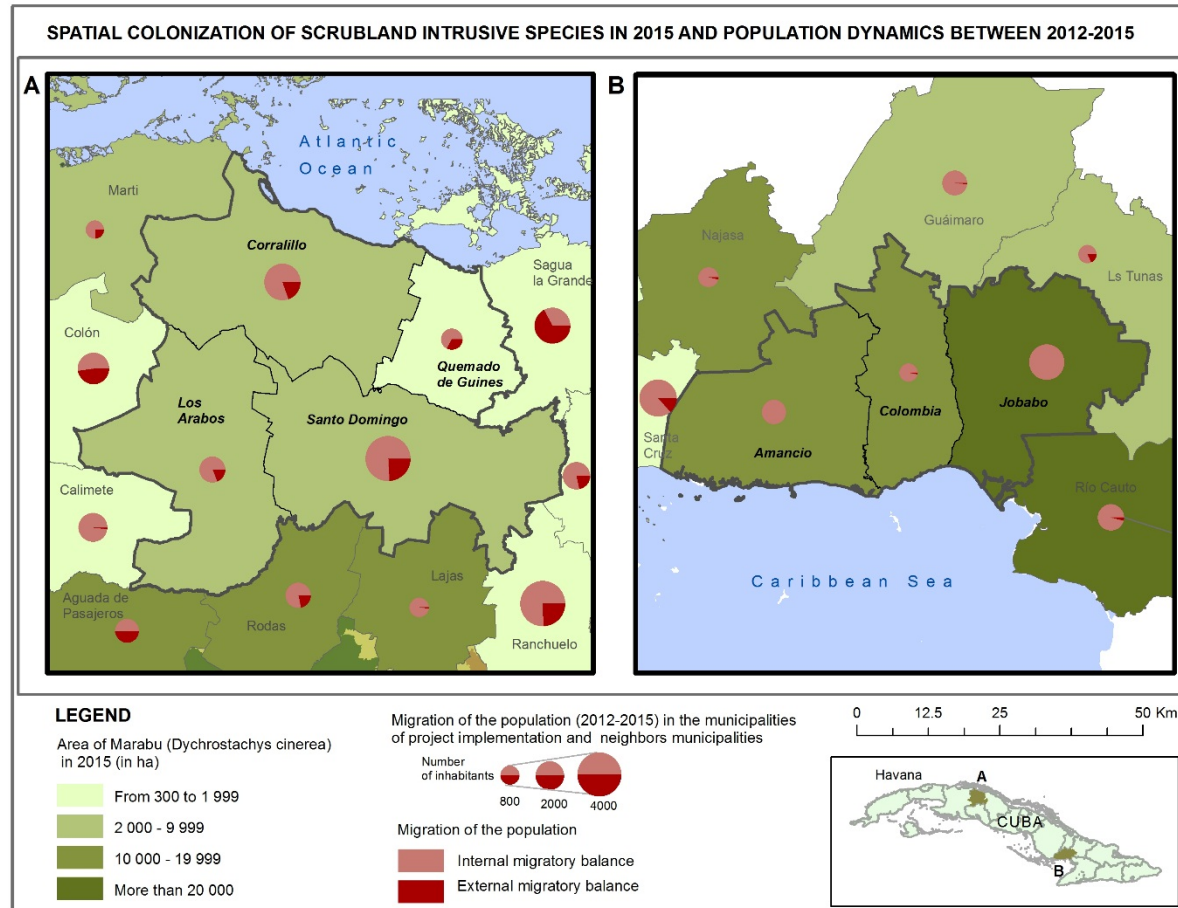

Map 13. Cultivated area index by inhabitants in 2015 and urban and rural population over 60 years (male and female)

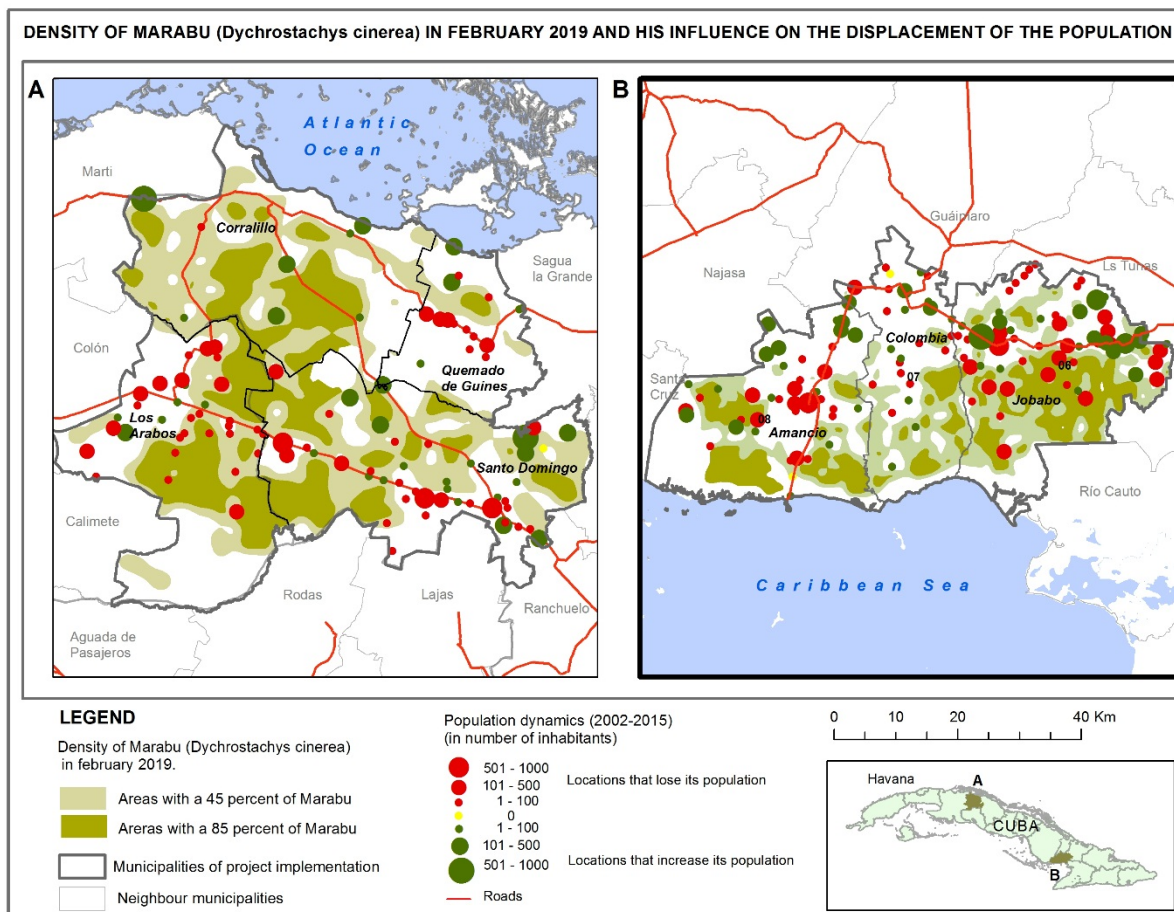

Map 14. Area covered by Marabú bushes in 2015 and population dynamics by place of residence in 2012-2015 in the AIP

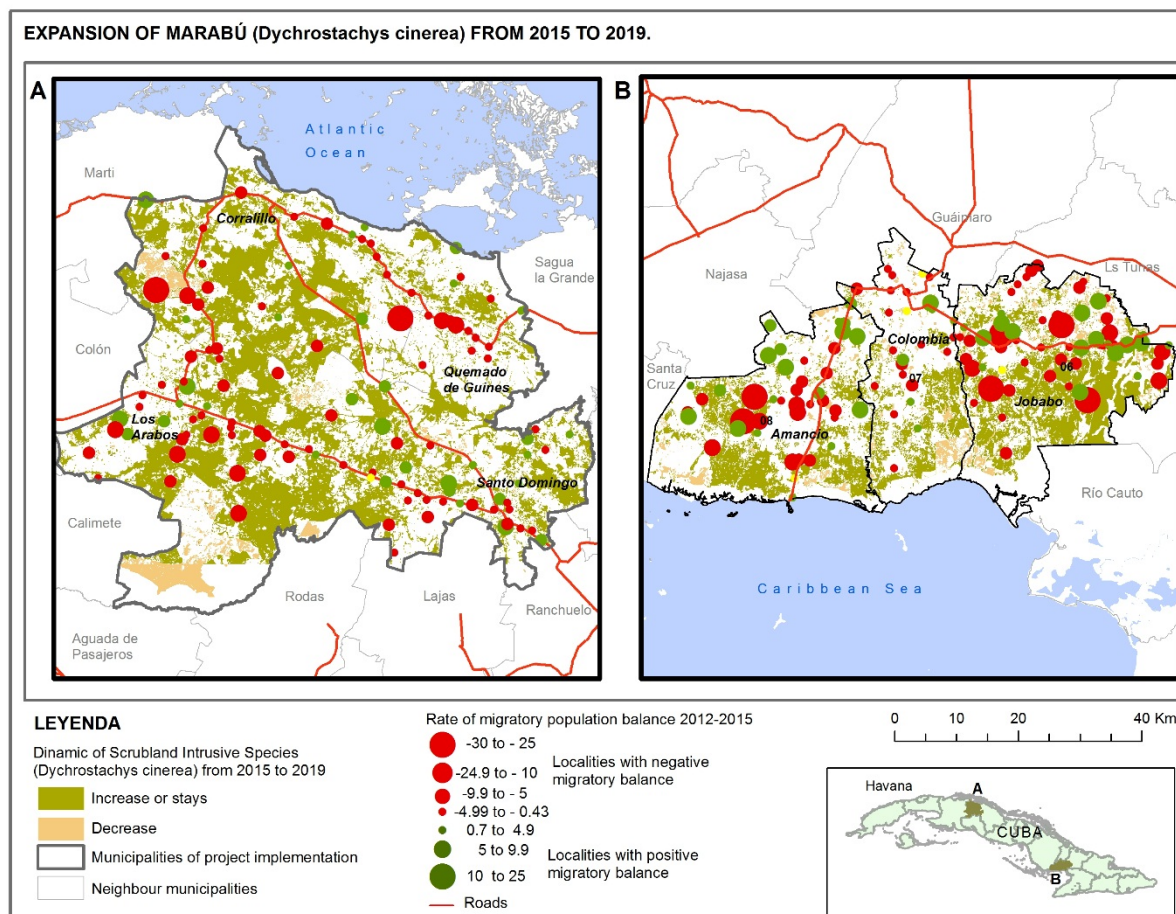

Map 15. Area covered by Marabú between 2015 and 2019 and rate of migration balance of the population by localities 2012-2015.

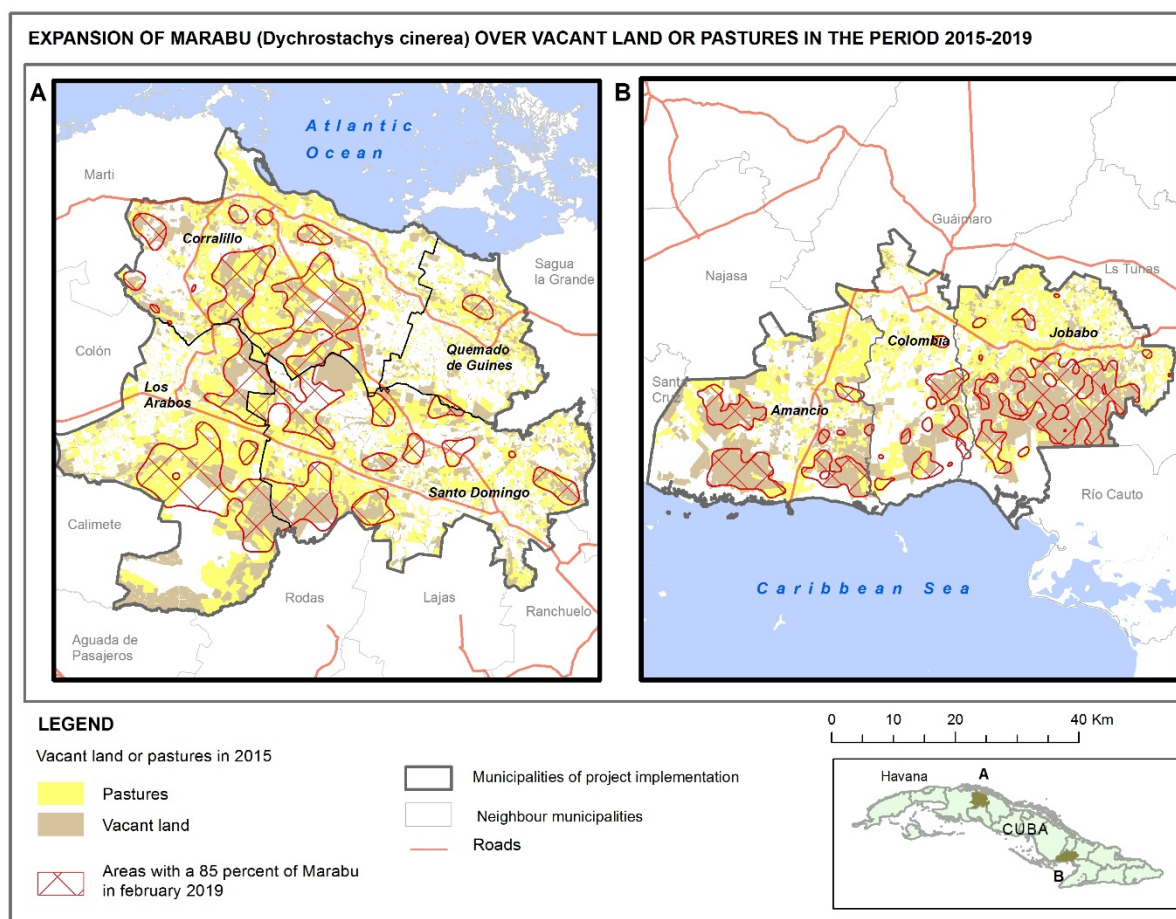

Map 16. Marabú bush density and population variation by localities 2002-2015.

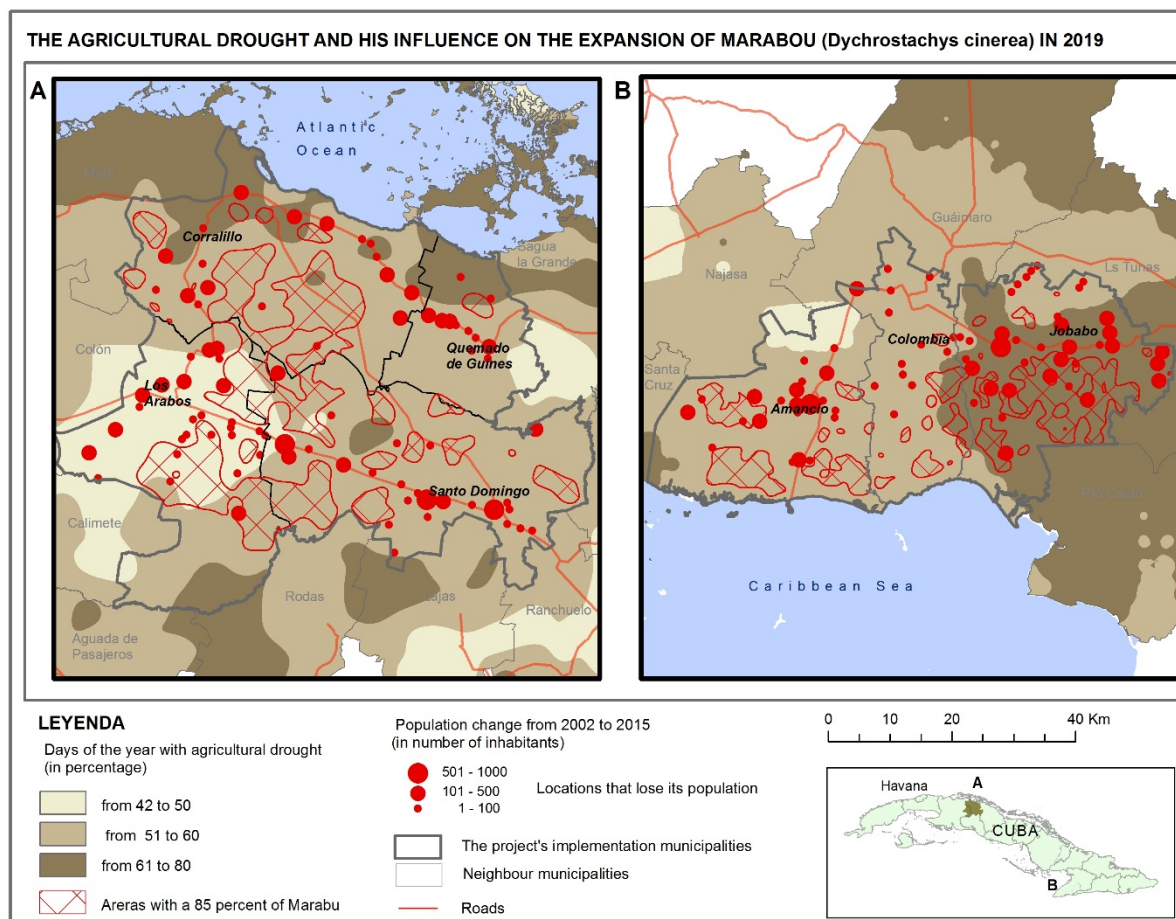

Map 17. Variation in the surface occupied by Marabú bushes in the AIP and migratory situation of the localities.

Map 18. Expansion of the area occupied by Marabú bushes on lands declared idle or with natural pastures between 2012 and 2019.

Map 19. Drought and its influence on the expansion of Marabú and the variation in the quantity of population in human settlements

Map 20. Situation of the water supply to the population residing in the localities of the AIP
