Songdo, South Korea

18th September 2020

Subject: Commitment to maintain and operate the Radar system & other EWS equipment post- project cycle

Dear Glemarec,

The Liberia Airport Authority expresses appreciation for your kind gesture in providing a radar system and other EWS equipment that are essential for safe operations, under the project titled "Enhancing Climate Information Systems for Resilient Development in Liberia". We understand that this proposal is submitted to the Green Climate Fund and believe that the project is key to acquiring & installing Radar System, Automatic Weather Stations one and other equipment including the Control Tower at the Robert International Airport.

We want to confirm our commitment to ensuring that operation and maintenance costs for the all equipment mentioned above, will be covered, at the end of the project funding.

This addresses the current financing gaps and we thank the Green Climate Fund for the assistance.

We look forward to a fruitful project.

Yours sincerely,

Paula Fares Harvey
Deputy Managing Director – Technical Services
Liberia Airport Authority
