Dear Sir,

Overview of professional turnover rate at Mauritius Meteorological Services

It is herewith affirmed that the Mauritius Meteorological Services is committed to assign the required staff to the programme "Building Regional Resilience through Strengthened Meteorological, Hydrological and Climate Services" in the Indian Ocean Commission (IOC) Member Countries for the Hydromet Project. The Organisation Chart of the Mauritius Meteorological Services is herewith annexed.

We also commit ourselves to ensure that the professionals who will be trained by the HYDROMET programme will not be relocated at the end of the project, unless they are called upon to assume additional responsibilities within the Mauritius Meteorological Services.

Yours faithfully

P. Goolaup
Director
