**Re:** Co-financing commitment to the GCF-funded project "Climate change adaptation solutions for Local Authorities in the Federated States of Micronesia"

Dear Executive Director Yannick Glemarec,

This letter serves to confirm the co-financing provided by the Government of the Federated States of Micronesia (FSM) to support the implementation of the Green Climate Fund (GCF) project "Climate change adaptation solutions for Local Authorities in the Federated States of Micronesia".

The objectives of the GCF project are well aligned with the goals of FSM's government in terms of ensuring access to climate finance to reduce the vulnerability of local communities to the impacts of climate change. In particular, FSM's National Designated Authority is supportive of the way in which the project will foster locally-owned and -led adaptation action. This is in line with the Vision encapsulated in FSM's Country Program submitted to GCF in September 2017, namely a vision of "safe and climate resilient communities prospering in a sustainable, low carbon economy".

Consequently, the Government of FSM is happy to confirm provision of in-kind co-financing towards the project management costs for the project to ensure its smooth and successful execution. This commitment includes office space and other facilities comprising a total of USD 39,000 over the project implementation period.

We look forward to the approval of this project and FSM's continued cooperation with GCF on taking action to address climate change.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Eugene Amor", is written over a horizontal line.

Eugene Amor
