Galapagos National Park is interested in taking part as an active institutional participant of the
“Climate Change: The New Evolutionary Challenge for the Galapagos” Program.

This State Institution believes the support provided by the Program is very much aligned with our institutional goals related with climate change and our aspirations to develop a resilient and low carbon territory and community.

We would be glad to provide additional information if required.

Yours sincerely,

Mgs. Danny Omar Rueda Córdova
Director of the Galapagos National Park
