Asunto: Climate Change: The New Evolutionary Challenge for the Galapagos

Patricia Bustamante
ejecutiva Principal
CORPORACIÓN ANDINA DE FOMENTO
En su Despacho

De mi consideración:

Adjunto encontrará nuestra carta de intención dirigida al Fondo Verde del Clima y a la Corporación Andina de Fomento, mediante la cual expresamos nuestro interés de participar en programas que promuevan el desarrollo productivo, acompañados de estrategias ambientales de mitigación y adaptación al cambio climático.

En complemento a lo indicado, dicha comunicación hace mención a los factores necesarios para que la Corporación Financiera Nacional B.P. pueda llevar adelante el "Programa Climate Charge: The New Evolutionary Challenge for Galápagos", los mismos que deberán ser sujetos de revisión, condicionando nuestro compromiso a que los mismos sean resueltos previamente.

Con sentimientos de distinguida consideración.

Atentamente,

Documento firmado electrónicamente

Mgs. Richard Manuel Ordóñez González
GERENTE GENERAL ENCARGADO

“Corporacion Financiera Nacional B.P.” as a development bank, is interested to promote this project in taking part as an active institutional participant of the **“Climate Change: The New Evolutionary Challenge for the Galapagos”** Programme because is aligned with our Institutional goals related with climate change and our aspirations to develop a green credit line.

“CFN B.P.” institutional action is framed within the guidelines of the National Government programs aimed at stabilizing and invigorating the economy, becoming a decisive agent for the achievement of the reforms undertaken.

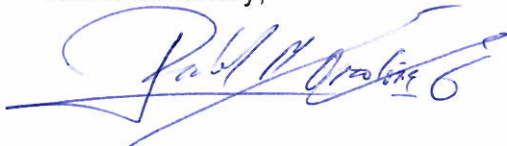

“CFN B.P.” during its institutional career, it has consolidated its credit activity, reiterating the commitment to continue serving the productive sector with special attention to micro and small businesses, additionally supporting them in training programs, technical assistance and the signing of inter-institutional agreements for the promotion of production, seeking to improve and highlight business management as a source of competitiveness in the medium and long term.

For “CFN B.P.” to make this decision come true, we will review the different conditions directly with the participating banks in second floor banks and according to the conditions and rules of the first-floor project, inter alia:

- The acceptance and commitment of the banks that have committed their participation in this program (Pacífico and Pichincha)
- The risk quotas available with the financial entities that pledged their participation in this program.
- The conditions of the product designed to cover this program.
- The environmental conditions that will apply to this program.

- The generation of demand in Galapagos.
- The operating cost that it represents for "CFN B.P." in granting first-floor credit operations because "CFN B.P." doesn't have offices in Galapagos.

Yours sincerely,

Mgs. Richard Ordoñez
CEO
Corporacion Financiera Nacional B.P.
