Dear Sir/Madam,

The Government Council of the Special Regime of Galápagos is interested in taking part as an active institutional participant of the “**Climate Change: The New Evolutionary Challenge for the Galapagos**” Program.

This governing body for the Province and Special Regime of Galápagos believes the support provided by the Program is fully aligned with our institutional goals related with climate change and our aspirations to develop a resilient and low carbon territory and community. Such objectives are detailed in the recently approved Galápagos Regional Development plan 2020-2030.

We would be glad to provide additional information if required.

Yours sincerely,

Dr. Norman Wray Reyes  
Ministro-Presidente  
Consejo de Gobierno del Régimen Especial de Galápagos
