

Annex 16: Maps of intervention area

07 September 2022

Maps of the intervention area:

These maps of Vanuatu is part of the Green Climate Fund (GCF) Funding Proposal package prepared by E Co. for The Pacific Community (SPC), as a background document for the Green Climate Fund (GCF) Funding Proposal titled: *Enhancing Adaptation and Community Resilience by Improving Water Security* in Vanuatu. This project will focus on delivering adaptation action for increased climate resilience of Vanuatu's water infrastructure and increased water security for communities. Annex 2 - Feasibility Study of the Funding Proposal package contains maps of weather stations and other climate phenomena developed as part of a Climate Modelling Study conducted during the design phase of the project. Additional and more detailed maps (such as indicating drought vulnerability) for each main island can be seen here: <https://mol.gov.vu/images/water/Maps/Drought-Severity-Index.pdf>. Locations where Drinking Water Safety and Security Plans - DWSSPs, prior to December 2019, are active and have been completed are available here: <https://exchange.riscon.solutions/drinking-water-safety-and-security-plans-information-graphics/>
