Subject: Letter of commitment/ co-financing letter

The United Nations Development Programme – Country office in Haiti would like to express its support to the project titled “Enhanced Climate Resilience in the Trois-Rivières region of Haiti through Integrated Flood Management” led by the United Nations Development Programme. We understand that this proposal is seeking funding from the Green Climate Fund and is aligned with the priorities of the recipient country

At this occasion, we would like to confirm our commitment to provide co-financing of 560,000 USD in form of grant in cash to be used for this project. The co-financing shall be used to support the project in Monitoring and Evaluation and in Project management cost (PMC) over a period of 7 years.

Sincerely,

Subject: Letter of Commitment/Co-financing Letter

Heifer Project International, through its branch office in Haiti ("Heifer Haiti"), would like to express its support for the project titled "Enhanced Climate Resilience in the Trois-Rivières region of Haiti through Integrated Flood Management" (the "Project"), led by the United Nations Development Programme (UNDP). We understand the proposal related to this Project (the "Proposal") seeks funding from the Green Climate Fund, and is aligned with the priorities of Heifer Haiti and of the Republic of Haiti.

This letter indicates Heifer's dedication and good will toward committing up to US \$8,303,355 in co-financing during the duration of the Project (the "Co-financing"). This amount would include the following components:

1. up to US \$1,484,603 in-kind through our current EU/GIRE-SECALM activities in the Moustique watershed;
2. up to US \$4,500,000 in cash, and
3. up to US \$2,318,752 as indirect costs (NICRA).

The Co-financing would be used to support the Project by improving the affected communities' resilience to flooding threats in the North-West region over a period of 7 years. The interventions reflected in the Proposal's Output 2 will focus on providing food security for poor households in the Trois-Rivières catchment, thereby improving food security and enhancing sustainability.

It is understood and agreed this letter will not become a binding obligation upon Heifer Haiti until a formal agreement has been negotiated and signed by the appropriate parties.

We are looking forward to further collaboration under this Project

Sincerely,

Pierre Ferrari
President and Chief Executive Officer

Pétion-Ville, April 24, 2023

Nick René Hartmann
Resident Representative
UNDP Haiti
15, Rue Pipo, Juvénat 7
Pétion-Ville, Haïti.

Dear Mr. Hartmann;

This is to confirm that Heifer International will provide co-financing in form of grant for the project titled **“Enhanced Climate Resilience in the Trois-Riviere Region of Haiti through Integrated Flood Management”**, as agreed in the letter of commitment dated June 10, 2021. This co-financing amount represents the cost for the development of the activities under output 2 as reflected in the budget.

Looking forward to further collaboration under this project.

Cordially,

Port-au-Prince, le

Mr. Yannick Glemarec
Executive Director
Green Climate Fund
Incheon City, Republic of Korea

Ref. Projet FVC « *Renforcement de la résilience climatique dans la région de Trois-Rivières en Haïti par la gestion intégrée des inondations* » (GCF Trois-Rivières)

Cher Monsieur Glemarec,

Le Ministère de l'Environnement vous présente ses compliments et confirme par la présente son soutien total au projet « Renforcement de la résilience climatique dans la région de Trois-Rivières en Haïti par la gestion intégrée des inondations », qui s'inscrit parfaitement dans la vision stratégique du gouvernement haïtien en matière de lutte contre le changement climatique.

Le projet « GCF Trois-Rivières » vise à accroître le développement durable résilient au climat, en améliorant la résilience du bassin versant des Trois-Rivières (TR) en Haïti face aux impacts des inondations induites par le changement climatique. Il le fera à travers 3 composantes à l'échelle nationale et locale, à savoir :

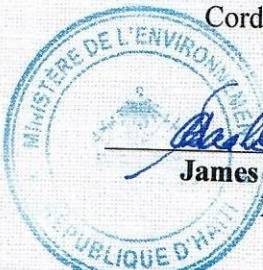

1. Amélioration de la gestion des inondations en fonction du climat dans le bassin versant de Trois-Rivières ;
2. Renforcement des capacités techniques et institutionnelles aux niveaux communal, intercommunal et départemental pour la mise en œuvre de pratiques agricoles productives et résilientes au climat et la gestion durable des terres ;
3. Renforcement de la gouvernance et des capacités pour une gestion intégrée des ressources en eau (GIRE) résiliente au climat.

Le Ministère de l'Environnement, pour assurer la durabilité du projet, confirme un "cofinancement en nature" estimé à 7,500,000 USD qui consistera principalement à :

- mobiliser les ressources humaines techniques du Ministère et à fournir des bureaux, des salles de réunion et de formation et
- supporter les coûts de gestion des infrastructures vertes mises en place durant le projet.

Cordialement,

James CADET
Ministre

MINISTÈRE DE L'ENVIRONNEMENT

Ref. GCF Project "Strengthening Climate Resilience in the Trois-Rivières Region of Haiti through Integrated Flood Management" (GCF Trois-Rivieres)

Dear Mr. Glemarec,

The Ministry of the Environment presents its compliments and confirms its full support to the project "Strengthening Climate Resilience in the Trois-Rivières Region of Haiti through Integrated Flood Management" (namely GCF Trois-Rivieres), which is perfectly in line with the Haitian government's strategic vision in the fight against climate change.

The project "GCF Trois-Rivières" aims to increase climate resilient sustainable development by improving the resilience of the Trois-Rivières (TR) watershed in Haiti to the impacts of climate change induced flooding. It will do so through 3 components at the national and local levels, namely:

1. Improving climate-sensitive flood management in the Trois-Rivières watershed.
2. Technical and institutional capacity building at the communal, inter-communal and departmental levels for the implementation of productive and climate resilient agricultural practices and sustainable land management.
3. Strengthening governance and capacity for climate-resilient integrated water resources management (IWRM).

The Ministry of Environment, to ensure the sustainability of the project, confirms an estimated "in-kind co-financing" of 7,500,000 USD which will mainly consist of:

- mobilizing the Ministry's technical human resources and providing offices, meeting and training rooms and
- supporting the maintenance cost of the green infrastructure setup by the project.

Sincerely,

James CADET
Minister
