**Letter of support to the UN Environment and UNHCR Green Climate Fund
proposal for the Kigoma Region of Tanzania**

Denmark will be supporting Danish Refugee Council (DRC) to implement the project *Improving access to alternative energy sources and promoting environmental conservation in refugee camps and host communities in Kigoma Region, Tanzania*. The project is envisaged to be implemented from March 2021 to December 2023. It will mainly focus on increasing access to alternative energy sources for cooking through bio-briquettes, increasing forest protection through establishment of tree nurseries, and capacity building on environment and forest management in refugee hosting areas through training.

As there are many complimentary elements in this planned engagement and the suggested engagement by UN Environment Programme and UNCHR under the proposed project *Building climate resilience in the landscapes of Kigoma region, Tanzania*, we would like to confirm that, if the proposal is successful, we would welcome dialogue on synergies and results. We would also welcome to contribute in kind support / parallel financing through coordination with the Danida funded project *Improving access to alternative energy sources and promoting environmental conservation in refugee camps and host communities in Kigoma Region, Tanzania*, implemented by DRC.

Yours sincerely,

Mette Bech Pilgaard
Head of Cooperation
