

Ecuador, October 29<sup>th</sup>, 2024

To: Inka Mattila, UNDP Resident Representative  
And The Green Climate Fund "GCF"

**Re: Co-financing commitment letter for EW4ALL in Ecuador**

Dear Madam/Sir,

I am writing to you to express our commitment to support Early Warning for All (EW4All) Proposal in Ecuador that was proposed to the Green Climate Fund (GCF).

This letter is issued to confirm the in-kind and loan contribution of National Secretariat of Risk Management of the Republic of Ecuador, in order to co-finance the project in the case the proposal was approved, with a total value of USD\$ 849,120 described as follows:

| Type of financial instrument | Year 1              | Year 2              | Year 3              | Year 4              | Year 5              | Total               |
|------------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| In-kind                      | \$57.027,02         | \$57.027,02         | \$57.027,02         | \$57.027,02         | \$57.027,02         | \$285.135,10        |
| Loan                         | \$112.797,00        | \$112.797,00        | \$112.797,00        | \$112.797,00        | \$112.797,00        | \$563.985,00        |
| <b>Total</b>                 | <b>\$169.824,02</b> | <b>\$169.824,02</b> | <b>\$169.824,02</b> | <b>\$169.824,02</b> | <b>\$169.824,02</b> | <b>\$849.120,10</b> |

This co-financing is related to the Inter-American Development Bank – IDB loan credit called: "Strengthening the National Early Warning System for Multiple Threats". This project is related to the following components:

- Strengthening threat monitoring and risk analysis capacity.
- Communicating early warning to communities and strengthening response capacity.

The in-kind contribution is related to national public officials from the National Secretariat of Risk Management, who will collaborate in the coordination, supervision and execution of the project activities. They will provide their contingent with 30% of their total time, for which the calculation is focused on a percentage of their monthly remuneration.

The loan contribution is to be considered as parallel co-financing to complement the project actions as part of national objectives to enhance Ecuador's early warning systems. The loan contribution has been calculated based on the planned activities to be carried out by this project per year.

Sincerely yours,

Jorge Carrillo Tutivén  
Minister of National Secretariat of Risk Management
