

# **Climate-resilient landscapes for sustainable livelihoods in northern Ghana**

ANNEX 7i. Stakeholder consultation images and attendance sheets

The 2024 mission included seven local community consultations across the Lawra, Jirapa districts in the Upper West region (**Error! Reference source not found.**) and the East Mamprusi and Yonyoo-Nasuan districts in the northern region (**Error! Reference source not found.**).

**Figure 1.** Map of the districts visited in the Upper West region during the 2024 mission.

#### (A) Northern Region

**Figure 2.** Map of the districts visited in the northern region during the 2024 mission.

The community consultations were led by the relevant District Agricultural Office representatives with questions provided by C4 EcoSolutions (C4ES). Each community-level consultation was guided by a series of questions in accordance with the following themes: i) gender and agriculture; ii) household income; iii) VSLAs; iv) climate information; v) training and capacity building; and vi) conflict resolution. The relevant discussion points of each community consultation are detailed in line with these themes. The approach for each consultation involved presenting three guiding questions, with follow-up points and additional questions facilitated as needed. Due to time constraints, not all questions were asked in every consultation. Below is a list of guiding questions asked:

- What are the gendered roles in farming?
- How is the household income distributed?

- Is there anything women are not allowed to do, in general or specific to farming?
- Who is responsible for the cultivation and selling of which crops?
- Are there any VSLAs in the community? If so, how many are there in total and how many are women-led?
- What are the main objectives of the VSLAs?
- What kind of training have men and women been involved in? Is there any training on agriculture that women feel they need more of?
- What are the particular challenges met by women in the community?
- Do community members receive climate information to prepare for the farming season? If so, where and how do they receive this information?
- Would better access to climate information be useful?
- How is conflict in the community resolved?
- What is the best method for including women in training sessions? Is there a specific time of the day, location or any other preferences to ensure inclusion?

## **2024 consultations**
