**THE GREEN CLIMATE FUND ("GCF")**

**CO-FINANCING FOR "CLIMATE-RESILIENT LANDSCAPES FOR SUSTAINABLE LIVELIHOODS IN NORTHERN GHANA"**

We are writing to express our commitment to support the project "Climate-Resilient Landscapes for Sustainable Livelihoods in Northern Ghana" in Ghana for which a funding proposal has been sent to the Green Climate Fund (GCF).

Ghana is one of the Countries seeking funding support from the Green Climate Fund to the tune of 70,120,774.00 United States Dollars (USD) via the United Nations Environment Programme (UNEP). We hereby communicate no-objection to the "Climate-Resilient Landscapes for Sustainable Livelihoods in Northern Ghana" as included in the funding proposal. The project will work to integrate gender equality and equity in ecosystem-based adaptation (EbA) planning and implementation processes within the broader sustainable development context. The Ministry of Food and Agriculture (MoFA) will play a key role in the implementation of outputs 2, 3, 4, and 5, of the project over the seven years of implementation.

In the light of the above, the MoFA would like to confirm estimates of in-kind co-financing budget of US\$2,848,714.00 to support the successful implementation of the project over the seven-year duration.

We believe that Ghana's "Climate-Resilient Landscapes for Sustainable Livelihoods in Northern Ghana" project will contribute to consolidate the gains made towards building the resilience of vulnerable communities to effectively participate in national efforts in response to the Paris Agreement.

We also look forward to partner with the executing entities for the successful implementation of the project.

**PAUL SIAMEH**

**AG. CHIEF DIRECTOR**

for: **MINISTER**

**CC: THE HON. MINISTER, MOFA**
