

Initial logic model for REDD+ results based payments

This document is as adopted by the Board and contained in annex X to decision B.08/08, paragraph (a).

**GREEN
CLIMATE
FUND**

Level		Results				
Elements of the Fund's initial mitigation logic model	Paradigm Shift	Shift to low-emission sustainable development pathways (forest cover and forest carbon loss is slowed, halted, and reversed)				
	Impacts (Fund level)	4.0 Reduced emissions from land use, deforestation, forest degradation, and sustainable management of forests and conservation and enhancement of forest carbon stocks ¹				
REDD+ results-based payments (for verified tCO₂e)						
		↑	↑	↑	↑	↑
Elements defined for REDD+ results-based payments	Programme outcomes (national or sub-national)	A. Reduced emissions (tCO ₂ eq) from deforestation	B. Reduced emissions (tCO ₂ eq) from forest degradation	C. Reduced emissions and increased removals (tCO ₂ eq) through the conservation of forest carbon stocks	D. Reduced emissions and increased removals (tCO ₂ eq) through the sustainable management of forests	E. Increased removals (tCO ₂ eq) through the enhancement of forest carbon stocks
	Programme outputs (national or sub-national) (as deemed appropriate by each country)	Reduced deforestation	Reduced forest degradation	Increased conservation of forest carbon stocks	Increased application of sustainable management methods	Forest carbon stocks enhanced

¹ As per 1/CP.16, REDD+ may be implemented nationally, or as an interim measure, on a subnational scale. This means that reduced emissions and increased removals from REDD+ are also to be measured, reported, verified and paid for at the national level, or as an interim measure, at the subnational level.
