## HEALTH, SAFETY AND SECURITY ASSESSMENT

GCF is informed by its health, safety, and security information provider that medical facilities in Tajikistan, including in Dushanbe, may have variable standards, with public hospitals often limited in resources and capacity. A number of private clinics provide more consistent care; however, overall medical capabilities remain limited compared to international standards.

If medical attention is required, participants are advised to seek care at designated private or internationally referenced facilities in Dushanbe, such as International Clinic Avicenna (Ibn Sina) or Prospekt Medical Clinic. For serious conditions, Istiqlol Hospital is considered the primary tertiary facility for emergency care. Foreign nationals should expect to pay for services upfront and ensure adequate health insurance coverage prior to travel.

Possible health risks include food- and water-borne illnesses, as well as seasonal air quality concerns due to dust and potential sandstorm conditions. Participants are advised to take basic precautions, including consuming safe food and bottled water, maintaining good hygiene, and following guidance related to air quality conditions.

Participants with pre-existing medical conditions or sensitivities should consult their medical practitioner prior to travel and ensure they carry any required medication. Availability of certain medications may be limited locally.

## GENERAL INFORMATION

***GCF is moving to eliminate the use of disposable plastic water bottles at Board meetings. We encourage all participants to bring their own reusable bottles.***
