Re: Co-financing commitment letter for Building the resilience of Togo's national health system and vulnerable communities to climate-sensitive outcomes in Togo

Dear Madam/Sir,

I am writing to you to express our commitment to support "Building the resilience of Togo's national health system and vulnerable communities to climate-sensitive health outcomes" project in Togo that was proposed to the Green Climate Fund (GCF) for funding.

The National Meteorological Agency (ANAMET) is a key implementing institution for Component 1. ANAMET will lead the establishment and equipping of a decentralised maintenance unit for the hydrometeorological sector and will develop and operationalise a digital maintenance protocol to ensure systematic equipment monitoring. In addition, ANAMET will coordinate capacity development on the production and dissemination of climate and health bulletins, in close collaboration with the Ministry of Health (MSHPCSUA).

This is to confirm the in-kind contribution of ANAMET to co-finance the project "Building the resilience of Togo's national health system and vulnerable communities to climate-sensitive health outcomes", should the proposal be approved, with a total value of 140.000 EUR.

The in-kind contributions consist of time provided by technical and support staff of ANAMET, as well as the provision of small equipment and the coverage of travel, meeting and event-related costs.

Sincerely yours,

Dr. Latifou ISSAOU

Director General
Permanent Representative with WMO
