

Mongolia Country Platform

from fragmented pipelines to a coordinated, investment-ready climate finance ecosystem

Focus of Mongolia Country Platform:

- Align NDC 3.0, NAP, Vision 2050 and climate finance priorities through a common investment framework.
- Develop a prioritized climate investment pipeline linked to financing opportunities.
- Mobilize public, private, multilateral and climate fund resources.

Core Functions:

- Stakeholder coordination and governance;
- Climate investment pipeline development;
- Climate finance tracking, reporting, mobilization and fundraising;
- MRV strengthening; National GHG inventory improvements;
- Carbon Registry development; Support for carbon market readiness and Article 6 implementation.

Institutional Structure:

- **MECC/NDA:** Strategic leadership and Platform Secretariat.
- **Country Platform Steering Committee:** Strategic guidance and investment decisions.
- **Technical Working Groups:** Sector planning, project development and technical review.
- **PMU:** Day-to-day coordination
- **CCRCC:** Technical support to coordination mechanisms and working groups
- **Private sector, development partners, academia, civil society and subnational governments:** Investment pipeline development and resource mobilization
