GCF REGIONAL DIALOGUE

with EAST AND SOUTH ASIA

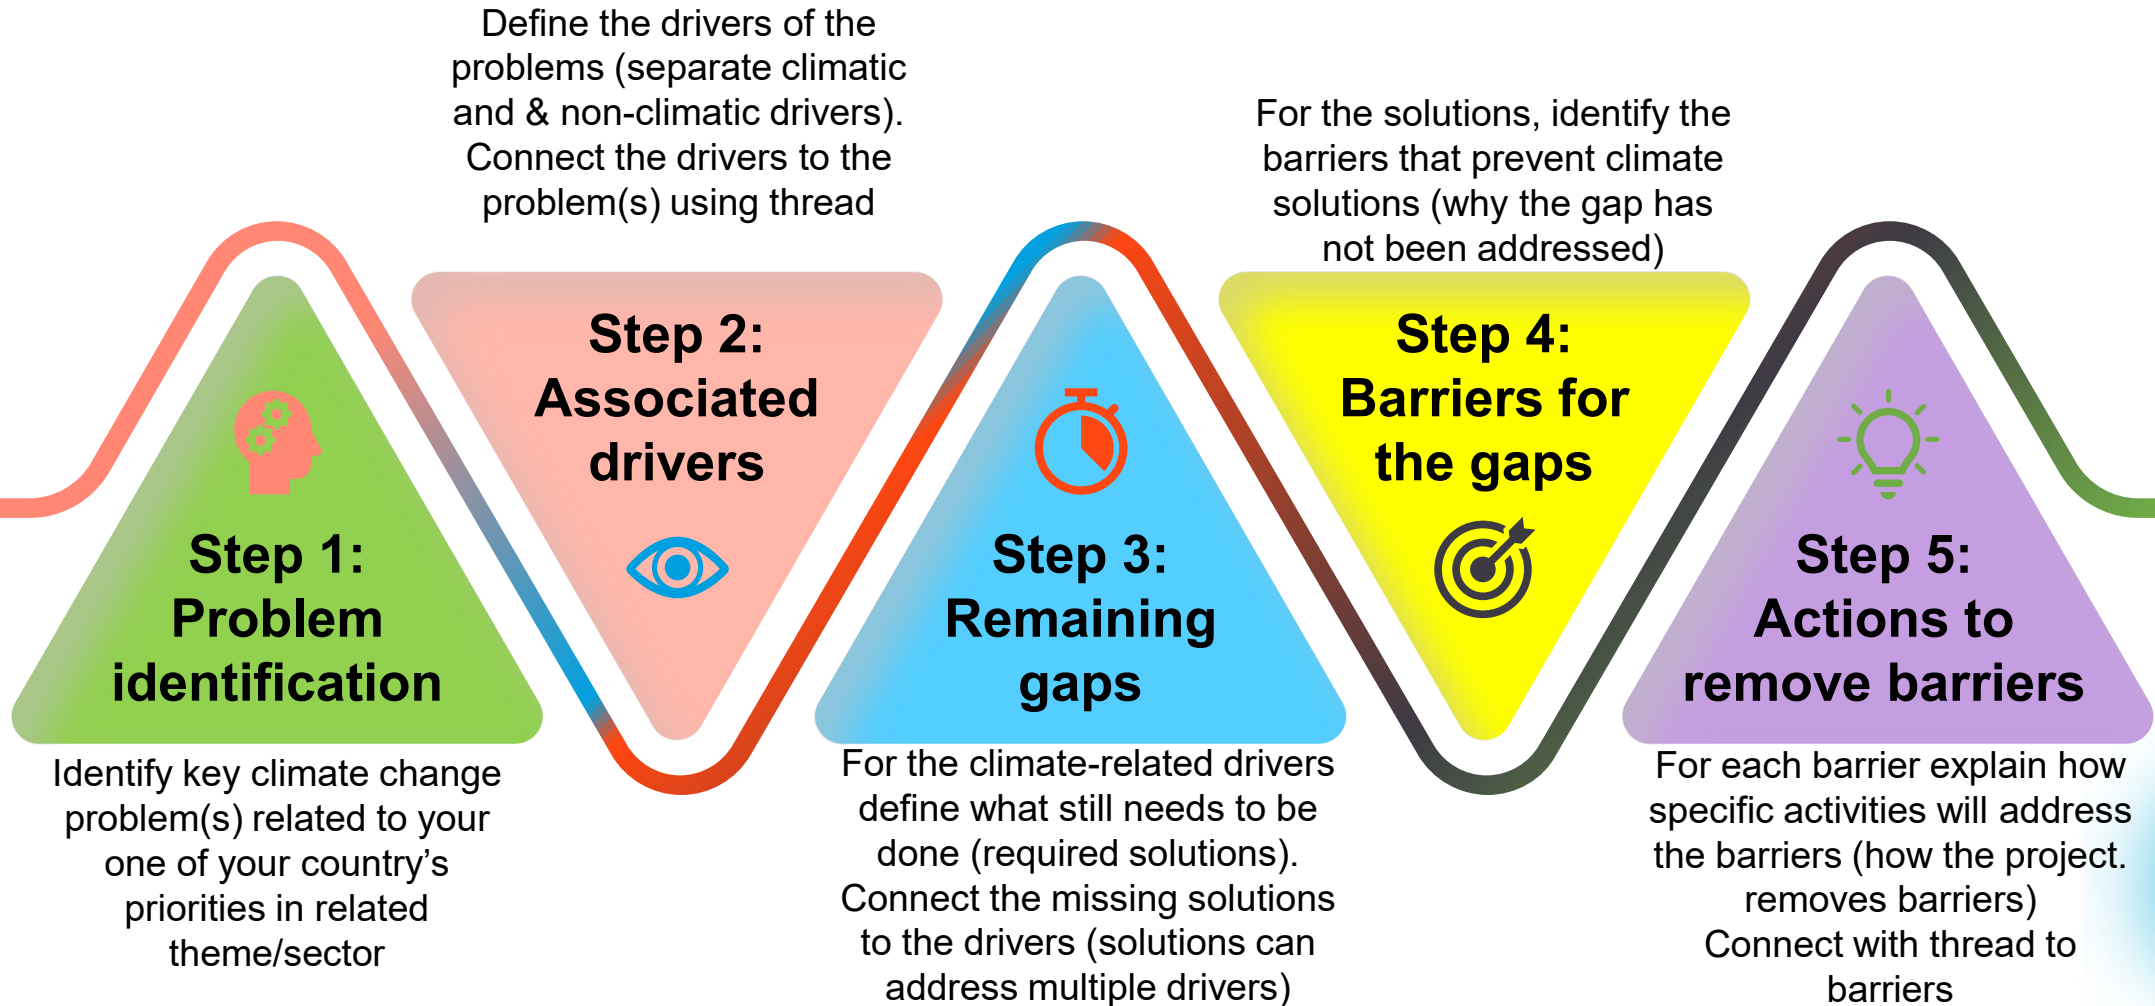

Colombo, Sri Lanka
14–17 September 2026

Linking of Climate Change Narrative, ToC and Logframe in GCF projects/programmes

Sokleang KIM & Krishna Krishnamurthy

Colombo, Sri Lanka
14–17 September 2026

Climate Narrative

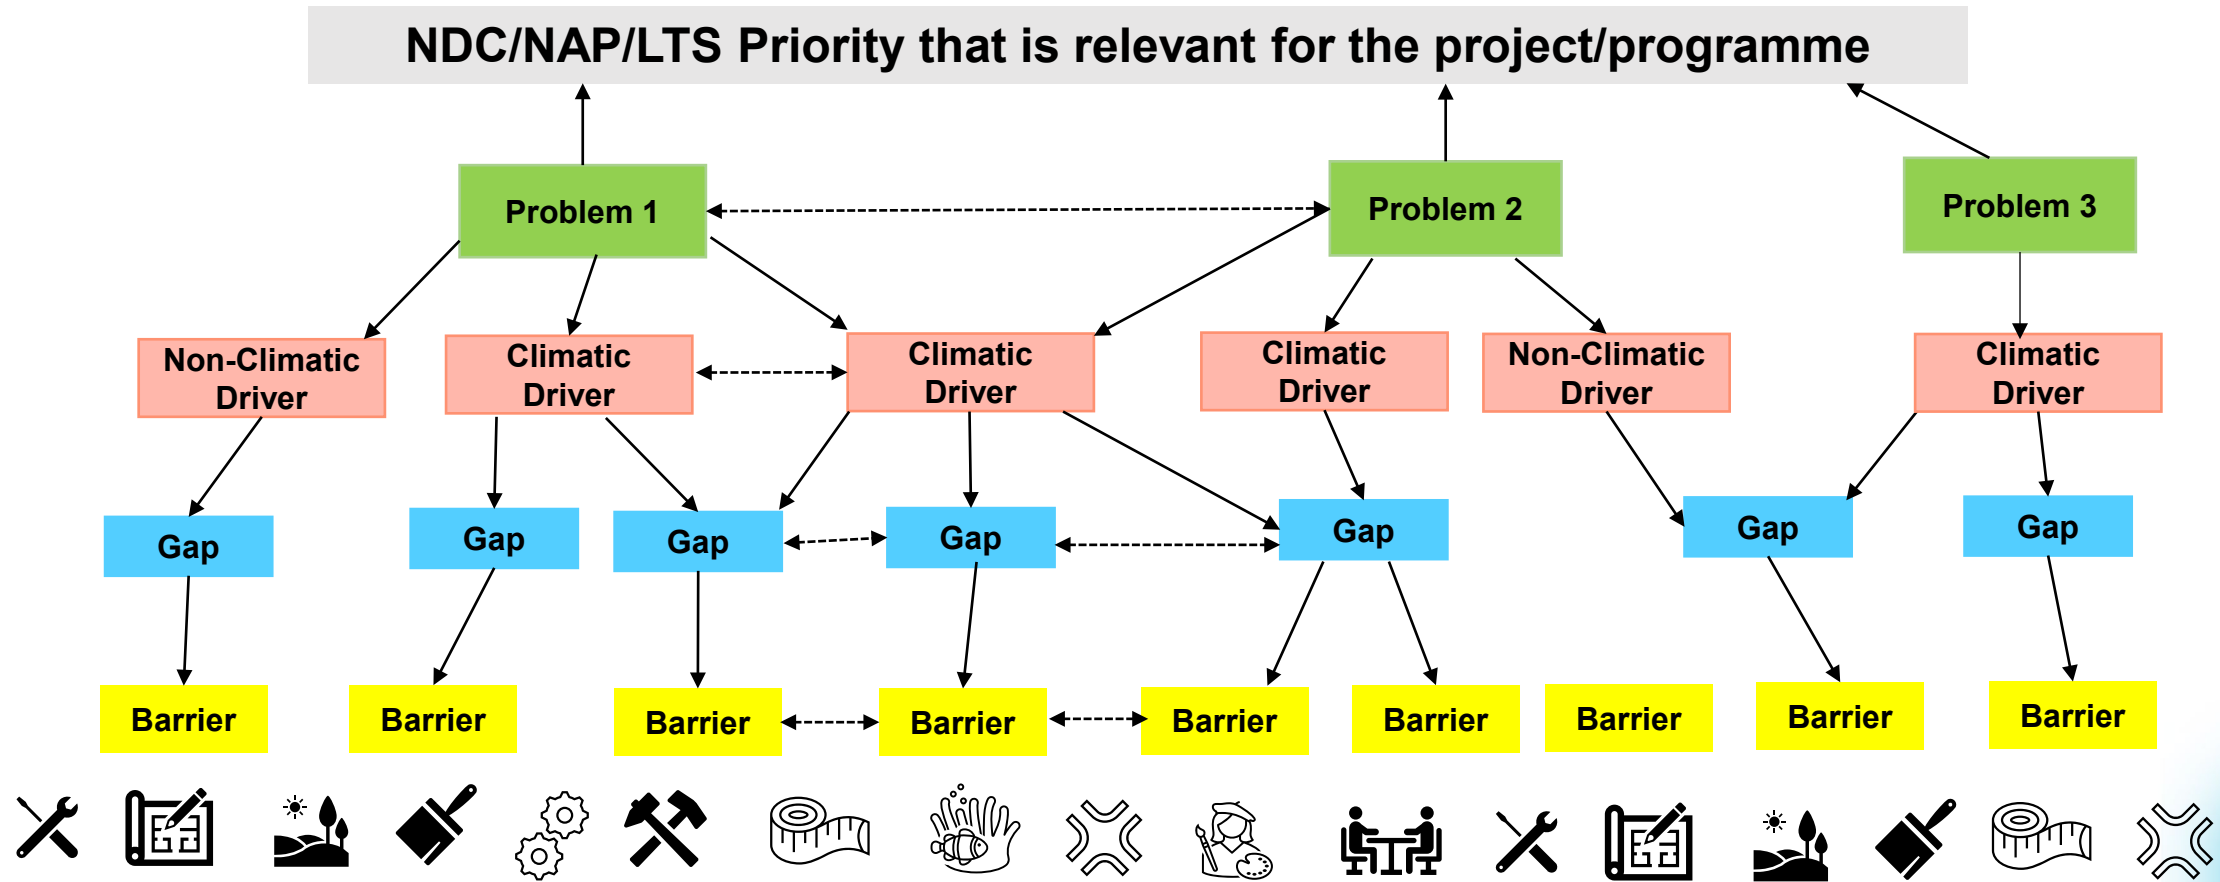

Groupwork

1. Join any of the groups (groups are arranged by theme/sector).
2. Discuss and decide on one priority taken from NDC/NAP/LTS of a country of the group member that is relevant to the sector/theme of the group
3. From the selected priority, work on step 1 through step 5

The whole exercise takes only 45 minutes.

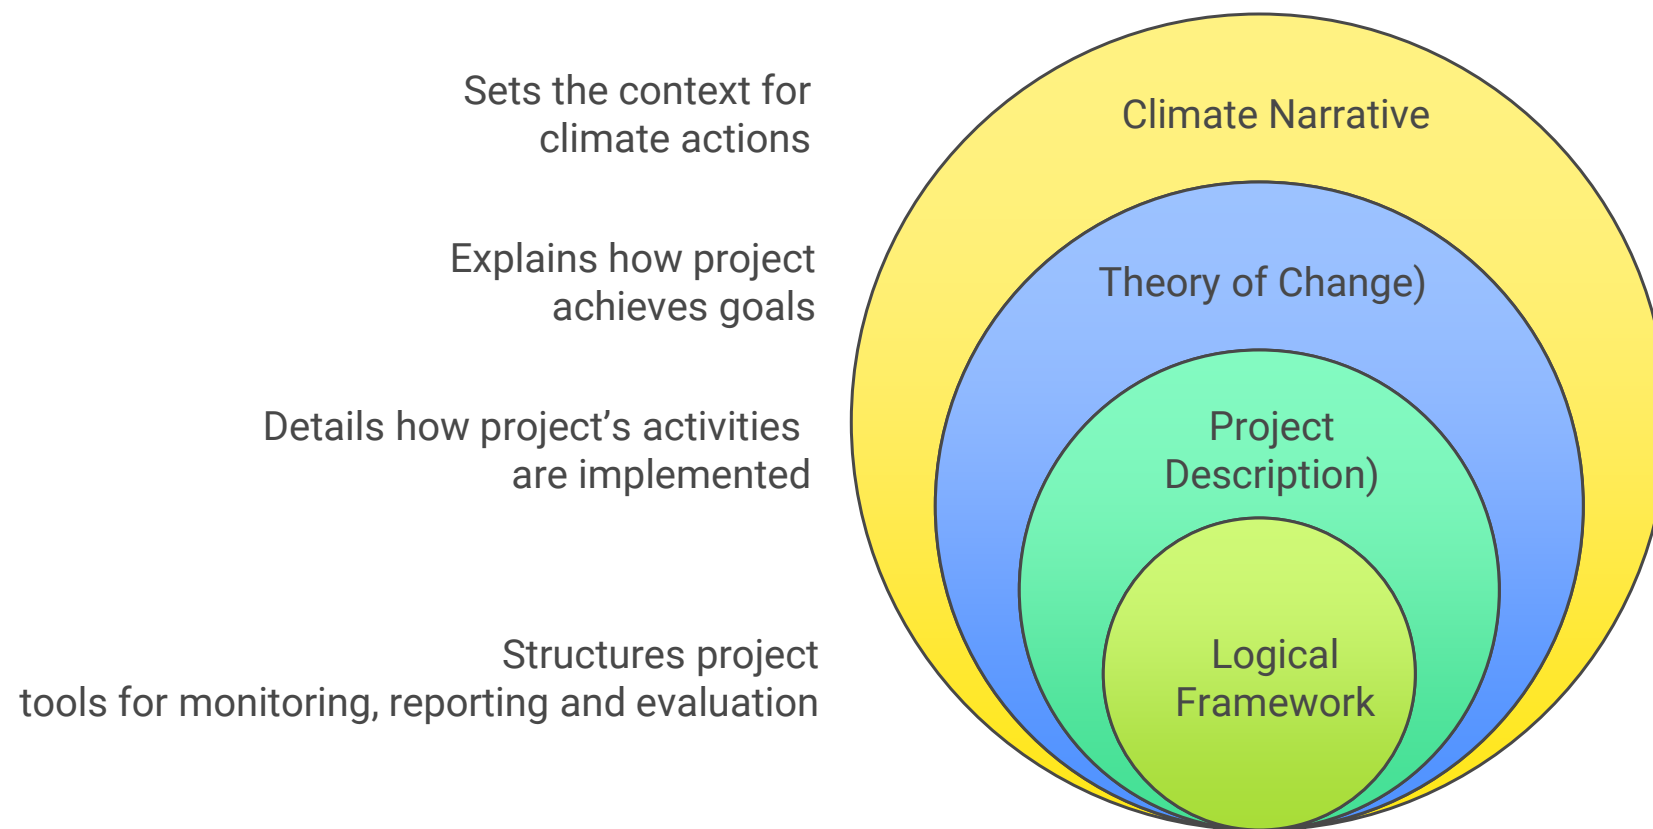

Climate narrative analysis

Market Tours of the Climate narrative Analysis

- Format & process: The tour happens at the side of each group:
 - One member of each group is nominated to standby and be ready to respond to any questions asked by visitors/reviewers
 - The other members of the group are asked to go around and review the work of other groups, and ask question if needed
- Duration: 20 minutes.

Linkages between the four elements

Translate the climate narrative analysis into C.1 of the GCF's CN/FP templates

● GCF.10

1. Start with the problem(s)/sphere of interests

2. Supported with climatic drivers and non-climatic drivers with facts and data

4. Barriers to be addressed for each identified gap

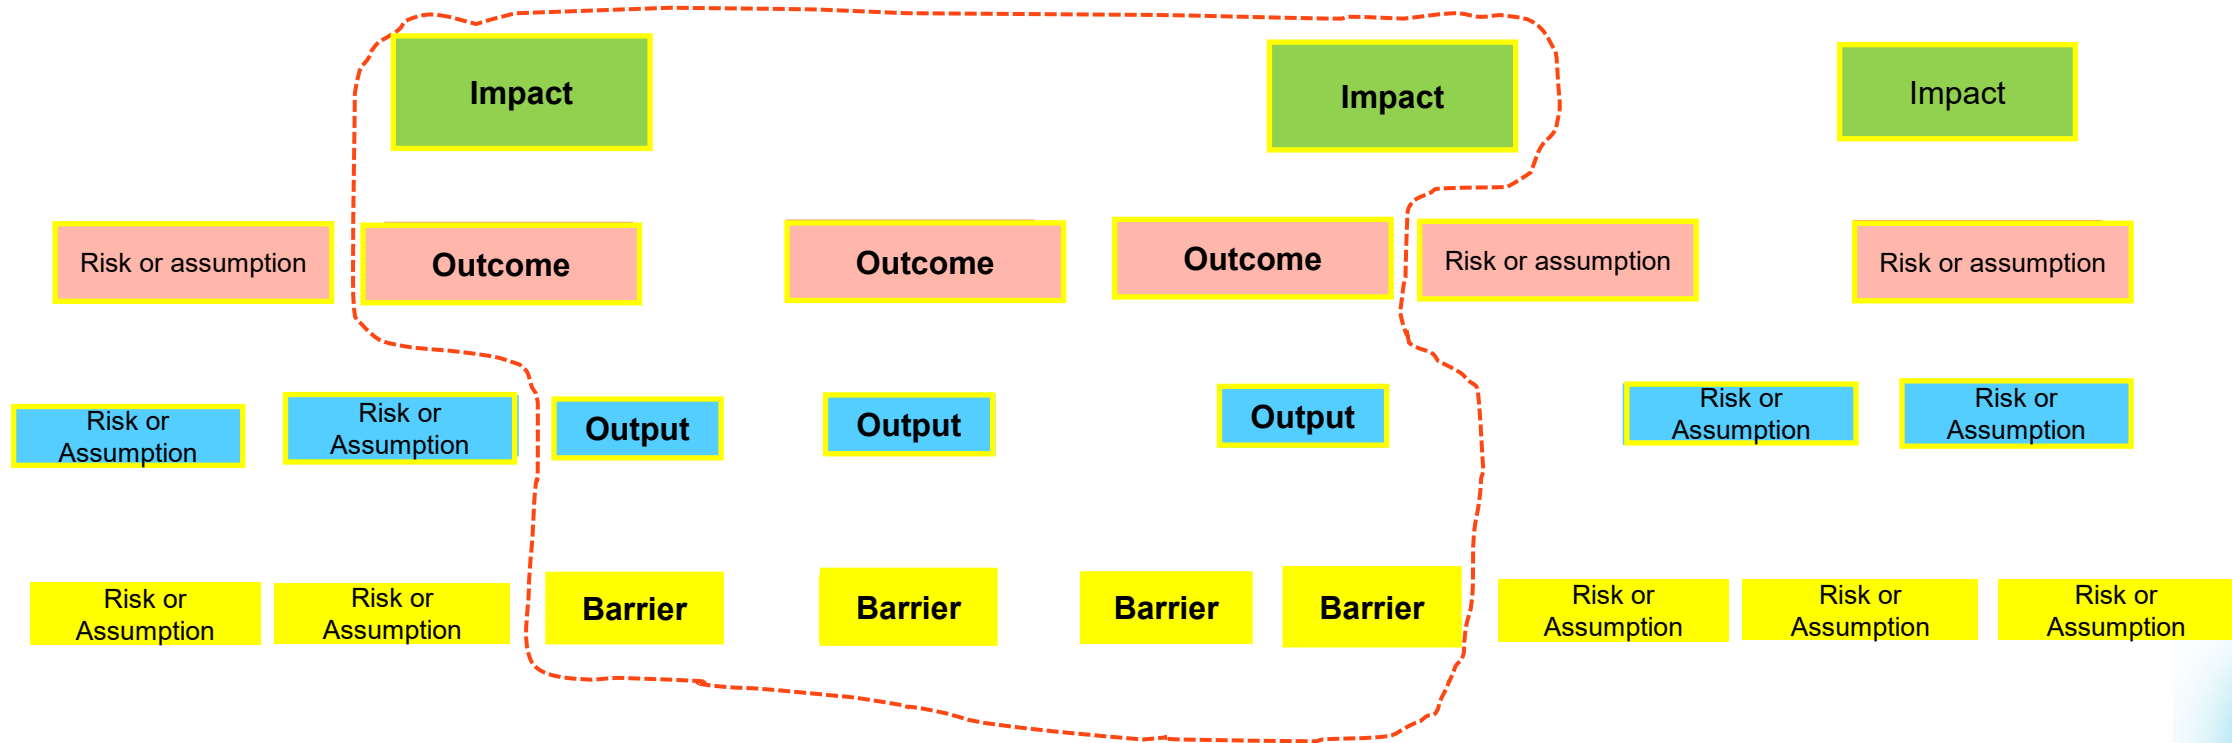

3. Remaining gaps or most relevant solutions for climatic driver

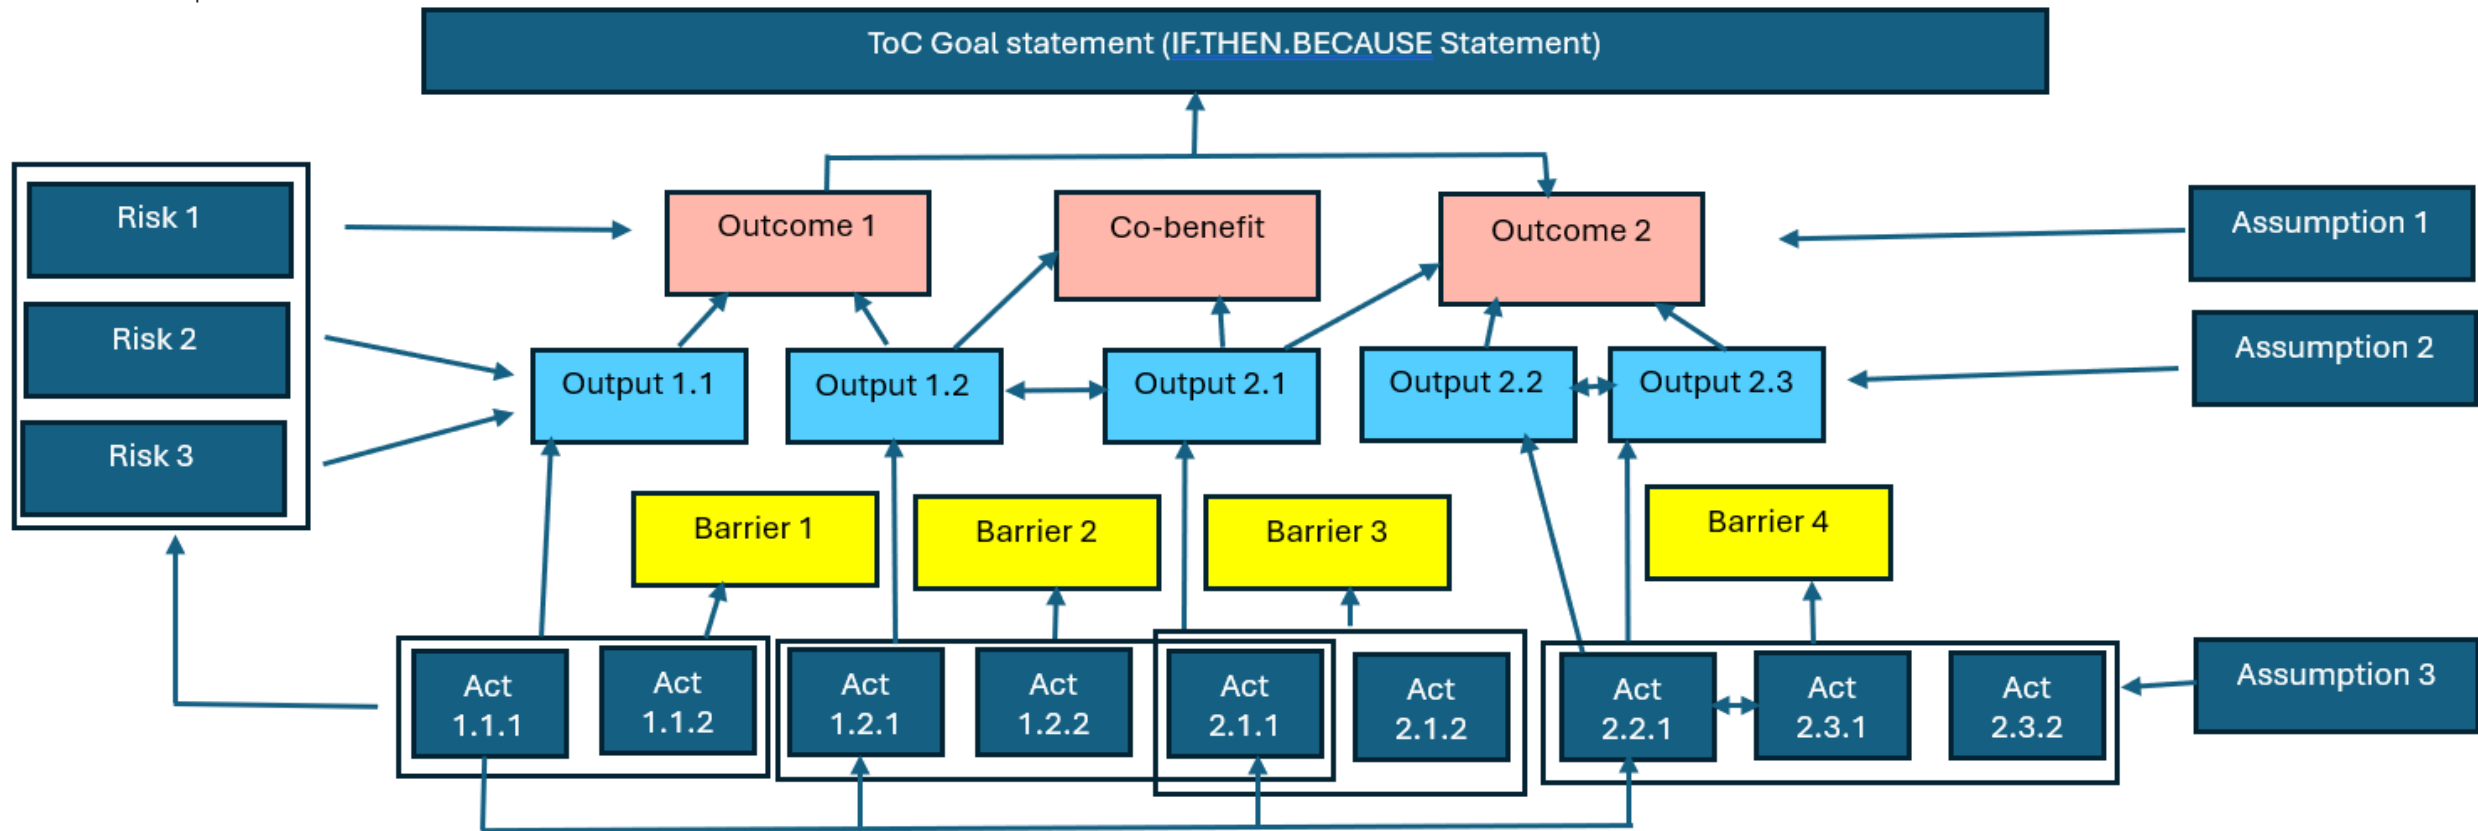

Now, let's convert Climate Narrative into ToC GCF.10

Key components of a ToC

- Results can be categorized into three levels: Impact, Outcome, Output.
- Activities address identified barriers and can generate changes (results).

Changes in logframe

Old template	New template
Project's focus:	Not required
GCF impact level:	No change
GCF outcome level:	GCF outcome and co-benefit level: - Standardized quantitative indicators - Standardized qualitative enabling environment indicators
Project specific outcome and output indicators:	Project specific output indicators: - No project specific outcome indicators are required - Only output indicators are contextualized - Output indicators must show its relationship to each identified outcome statement or co-benefit statement - Required for specific "unit of measurement"
Project activities and deliverables	Each activity needs to - align directly with specific output indicator - specify attainable deliverable
M&E and reporting	No change

Thank you
