

Securing Permanent Forests to Combat Climate Change and Enhance Sustainable National and Local Economies in Cameroon

ANNEX K

ELIGIBILITY CRITERIA

Version Date: 27/05/26

Activity	Eligibility criteria
<i>Activity 1.1.1 Integrate climate mitigation and adaptation into the guidelines for improving protected areas (PA) management plans.</i>	PA management plan updates: All PAs in the 3 chosen landscapes Access to climate services to forest fringe communities: All HH living inside and in the buffer areas of PAs located in the 3 chosen landscapes
<i>Activity 1.1.2 Develop guidelines for preparing and implementing 03 production forests management plans including the integration of climate change mitigation and adaptation, and other improved SFM practices and update the status of illegal logging in Cameroon.</i>	Production forests (logging concessions or council forests) located in the 3 chosen landscapes
<i>Activity 1.1.3 Implement management plans of 3 Communal forests.</i>	Communal forests located inside the 3 chosen landscapes
<i>Activity 1.1.4 Create and operationalize multi-stakeholder platforms to strengthen dialogue between sectors or stakeholders with different land use interests.</i>	All private landholders and land users owning or using land in the three chosen landscapes. This includes statutory as well as customary ownership and use rights as well as seasonal usage.
<i>Activity 1.2.1 Develop integrated restoration land use planning and ownership.</i>	Restoration opportunity areas identified under ROAM phase 1 for each of the three landscapes
<i>Activity 1.2.2 Implement restoration activities in agricultural lands, mountains, degraded park areas, and community forests in the Waza intervention site.</i>	Restoration opportunity areas identified under ROAM phase 1 in the Waza landscape
<i>Activity 1.2.3 Implement restoration activities in degraded agricultural lands, forest reserves and park areas, community, and council forests in the Dja-Lobeke intervention site.</i>	Restoration opportunity areas identified under ROAM phase 1 in the Dja-Lobeke landscape
<i>Activity 1.2.4 Implement restoration activities in degraded agricultural lands and forest reserves in Bakossi-Bamboutous intervention site.</i>	Restoration opportunity areas identified under ROAM phase 1 in the Bakossi-Bamboutous landscape
<i>Activity 1.2.5 Develop and disseminate agro-climatic information for increased resilience of agriculture and land use activities in the three landscapes.</i>	All farming households, whether land owners or leasers, carrying out agricultural activities within the three landscapes
<i>Activity 1.3.1 Support the development/operationalisation of the Warsaw REDD+ instruments - the National Forest monitoring system (NFMS), REDD+ registry and REDD+ safeguard information system (SIS).</i>	N/A
<i>Activity 1.3.2 Test Forest monitoring system, REDD+ registry and REDD+ safeguard information system and forest reference level.</i>	N/A

Activity 1.3.3. Support the establishment of a legal framework to support green investment in Cameroon.	N/A
Activity 1.3.4. Support the development of Cameroon's National Forest Reference Emission Level and the finalization of the country's REDD+ MRV system.	N/A
Activity 2.1.1 Conduct a prioritization of high-potential NTFPs per AEZ.	N/A
Activity 2.1.2 Support the development /upgrading of the NTFPs micro and small enterprises' equipment.	For development: Potential entrepreneurs identified during the feasibility study in the three landscapes, engaged in processing, packaging and storage of prioritized NTFPs For upgrading: Existing MSMEs operating in the three landscapes engaged in processing, packaging and storage of prioritized NTFPs.
Activity 2.1.3 Support the simplification of policy and regulatory processes.	N/A
Activity 2.1.4 Engage with financial institutions on green investments.	Microfinance institutions and commercial banks operating in the three landscapes or nationally
Activity 3.1.1 Train stakeholders on the use of improved guidelines for the design and implementation of PA and SFM management plans and reduce illegal activities in PA and SFM.	Stakeholders involved in the design and implementation of PA management plans in the three landscapes
Activity 3.1.2 Train stakeholders and disseminate information on revised instruments, new restoration, forest monitoring systems, REDD+ registry and REDD+ safeguard information systems to relevant stakeholders.	Stakeholders involved in forest monitoring systems, REDD+ registry and REDD+ safeguard information systems in Cameroon
Activity 3.1.3 Provide technical capacity to State and non-State actors to prepare a legal framework for green investment.	Stakeholders involved in green investments, climate finance instruments and green investment law in Cameroon
Activity 3.1.4 Train farmer associations and cooperatives on the monitoring and management of micro-enterprises, notably on agriculture and NTFPs.	Farmer associations and cooperatives engaged in the processing of prioritized NTFPs and operating in the three landscapes
Activity 3.1.5 Train local artisans in equipment maintenance and repair.	Craftspersons and technicians experienced in the maintenance and repair of equipment required for the processing of prioritized NTFPs
Activity 4.1.1 Update and implement the monitoring and evaluation plan of the project and especially restoration activities.	N/A
Activity 4.1.2 Provide support on FPIC and safeguards implementation.	N/A

Activity 4.1.3 Facilitate and support audit of activities, project and food safety and quality monitoring of value chain products.	N/A
Activity 4.1.4 Assess governance and management using the Site Assessment for Governance and Equity (SAGE) tool, and the Integrated Management Effectiveness Tool (IMET) for each of the PAs in the landscape	All PAs located in the three landscapes
Activity 4.2.1 Prepare and disseminate communication and knowledge management products.	N/A
