Re: Co-financing commitment letter for the Yemen Climate Water Information Management & Early Warning Systems (CWIMEWS) Project in Yemen

Dear Madam/Sir,

I am writing to you about the preparation of the World Bank Group (WBG) Yemen Climate Water Information Management & Early Warning Systems (CWIMEWS) Project that was proposed to the Green Climate Fund (GCF) for funding. CWIMEWS's proposed development objective is to strengthen the climate and water information management system and enhance climate-resilient decision-making and institutional capacity for climate and water information services in selected basins.

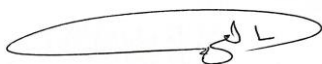

The World Bank will be providing parallel financing as part of the broader Yemen Improved Water Management and Irrigation for Sustainability and Efficiency (I-WISE) Project, which is expected to further strengthen water management and irrigation systems in Yemen.

CWIMEWS is expected to require financing in the amount of USD 24.8 million from the GCF, with co-financing of USD 3.647 million provided through the World Bank Yemen Multi-Donor Trust Fund.

On December 15–19, 2025, the World Bank held a Decision Meeting for the Yemen Improved Water Management and Irrigation for Sustainability and Efficiency (I-WISE) Project, which authorized the Task Team to continue preparation of the project and the submission of CMIMEWS to the GCF.

Subject to a positive decision by our approval body, the World Bank, as administrator of the Yemen Multi-Donor Trust Fund, intends to provide co-financing for CWIMEWS through the Yemen Multi-Donor Trust Fund with a grant in the amount of USD 3.647 million, should the GCF funding proposal be approved.

Sincerely yours,

Naif Mohammed Abu-Lohom
Senior Water Resources Management Specialist/Task Team Leader
World Bank Group
