

# GCF Asia Structured Dialogue

**Dr. Jens Kallabinski**  
**Program Director, GIZ Laos**  
**26-29 April 2017 | Bali, Indonesia**

*Please keep presentation up  
to a maximum of 5 slides  
and a duration of 5 minutes*

## Overview

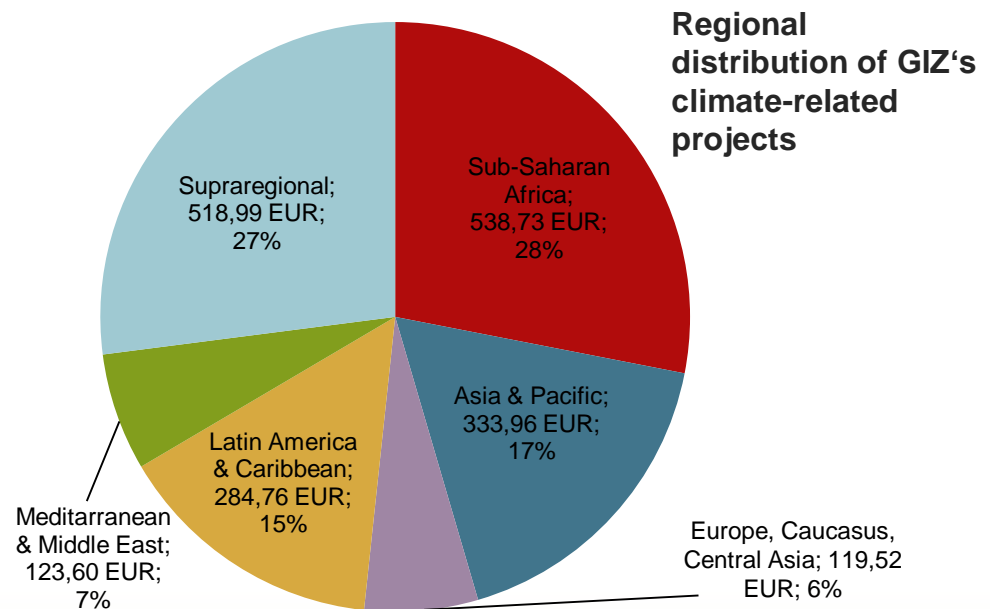

The *Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)* GmbH is an international organisation with a strong presence in more than 130 countries, including 41 Least Developed Countries (LDC), 30 Small Island Developing States (SIDS) and 36 Sub-Saharan African countries

GIZ has over 50 years of experience of providing technical assistance and is now one of the largest international providers of capacity development and technical assistance on climate change-related sectors worldwide.

As of December 2016, GIZ's climate-relevant portfolio accounted for 34% of its entire project portfolio. Climate-relevant projects contributed EUR 670 million to the organization's total turnover in 2016.

GIZ accreditation category:

- Projects up to 250 Million USD (total project volume)
- Medium Environmental and Social Risks
- Project management and grant intermediation

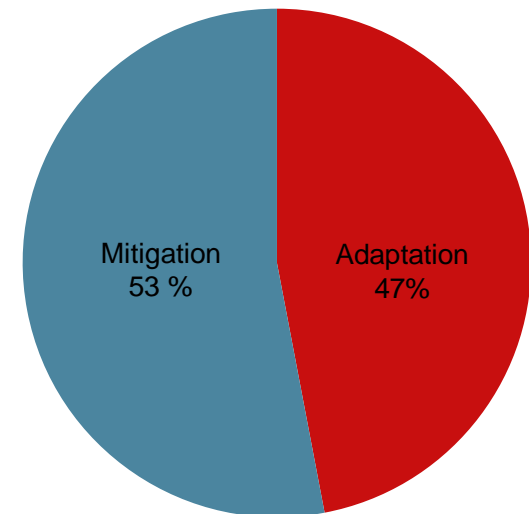

## GLZ's Experience in the GCF Strategic Impact areas

GIZ operates in all sectors relevant for sustainable development and climate change:

**Adaptation** activities mainly target the agriculture sector, followed by activities to increase resilience in the water sector, improve policy-advice for sector strategy development such as NAPs, and climate risk management and insurance, ecosystem-based adaptation. Improving the resilience of cities, energy systems, forestry and food also constitutes an important element of the work in adaptation.

The energy sector accounts for one quarter of GIZ's **mitigation** portfolio. Further fields of activity include agriculture, forestry, water, cross-sectoral programmes, and policy advice for regulatory environmental reforms.

Distribution of GIZ's climate-related projects between mitigation and adaptation

## GLZ's services as an accredited entity to the GCF

### Accredited Entity:

GLZ provides all services related to project development & project implementation. GLZ climate change projects are delivered by national and int'l experts and may include:

- capacity development
- policy advice
- grant awarding and intermediation
- leveraging additional private and public finance
- procurement of goods and services
- logistics support

### Readiness Delivery Partner:

GLZ provides readiness support to improve the ability of countries to access climate funds and use these resources effectively. For the last 7 years GLZ supported more than 40 partner countries worldwide in readiness-activities. This includes the support of NIEs in qualifying for direct access to the GCF and the development of LDCs and SIDS.

*In its work GLZ pursues an approach that is geared to the principles of ownership by the countries, local capacity development and long-term, needs-driven support.*

### **Programming process:**

- *Liaison NDA+GIZ:*

*Near you through local GIZ offices:*

*[www.giz.de/en/html/worldwide.html](http://www.giz.de/en/html/worldwide.html) or write us at [gcf@giz.de](mailto:gcf@giz.de)*

- *Periodic programming cycles based on country requests*
- *GIZ staff will translate your idea into a Concept Note and Funding Proposal*

### **Status of Pipeline:**

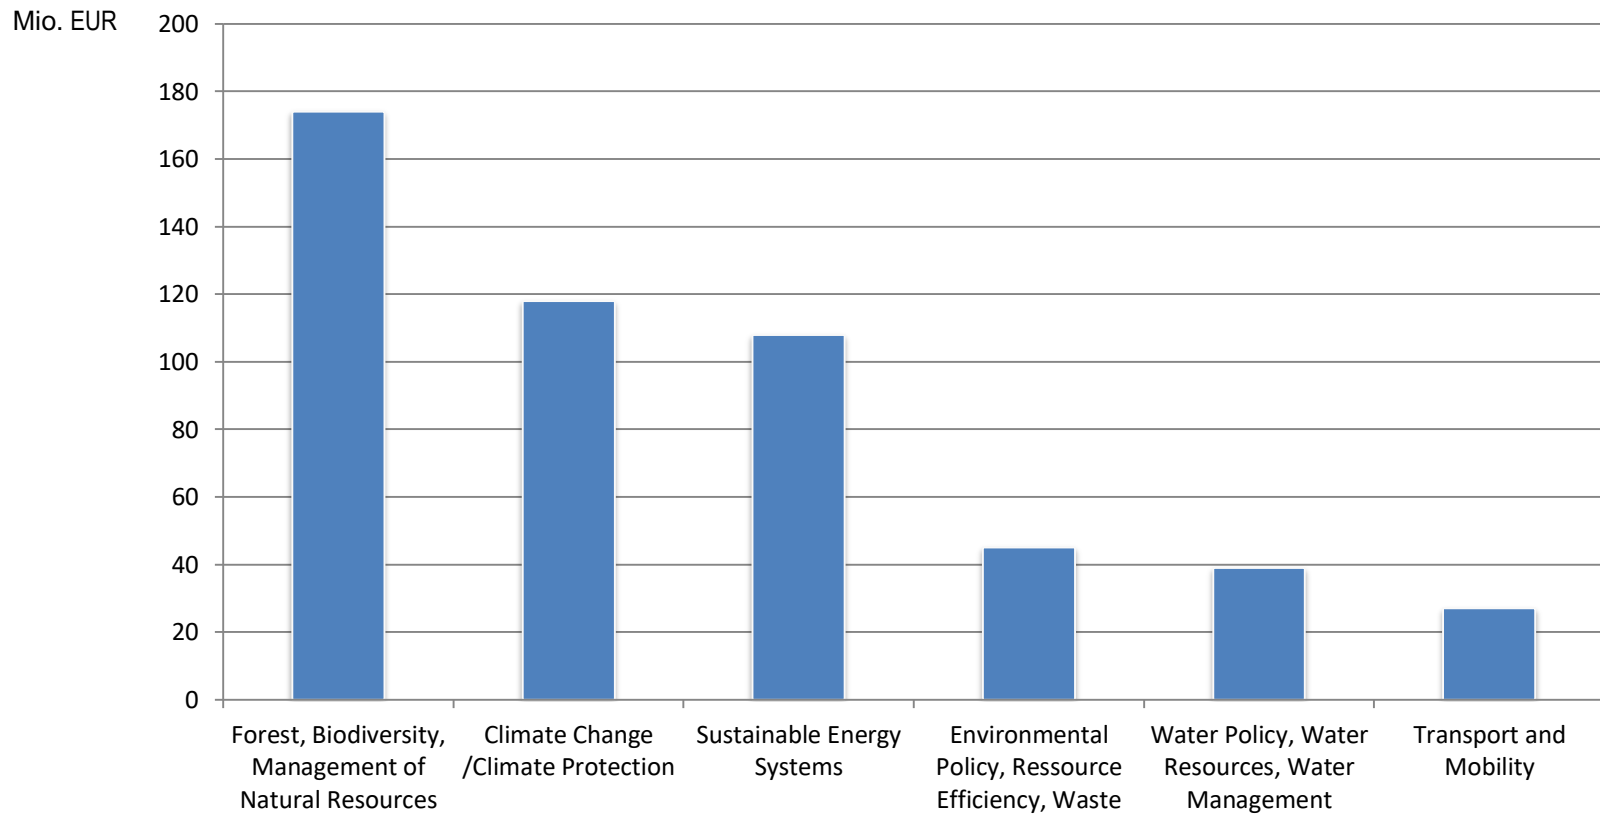

- *3 projects close to finalization*
- *More projects scheduled for 2018*

### **Focus area within GCF's Strategic Impact Areas**

- ☒ Energy access and power generation
- ☒ Low emission transport
- ☒ Buildings, cities, industries and appliances
- ☒ Forestry and land use
- ☒ Most vulnerable people and communities
- ☒ Health and well-being, and food and water security
- ☒ Infrastructure and built environment
- ☒ Ecosystems and ecosystem services

## GLZ`s climate related portfolio in Asia

## ***GIZ's engagement in Asia***

GIZ's climate-related project portfolio in Asia is one of the organisation's largest, with over EUR 330 million in on-going projects and programmes and shows a wide range of adaptation and mitigation approaches.

One of GIZ's major climate related programmes in Asia is the ICMP (Integrated Coastal Management Programme) which aims at increasing climate resilience by protecting communities from extreme weather events and supporting farmers in their adaptation to climate change. 3.5 million people benefit from coastal protection measures and USD 102 million will be generated annually through improved ecosystem-based services. Further target areas are agriculture, forestry and water management. The programme is co-financed by Australian Aid, The Kingdom of the Netherlands, UNEP and UNDP.

The regional project “Adaptation to Climate Change in Pacific Island States” channels more than EUR 50 million into capacity development of member states of the Pacific community as to cope with the challenges of climate change in terms of adaptation to its adverse effects and mitigation measures as part of a sustainable natural resources management.
