Space for the Civil Society at the Board

Observe the decision-making process

Intervene in the decision-making process Of the Board members

GCF aims to promote the input and participation of stakeholders, including private-sector actors, civil society organizations, vulnerable groups, women and indigenous peoples (Governing Instrument, para. 71)

What do we want?

- **Transparency and accountability** (effective participation in the design and development of GCF policies)
- **Strong and robust stakeholder engagement** including women, and indigenous peoples (including allocation of readiness resources for this)
- **Effective use of resources** (paradigm shift, priority climate actions, real and direct benefits).
- Protection of the environment and human rights in the implementation of programs and projects- **we want participatory monitoring.**
- Strengthening national capacities to address climate change.

Space for Civil Society at the Country Level

- Effective participation in the design, development and implementation of proposals that seek GCF financing.
- Participatory monitoring throughout the cycle of program and project proposals.

The value of working with Civil Society

- Take advantage of the knowledge and technical capacity that civil society can provide

The value of working with Civil Society

- Generate proposals that promote sustainable development and effective climate outcomes.
- Generate programs and projects that have a transversal vision, and that are legitimate and inclusive.
- Have a more comprehensive view of the problem and possible solutions.

Thank you!
