## Accreditation Upgrade

- Accreditation of an entity valid for 5 years, renewable
- An entity can wish to upgrade its accreditation scope for project size, ESS risk level, financial instruments (grant awards, loans, guarantees, equity).
- Requests for accreditation upgrade can be made at any point, and will benefit from prioritization in the review process
- Track record evidence needs to be submitted to support request for upgrade
- Using a strategic and proactive approach, an entity can integrate in its action plan / Entity Work Programme an accreditation upgrade.

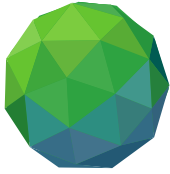

## Why programming entity work

### ▪ **Country-Driven Process**

- Select interventions that have passed the filter of a country's prioritization criteria, as contained in a country programme.
- Allows for a consultative process whereby a country's priorities and the potential for achieving the greatest impacts can be realized.
- Allows for a more strategic lens to be applied to the decision-making process of selecting which investments are most suitable for a country's context.

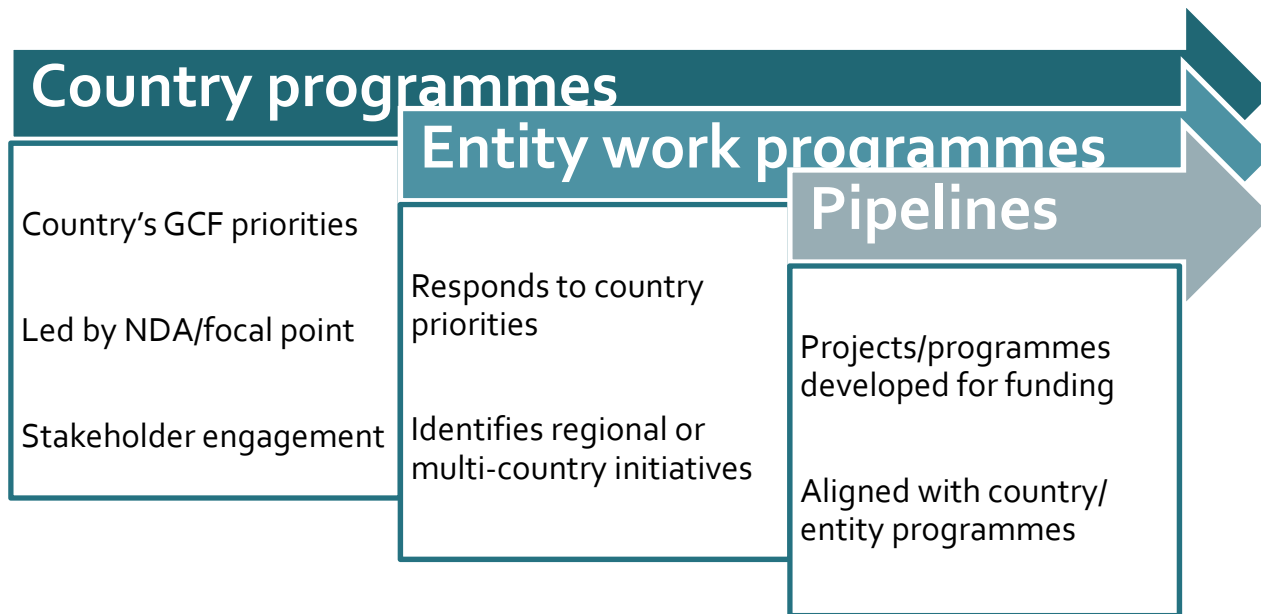

### ▪ **Aligning Priorities, Impacts, and Efforts**

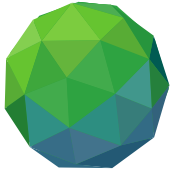

- Ensures the alignment between a country's needs and/or priorities, and the entity's comparative advantages to deliver on those priorities.
- Entities can choose to utilize their comparative advantages toward the achievement of a country's goals.
- A programmatic approach utilizes objective analysis and prioritization criteria upon which investment decisions can be made
- A programmatic approach goes beyond one-off or ad hoc interventions.

## Entity work programming process overview

- The overall programming effort with the GCF can be elaborated over several steps.
- Initiate dialogue with entity on GCF's programmatic approach
- Gather information on entity's business model, how they make project/funding decisions
- Work alongside entity and assist in the formulation of their EWP
- Initial screen of EWP and potential project pipeline to ensure alignment with GCF investment criteria, CPBs, climate impact potential, NDCs, etc.
- Further engage for possible project-level discussions
- Work with entity to bring project to FP stage.
