TCP is expected to contribute to:

- ✓ Strengthened engagement and collaboration on climate action of stakeholders; e.g., sector ministries, local institutions, international organizations and donors, private sector, and civil society
- ✓ Consistent matching of national climate change priorities with appropriate domestic or international climate finance sources
- ✓ Improved alignment of policies, a better monitoring system of climate action and the mutualization of resources and co-benefits resulting from climate change actions

Lesson Learned from Engagement with GCF

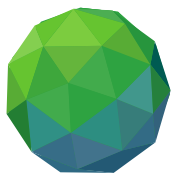

1. GCF is new to most people.

2. Policy integration needs to be reviewed, adopted, and accepted by relevant agencies.

3. Various stake holders with various foundations are involved in climate change. Public hearings are found difficult for the audience to understand quickly at once.

4. The Screening Committee's roles and responsibilities are not clearly determined for GCF. Future intensive meeting for the committee under the readiness programme is designed.

5. Climate change is global and needs to be matching with national circumstances. Therefore, TCP has to be dynamic for at least 3-5 years.

How GCF supports TCP via Readiness

Timeline	Amount	Type	AE DP
Nov'16 – May'18	\$300,000	GCF Readiness and Preparatory Support	GIZ
Jan'18 – Jun'19	\$652,317	Scaling up Thailand's Climate Finance Readiness	GIZ
Jan'18 – Dec'18	\$339,462	Advancing Thailand's Access to GCF	GGGI
	\$3,000,000	National Adaptation Plans (NAP) Readiness	UNDP

2016

2017

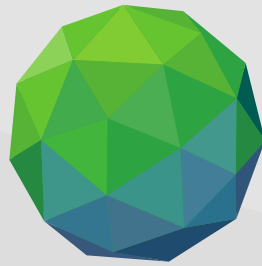

2018

2018 – 20XX

With GCF support, we are confident that Thailand will achieve a more advanced TCP in the near future.

THANK YOU
