

Needs for and Access to Climate Finance

Understanding financial needs and barriers to access climate finance by developing countries

GCF Structured Dialogue with Asia, Da Nang, 17 – 20 April 2018

Yolando Velasco, Manager
Climate Finance and Capacity Building Subprogramme
UNFCCC Secretariat

Long-term Climate Finance under the UNFCCC

- COP agenda item on Long-term climate finance (LTF).
- Discuss the commitment made by developed countries to jointly mobilize USD 100 billion per year by 2020 to address the needs of developing countries.
- The Paris Agreement expands the commitment until 2025 and a new collective objective must be established.

Themes for 2017-2018

- The articulation and transformation of the needs identified by the national processes, into programs and projects;
- The role of enabling policies and actions for the financing of mitigation and adaptation;
- Facilitate greater access to financing.

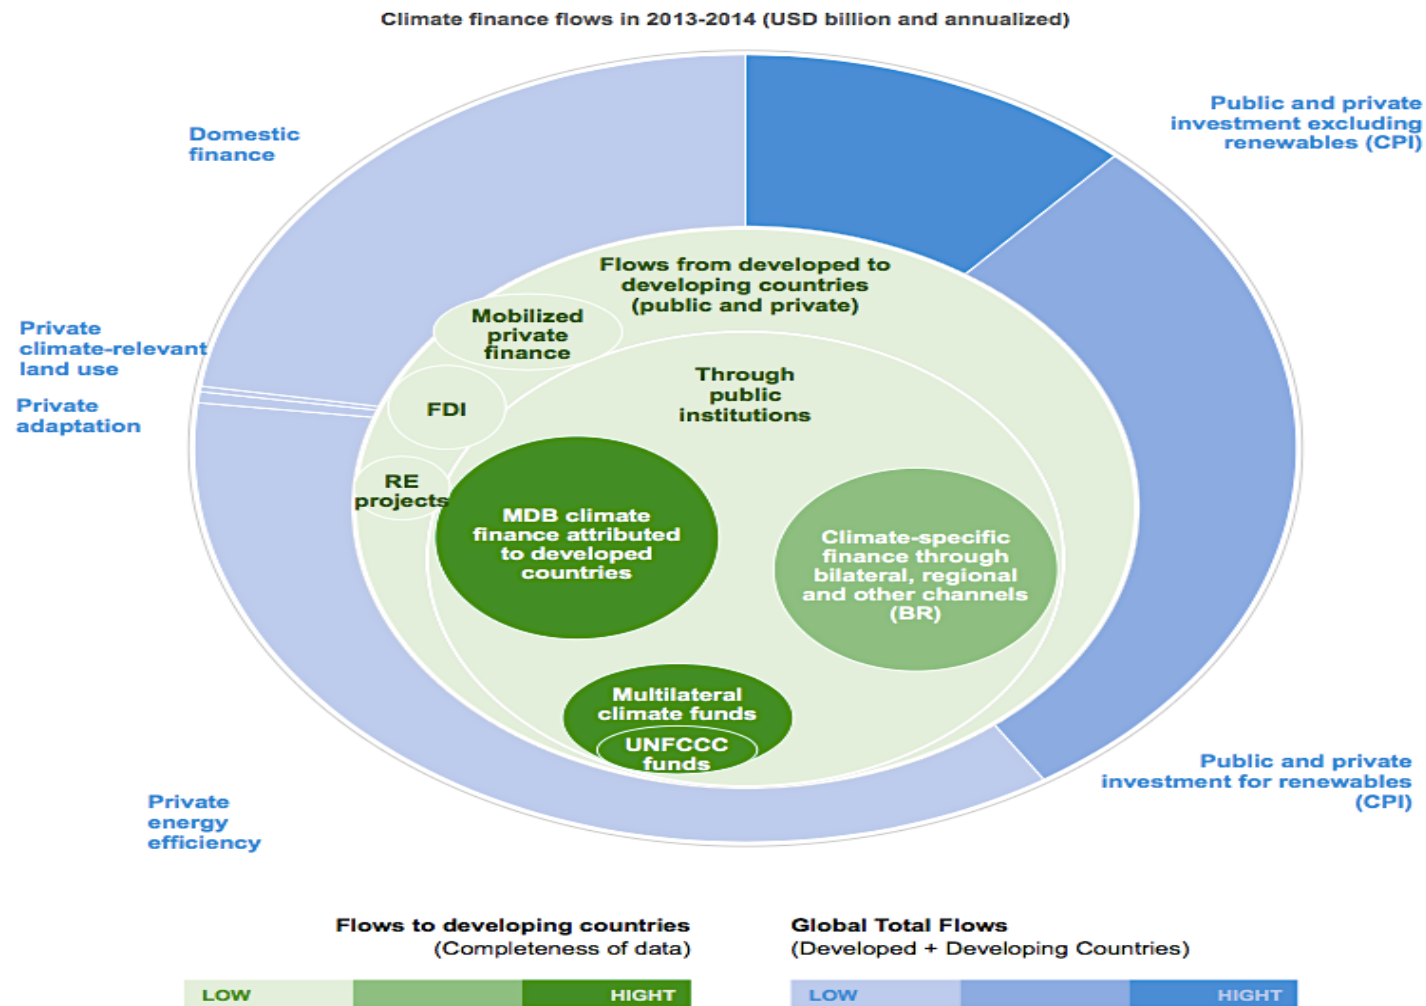

Elements that inform the decisions by Parties

- Annual in-session workshops (reports from the secretariat).
- Presentations by the developed countries of their strategies to scale-up climate finance.
- High Level Ministerial Dialogue every 2 years.

Long-term Climate Finance under the UNFCCC

Understanding the climate finance needs

- How do countries ensure that the finance needs being articulated are the priorities of government?
- What are the challenges (process and content) in defining national priorities on climate finance?

Enhancing access to climate finance

- What are the challenges in accessing climate finance?
- What can the Conference of Parties do to ensure that developing countries are able to access the needed support to implement their mitigation and adaptation actions?

Thank you!
