

Multistakeholder Engagement and Donor Coordination:

**Pacific Climate Change Roundtable Donor
Roundtable**

PCCR Development Partners Roundtable

- Objective: To provide a platform for countries, donors and partners to collaborate to deliver more effective climate finance access for PICTs - in order to follow up on the recommendations of 2024 Roundtable.
 - PCCR will be hosted in Apia, Samoa: 13-15 August
 - Development Partner Roundtable will be last day: Friday 15 August
- In 2024 PCCR members agreed:
 - That PCCRs would include an engagement session between the countries and the development partners.
 - That development partners be encouraged to coordinate effective responses to the identified finance needs and priorities at ongoing PCCR meetings.

Ensuring effective donor engagement in the PCCR

- Major donors are being encouraged to assist in planning the development partner roundtable to ensure they “coordinate effective responses to identified finance needs and priorities” (as per 2024 PCCR Recommendation).
- They’ll be asked to consider:
 - *How they can work to better align their investment criteria to country priorities*
 - *What are the emerging opportunities for climate investment*
 - *How they can align processes with PCCR outcomes to enhance climate finance collaboration in the region*
 - *How they can better track climate investment effectiveness*
- Long Term Objective: The PCCR will be a biennial event that will catalyse investment to enable PICTs to advance their climate change finance priorities.
