GCF REGIONAL DIALOGUE

with THE PACIFIC & ASIAN SIDS

Rarotonga, Cook Islands
6–9 May 2025

Mr. Sohs John, Deputy Secretary, Department of Finance and Administration, Federated States of Micronesia

Mr. Ruel Yamuna, Special Envoy – Climate and Environment, Ministry of Environment, Conservation and Climate Change, Papua New Guinea

Papua New Guinea's Readiness Programme – Experience 2018 to 2024

- The National Adaptation Plan 2022- 2030 was developed which is under implementation.
- Under this Readiness, a substantial number of tools have also been created to support the implementation of the NDC and the NAP, including the NAP financing and investment strategy, the Tool for Sectoral Planning Guidelines for Climate Change Adaptation, the NAP Training Module, the Sectoral Planning Guideline for Climate Change Adaptation, and others.
- An agriculture, forestry, and other land use (AFOLU) registry and nesting system has been established to facilitate climate-related investments and private sector engagement, including through the REDD+ RBP pilot program, a geo-portal, and a deforestation alert system in PNG.
- A project development manual has been created to guide national stakeholders regarding the GCF and its funding opportunities, procedures, and requirements.
- Although the Country Programme developed is outdated, a suite of early-stage concept notes is available.
- Initial work has been undertaken to identify and propose the DNPM as a DAE.

Papua New Guinea's Readiness Programme – 2025

Papua New Guinea is now planning for Readiness 5, under which we expect to:

- Develop the DAEs (2)
- Develop a new prioritised Country Programme and pipeline
- Undertake a full stocktake of the existing priorities and needs of the country for Readiness support
- Strengthen the climate coordination for both adaptation and mitigation, and our organisational structures to support climate-finance and decision-making
- Improve the knowledge sharing and learning from the national level down to the local levels to facilitate the understanding and cooperation between our diverse stakeholders on climate programming and financing.
- Submit two proposals to the Board this year, and continue the submission of our pipeline in 2026 and beyond.
