GCF REGIONAL DIALOGUE
with THE CARIBBEAN

Roundtable discussion

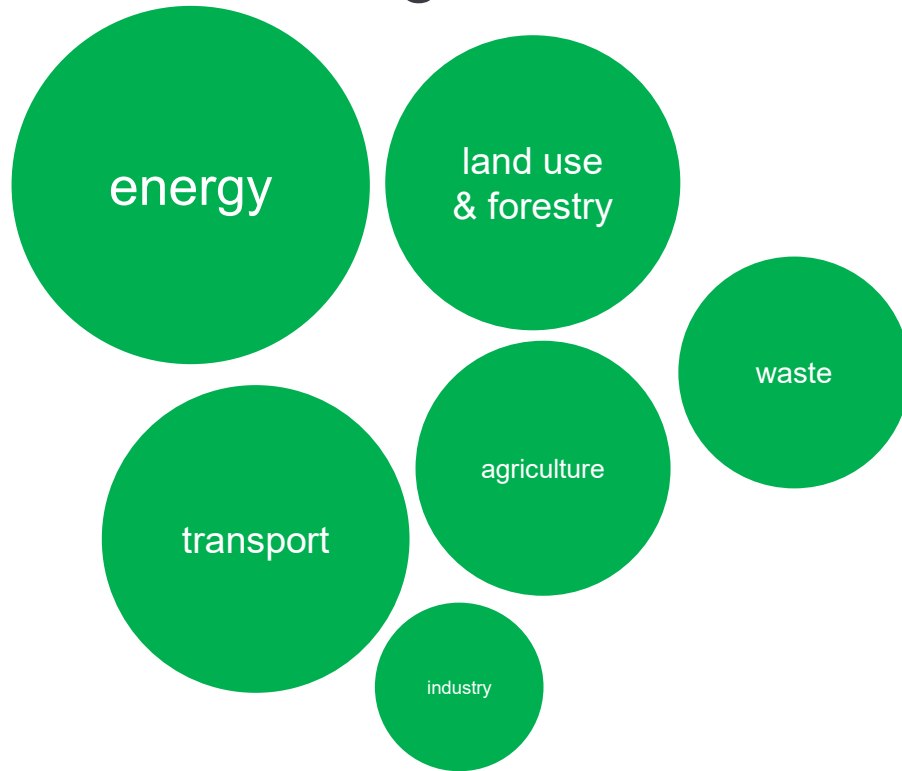

Krishna Krishnamurthy, D.Env.
Climate Impact Specialist, DLAC

Saint Kitts and Nevis
17–20 March 2025

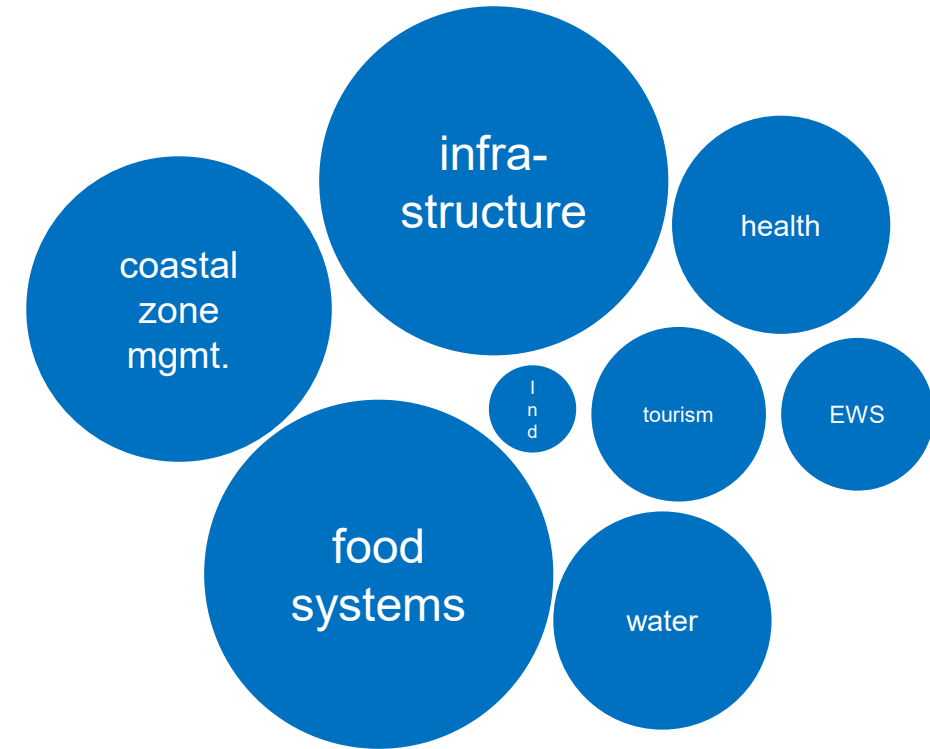

NDC priorities

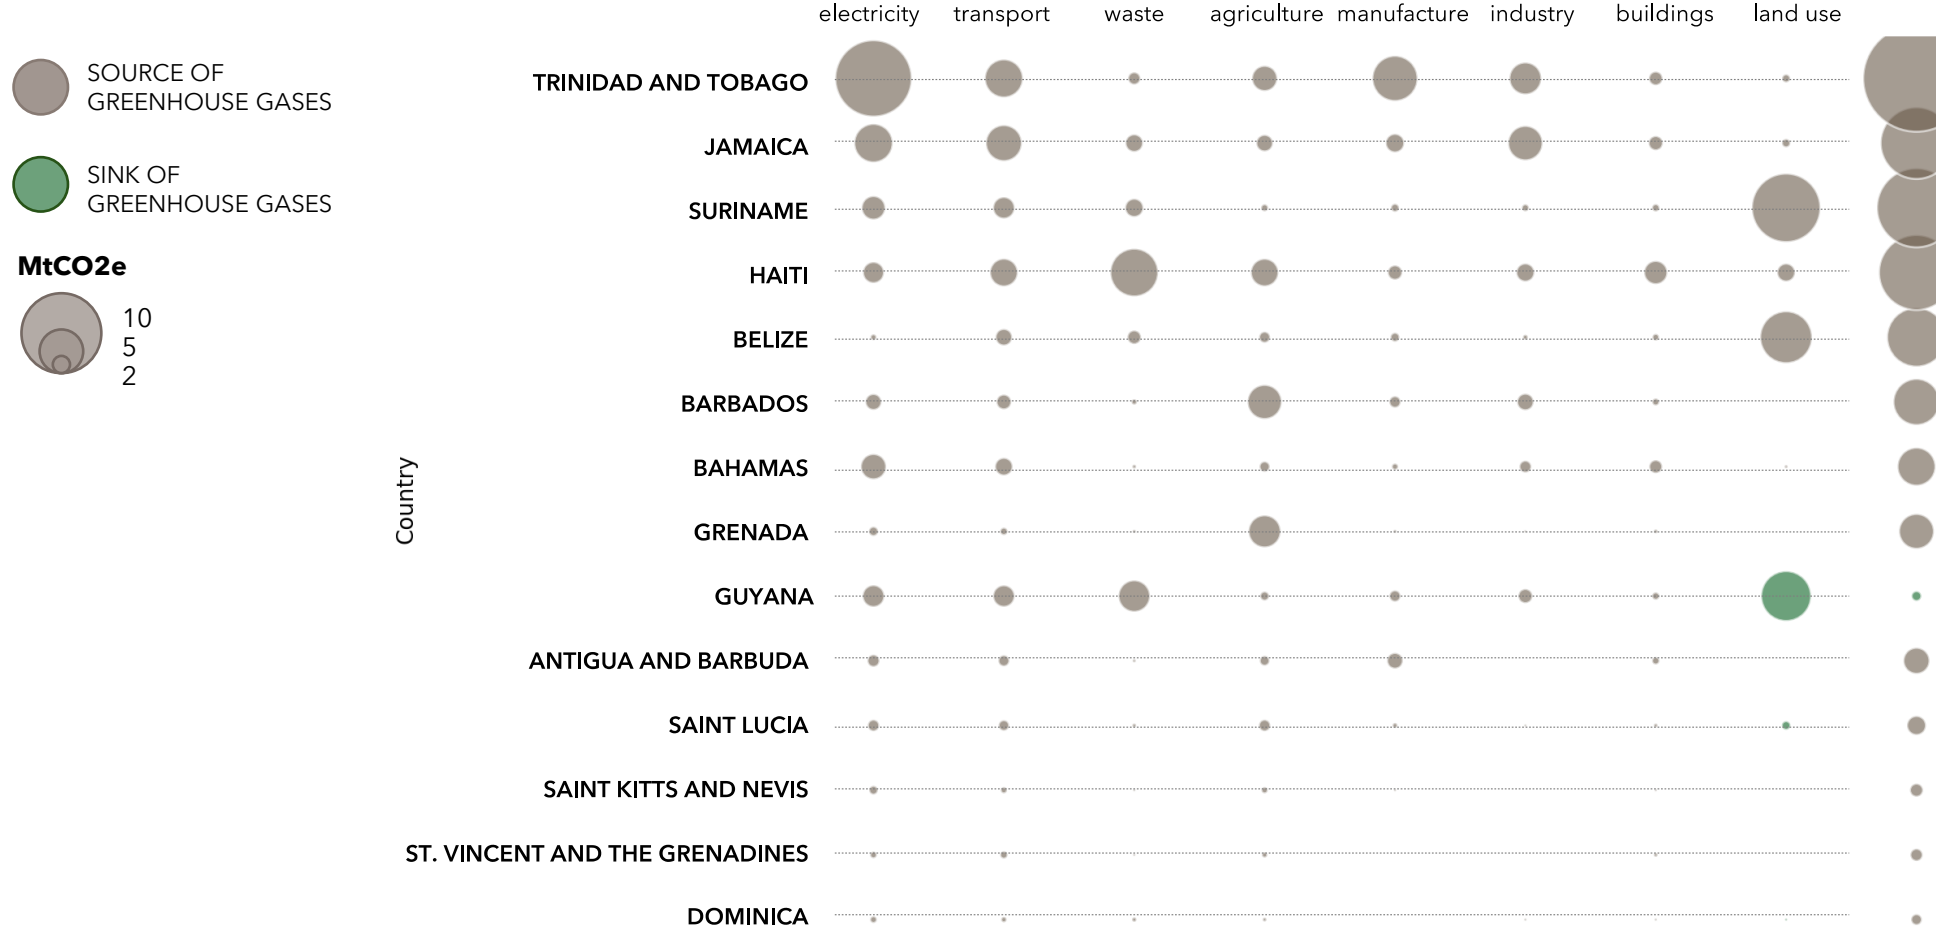

Mitigation

Adaptation

Emissions by sector

Source: WRI (2024) <https://www.wri.org/initiatives/climate-watch>

General insights

- Very unique realities, but also common challenges (e.g., all countries include infrastructure as an adaptation priority)
- Infrastructure, food systems, and coastal zones/ecosystems are the most prioritized sectors in NDCs
- Learning from other projects in the region (e.g., through readiness)
- Leveraging regional programmes that tackle common challenges
- Exploring opportunities to integrate across sectors (e.g., climate-smart urban spaces; agriculture and water security)

Thank you
