# Climate Investment Platform

**AN INCLUSIVE PARTNERSHIP TO PROVIDE INTEGRATED AND  
STREAMLINED SUPPORT FOR AMBITIOUS NDCs**

**A coalition of institutions, countries, initiatives and  
the private sector**

# Climate Investment Platform: A global initiative led by a coalition of partners to be launched at the Climate Summit

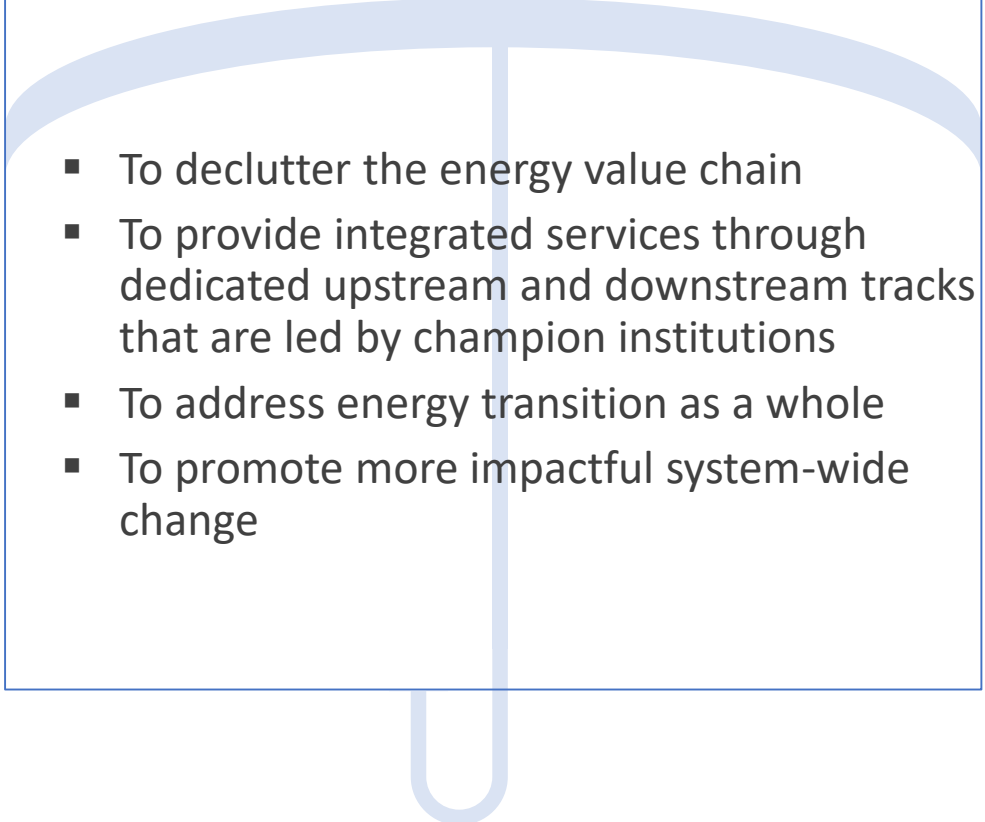

## Problem Statement

- Long investment cycle in emerging economies
- Investment needs estimated at well over USD 1 trillion a year
- Existing efforts are fragmented
- Absence of integrated approach with upstream policy intervention and downstream investment opportunities

## Value proposition:

**A unified mechanism for governments, international organizations and private sector partnerships**

- 
- A large, light blue umbrella graphic is positioned behind the text in the Value proposition section, with its handle extending downwards.
- To declutter the energy value chain
  - To provide integrated services through dedicated upstream and downstream tracks that are led by champion institutions
  - To address energy transition as a whole
  - To promote more impactful system-wide change

# Four tracks providing integrated and streamlined support to countries and the private sector

Empowered lives.  
Resilient nations.

# TRACK 1 –Targets

## Problem statement

Clean energy targets are not ambitious enough

c. 50% of NDCs do not include quantified clean energy targets

An additional USD 15 trillion is needed to realize 90% mitigation potential

## Baseline / existing initiatives

NDC Partnership

SE4ALL

OTHERS

## Proposed Track level activities

### 1.1 Raising NDCs ambition

- Capacity building and analysis
- Support design more ambitious and broader targets
- Encourage to align NDCs with national energy targets

### 1.2 Quantifiable targets

- For public: Support to estimate investment needs
- For Private sector : promoting ambitious targets

### 1.3 Monitoring targets

- Collect and track commitments on clean energy

Empowered lives.  
Resilient nations.

# TRACK 2 – Policies and Regulations

## Problem statement

For low-cost, commercial capital for clean energy to flow at scale, **the private sector needs transparent, long-term and clear policies and regulations.**

Most developing countries still lack clean energy policies and frameworks

## Baseline / existing initiatives

## Proposed Track level activities

### 2.1 Direct Technical Assistant

- Draft, implement, and enforcing well designed polices and regulations that are relevant to private sector

### 2.2 Promote transparent communications/data

- Domestic energy policies, investment risk, information gap

### 2.3 Facilitating knowledge sharing

- Latest international good practice, innovation in policy design

Empowered lives.  
Resilient nations.

## TRACK 3 – Financial De-risking

### Problem statement

Transactions still face high residual risks

Specific technologies with different risk profiles

The space is cluttered, transactions are slow

Lack of capacity by developing countries to structure non-recourse

### Baseline / existing initiatives

More than 100 PPF

Hermetic club of transaction advisors

Sovereign based risk transfer by MDBs

Commercial funding waits for bankability

### Proposed Track level activities

**3.1 Risk transfer instruments**

**3.2 Preparation & Bankability**

**3.3 Capacity Building**

**3.4 Scaling-up commercial de-risking instruments**

*Empowered lives.  
Resilient nations.*

## TRACK 4 – Marketplace

### Problem statement

Limited market visibility  
& transparency

High transaction costs

Prolonged timelines for  
financing

Constrained access to  
finance

### Baseline / existing initiatives

Fragmented climate  
finance initiatives

Commercial lenders  
targeting large scale  
bankable projects

Hermetic club of  
transaction advisors

Untapped potential for  
co-financing

### Proposed Track level activities

4.1 Deal-making and matching

4.2 Syndication & co-finance

4.3 Coordination of product  
offering
