Project title:

Tuvalu Coastal Adaptation Project – Phase II

Activities

- Site specific studies would have already been completed in the TCAP, a PPF could aid in project design and pre-contract services, including revision of tender documents.

Expected outcomes

- All Islands in Tuvalu would establish coastal protection plans, interventions and capacity to maintain ongoing maintenance and support into the future.

Paradigm shift potential

- This one-off investment will highly build on capacity for project design for coastal adaptation in which will be effective for more adaptation projects in line for Tuvalu.
