

Community of Practice of Direct Access Entities (CPDAE)

Achievements and challenges

GCF Global Programming Conference, September 2022

**Communities
of Practice**
help support us

and give us confidence
and motivation

**Communities
of Practice**
help us learn and
grow our skills

and get better at
what we do, together

**Communities
of Practice**
help us share our
knowledge

and join up related work

**Communities
of Practice**
help us scale our
ways of working

and share common
approaches across teams

**Communities
of Practice**
help us collaborate

and create better
practices for everyone

“Groups of people who share a concern or a passion for something they do and learn
how to do it better as they interact regularly.”

Etienne and Beverly Wenger-Trayner

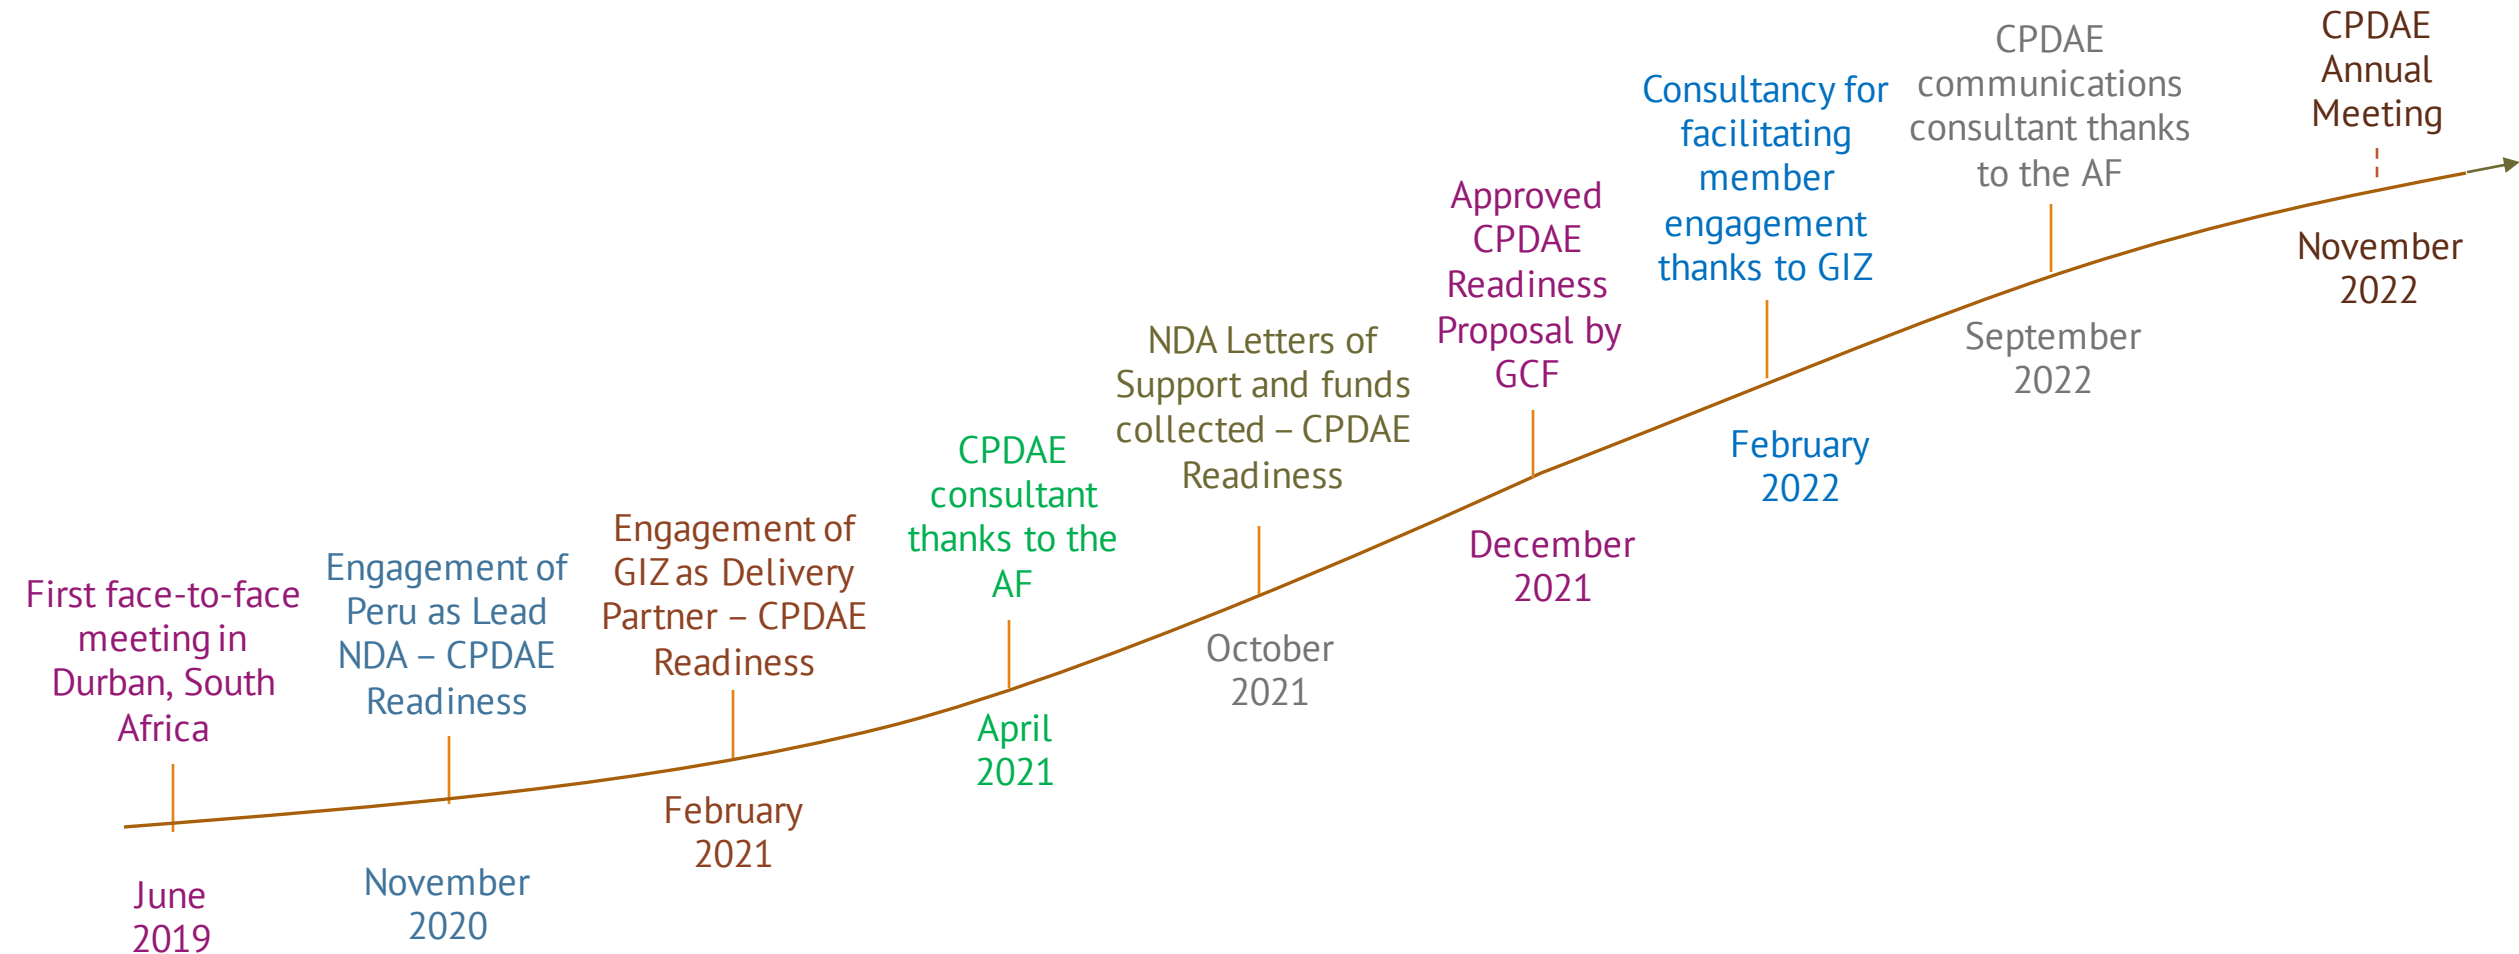

What is the CPDAE?

A **global network** integrated by National Implementing Entities (NIEs) of the Adaptation Fund (AF) and Direct Access Entities (DAEs) of the Green Climate Fund (GCF), involved in the programming of climate change adaptation and mitigation finance through the **Direct Access Modality**.

Best practice approach to **enhance country ownership** of climate projects

What has been achieved at this moment?

Challenges

Of the Community:

- Accomplish sustained peer-to-peer collaboration
- Increase the visibility of the CPDAE through social networks or the launch of a website
- Implement the most appropriate channel(s) or platform(s) to motivate knowledge sharing

Of the Members

- Deficiency in internal capacity to meet the requirements for accreditation and reaccreditation
- Language barriers when translating national policies and legal documents into English
- Lack of clarity around processes and required documents
- Developing concept notes and proposal templates
- Mapping climate impact; risk (probability of occurrence of uncertain impacts), options for mitigation/adaptation
- Environmental and social safeguards and gender related issues

Our expectations: what do we want

- Develop a **sustainable network**, which is strengthened with the constant support and interest of all – leading to an active community of practice and **joint growth**
- Enhance and develop **in-house capacities of CPDAE members** – leading to **increase** the number of **high-quality projects presented** which then will **increase the number of projects approved**
- **Strong NDAs** that work **in close coordination with their DAEs** – leading to boost **country ownership** of climate change adaptation and mitigation
- Overall, **support DAEs** in their efforts to **address country's climate priorities** and achieve the long-term goals framed under the **Nationally Determined Contributions (NDCs)**
