How can readiness resources address the needs of countries to advance climate investments?

Moderator: German Velasquez

13–15 September 2022
Incheon, Republic of Korea

#InspireMoreClimateAction

Topic 1:

Share insights on the barriers to address, focusing on the current Readiness programme, in translating climate change strategies and priorities into investment plans and funding proposals (25 min total)

1. What capacities, at the government level, are lacking in the countries, where Readiness can provide support, to translate climate change strategies into investment plans and funding proposals? (3 min each)
2. How can countries spark the involvement of the private sector in climate action? How can GCF readiness support help the governments to establish this? (3 min each)

Topic 2:

Discuss the opportunities in accelerating support to strengthen capacities at various levels via the Readiness Programme (focus on a new Readiness strategy to be proposed in 2023) (40 min total)

3. Which are, on your opinion, the top three priorities that you would like GCF to focus on the new readiness strategy? (3 min each)
4. Based on the readiness support received so far, what mechanisms can be improved or added that can accelerate readiness support and access to climate finance in countries? (3 min each)
5. Based on your experience, what will be your suggestion to improve the GCF readiness yearly cycle and allocation per country with a focus on DAEs. (3 min each)

Topic 3:

Discuss opportunities and improvements on the Readiness programme dedicated to Adaptation Planning (20 min)

6. How can the specific Readiness window on Adaptation planning continue and deepen the support to Adaptation? (3 min each)
7. What suggestions/insights can you share on how countries can catalyze the private sector engagement in Adaptation? (3 min each)
