Climate change: Pushing humanity against planetary boundaries

Safeguarding & strengthening nature are essential to securing a liveable future for humanity in the face of climate change

ipbes | ipcc

An aerial photograph of a mangrove forest, showing a complex network of winding, light blue water channels interspersed with dense, vibrant green mangrove vegetation. The perspective is from directly above, highlighting the intricate patterns of the landscape.

30X30 Global Target

- Protect 30% of Earth's land and water by 2030

> 100 countries support 30X30 global target

HIGH AMBITION COALITION
FOR NATURE AND PEOPLE

- 
- Maximize co-benefits
 - Biodiversity
 - Climate adaptation (ecosystems & people)
 - Mitigation
 - Enhances wellbeing of IPLCs
 - Support governments
 - In partnership with & respecting rights of IPLCs
