

# GCF-1 RAISING AMBITION. EMPOWERING ACTION.

December 11, 2019  
15:00-16:30  
Room 1  
UNFCCC COP25

Last updated at 17:00 on 11 December 2019

Achieving the globally agreed goals of the Paris Agreement requires a tectonic shift beyond “climate finance as usual.” We as an international community must not only increase the flow of investment many times over but must do so rapidly in order to initiate a systemic transition that benefits communities most at risk of climate change.

The successful replenishment of USD 9.8 billion to the Green Climate Fund (GCF) has created powerful momentum to innovate, accelerate and scale up climate finance.

How can GCF ensure the delivery of catalytic projects that support a transformative shift toward climate action?
