

Division of Mitigation and Adaptation

The Division of Mitigation and Adaptation provides technical expertise across all eight mitigation and adaptation results areas for both public and private sector CNs and funding proposals. The Division also leads the preparation and review of public sector CNs and funding proposals. It assists NDAs and AEs in the development and structuring of projects and plays a critical role in finalizing the FAAs following project approval to enable projects to start implementation. In addition, DMA is responsible for managing the GCF REDD-plus results-based payments pilot programme. Finally, it carries out technical reviews of and provides input for PPF applications and draft country and entity work programmes.
